

Enabler Release Definition for Dynamic Navigation (DynNav)

Approved Version 1.1 – 04 Aug 2015

Open Mobile Alliance
OMA-ERELD-DynNav-V1_1-20150804-A

Use of this document is subject to all of the terms and conditions of the Use Agreement located at <http://www.openmobilealliance.org/UseAgreement.html>.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at <http://www.openmobilealliance.org/ipr.html>. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.

THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS.

1. Scope

The scope of this document is limited to the Enabler Release Definition of DynNav Enabler 1.1 according to OMA Release process and the Enabler Release specification baseline listed in section 5.

2. References

2.1 Normative References

3. Terminology and Conventions

3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope”, “Release Version Overview” and “Conformance Requirements Notation Details”, are normative, unless they are explicitly indicated to be informative.

3.2 Definitions

DynNav Client	An entity that is in charge of interacting with a DynNav Server to get optimal route(s) or real-time and predicted traffic information and complimentary data.
DynNav Server	An entity that is in charge of providing to the application optimal route(s), real-time and forecasted traffic information, and complimentary data.
Enabler Release	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.
Minimum Functionality Description	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.
Navigation Device	An entity that, using GNSS service, assists the driver showing correct route to reach the final destination. This entity may process real-time and predicted traffic information and dynamically estimates the optimal route, according to user preferences.
Network Performance Parameter	Information regarding the performances (i.e. speed, delay and travel time) of road segments related to an area or a route.
Point Of Interest	POI describes information about locations such as name, category, unique identifier, or civic address.
Route Information	Information which coordinates of segment end points and complimentary data from the defined origin and the destination
Traffic Information	Information which consists of traffic events and network performance parameters related to an area or a route.

3.3 Abbreviations

API	Application Programming Interface
ND	Navigation Device
OMA	Open Mobile Alliance
POI	Point Of Interest
REST	REpresentational State Transfer
SCR	Static Conformance Requirements
TPEG	Transport Protocol Expert Group
TS	Technical Specification
URL	Uniform Resource Locator
XML	eXtensible Markup Language
XSD	XML Schema Definition

4. Release Version Overview

The DynNav Enabler provides an overall framework (mechanisms, functionalities, APIs, and etc.) to enable dynamic routing of vehicle based on traffic information.

The following areas will be covered as part of the scope of the enabler:

- Delivering traffic information and/or route information to the Navigation Device (ND);
- Delivering value added information to the ND, such as Point Of Interest (POI);

DynNav Enabler will reuse as much as possible existing technologies. In particular, with respect to interface specification, it is in the scope of this Enabler:

- to reuse traffic information data formats defined by TPEG in [ISO TTI],

4.1 Version 1.0 Functionality

The version 1.0 of the DynNav Enabler defines an overall framework that enables dynamic vehicles navigation service based on traffic information over a mobile network.

The core functionalities exposed by the DynNav Enabler include the following operations:

- Request and Provide a set of routes based on the journey parameters defined by the user
- Provide traffic information related to the route and an area defined by the ND
- Provide complementary information(i.e. POI) related to defined routes and/or areas
- Manage subscriptions to notification services for updates on traffic information and alternative route proposal

4.2 Version 1.1 Functionality

DynNav 1.1 supports the following functionalities additional to those in Version 1.0.

- Additional journey definition such as recurrent routes including time conditions and routes to the 3rd party for Smart ND
- Journey and route information sharing with interested 3rd parties through public resources
- Request and provide the optimal route to visit multiple waypoints complying with time and priority constraints
- Provide the list of POIs accessible within a defined travelling time/distance, and additionally related route information to the selected POI
- Supporting the common traffic information for reuse as opposed to the user-specific traffic information

5. Document Listing for DynNav 1.1

This section is normative.

Doc Ref	Permanent Document Reference	Description
Combined Enabler Release		
[DynNav ER]	OMA-ER-DynNav-V1_1-20150804-A	Requirements and Architecture Document for DynNav 1.1 Enabler
Technical Specification		
[DynNav TS]	OMA-TS-REST_NetAPI_DynNav-V1_1-20150804-A	Technical Specification for DynNav 1.1 Enabler
Supporting File		
[REST_SUP_DYNNAV]	OMA-SUP-XSD_rest_DynNav-V1_1-20150804-A	XSD schema for XML data structure definition

Table 1: Listing of Documents in DynNav Enabler

6. OMNA Considerations

The REST_NetAPI_DynNav enabler introduces the following namespaces.

Note that in order to maintain compatibility between minor versions of the same major version, only the major version is reflected in the namespace identifier. Further note that subsequent minor versions of the same XML schema (e.g. 1.1) will be registered against the same namespace identifier.

Description	Registered URN	Schema Links
Dynamic Navigation	urn:oma:xml:rest:netapi:dynnav:1.1	http://www.openmobilealliance.org/tech/profiles/rest_netapi_dynnav-v1_1.xsd

Table 2: OMNA Namespaces

7. Conformance Requirements Notation Details

This section is informative.

The tables in following chapters use the following notation:

- Item:** Entry in this column **MUST** be a valid `ScrItem` according to [SCRRULES].
- Feature/Application:** Entry in this column **SHOULD** be a short descriptive label to the **Item** in question.
- Requirement:** Expression in the column **MUST** be a valid `TerminalExpression` according to [SCRRULES] and it **MUST** accurately reflect the architectural requirement of the **Item** in question.

8. ERDEF for DynNav 1.1 - Client Requirements

Not Applicable in RESTfull NetAPI interface definition

9. ERDEF for DynNav 1.1 - Server Requirements

Static Conformance Requirements for a Navigation Server are specified in Appendix B.2 of [DynNav TS].

Appendix A. Change History

(Informative)

A.1 Approved Version History
