1. Scope

This document provides changes and corrections to the following document files:

- WAP-200-WDP-20000219-a
- WAP-200_001-WDP-20001212-a
- WAP-200_002-WDP-20001213-a

It includes changes from the following change requests:

- None.

2. Notation

In the subsections describing the changes new text is underlined. Removed text has ~~strikethrough~~ marks. The presented text is copied from the specification. Text that is not presented is not affected at all. The change descriptions may also include editor's notes similar to the one below. The notes are not part of the actual changes and must not be included in the changed text.

Editor's note: Framed notes like these only clarify where and how the changes shall be applied.

3. Restructuring of SCR Table

3.1 Change Classification

Class 2 – Bug Fixes

3.2 Change Summary

WAP-221-CREQ-20010425-a requires that SCR tables have only entries, which include a device type. As a result the WDP SCR table must be restructured. Existing entries that do not include a device type have to be replaced with two similar entries: one for the client and another one for the server.

3.3 Change Description

Editor's note: In section **3.1 Normative References** add the following reference:
