

# **Enabler Test Specification for DCD**

## **Candidate Version 1.0 – 14 Jul2009**

---

**Open Mobile Alliance**  
OMA-ETS-DCD-V1\_0-20090714-C

Use of this document is subject to all of the terms and conditions of the Use Agreement located at <http://www.openmobilealliance.org/UseAgreement.html>.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at <http://www.openmobilealliance.org/ipr.html>. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.

THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS.

# 1. Scope

This document describes in detail available test cases for DCD 1.0:

[http://www.openmobilealliance.org/Technical/released\\_enablers.aspx](http://www.openmobilealliance.org/Technical/released_enablers.aspx)

The test cases are split in two categories, conformance and interoperability test cases.

The conformance test cases are aimed to verify the adherence to normative requirements described in the technical specifications.

The interoperability test cases are aimed to verify that implementations of the specifications work satisfactory.

If either conformance or interoperability tests do not exist at the creation of the test specification this part should be marked not available.

## 3. Terminology and Conventions

### 3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope”, are normative, unless they are explicitly indicated to be informative.

The following numbering scheme is used:

**xxx-y.z-con-number** where:

xxx	Name of enabler, e.g. MMS or Browsing
y.z	Version of enabler release, e.g. 1.2 or 1.2.1
'con'	Indicating this test is a conformance test case
number	Leap number for the test case

Or

**xxx-y.z-int-number** where:

xxx	Name of enabler, e.g. MMS or Browsing
y.z	Version of enabler release, e.g. 1.2 or 1.2.1
'int'	Indicating this test is a interoperability test case
number	Leap number for the test case

### 3.2 Definitions

<b>Application Deregistration</b>	The process of terminating the association of a DCD Enabled Client Application with a DCD Server.
<b>Application Profile</b>	See [DCD-AD].
<b>Application Registration</b>	The process of establishing the association of a DCD Enabled Client Application with a DCD Server, and disclosure of its Application Profile, to facilitate DCD Enabled service establishment.
<b>ATOM</b>	A set of standards for web feeds, including The Atom Syndication Format (an XML language used for web feeds) and the Atom Publishing Protocol (a simple HTTP-based protocol for creating and updating web resources).
<b>Authentication</b>	The process of validating the identity of a DCD Client.
<b>Cell Broadcast Service</b>	A one-to-many geographically focused messaging service based upon the GSM/UMTS Short Message Service.
<b>Channel Deregistration</b>	The process of terminating availability of a DCD Channel.
<b>Channel Discovery</b>	The process of delivering Channel Guide information, to enable DCD Enabled Client Application awareness of available services, and to facilitate the Channel Subscription process.
<b>Channel Guide</b>	A subset of Channel Metadata for one or more DCD Channels, provided to facilitate the Channel Discovery process.
<b>Channel Metadata</b>	See [DCD-AD].
<b>Channel Metadata Update</b>	The process of delivering changes to Channel Metadata items for a specific DCD Channel, to applicable DCD Clients and DCD Enabled Client Applications.
<b>Channel Registration</b>	The process of establishing the availability of a new DCD Channel.
<b>Channel Resumption</b>	The process of resuming DCD Enabled services for a specific DCD Channel.
<b>Channel Subscription</b>	The process of establishing a Subscription to a DCD Enabled service, represented as a DCD Channel, for a DCD Enabled Client Application.
<b>Channel Subscription</b>	The process whereby a DCD Enabled Client Application updates its preferences related to a DCD

<b>Update Channel</b>	Channel.
<b>Channel Suspension</b>	The process of suspending DCD Enabled services for a specific DCD Channel.
<b>Channel Unsubscription</b>	The process of terminating a subscription to a DCD Channel.
<b>Client Activation</b>	The process of establishing or re-establishing a DCD Session.
<b>Client Deactivation</b>	The process of terminating a DCD Session.
<b>Content Metadata</b>	See [DCD-AD].
<b>Content Publication</b>	The process whereby DCD Content Providers make content available for ingestion and subsequent delivery by DCD Servers.
<b>Content Submission</b>	The process of sending content from a DCD Enabled Client Application to a DCD Content Provider for arbitrary application purposes.
<b>Content Update</b>	The process of delivering content to DCD Enabled Client Applications.
<b>DCD Channel</b>	See [DCD-AD]. Also referred to as “Channel”.
<b>DCD Client</b>	See [DCD-AD].
<b>DCD Content Packaging</b>	The enveloping of DCD Content with associated Content Metadata within DCD transactions.
<b>DCD Content Provider</b>	See [DCD-AD]. Also referred to as “Content Provider”.
<b>DCD Server</b>	See [DCD-AD].
<b>DCD Service</b>	A DCD enabler deployment, via which a DCD Service Provider offers DCD enabled services.
<b>DCD Service Provider</b>	See [DCD-AD]. Also referred to as “Service Provider”.
<b>DCD XML</b>	The XML document type used to express DCD messages.
<b>DCD-1</b>	A uni-directional point-to-point interface between the DCD Server and the DCD Client, used by the DCD Client to send content requests and submissions to the DCD Server and to receive DCD Content in response.
<b>DCD-2</b>	A uni-directional interface between the DCD Server and the DCD Client, used by the DCD Server to push notifications and / or content to the DCD Client.
<b>DCD-3</b>	A bi-directional interface between the DCD Server and the DCD Client, is used by the DCD Server and the DCD Client to exchange DCD Subscription and Administration information.
<b>DCD-CADE</b>	A bi-directional interface between the DCD Enabled Client Application and the DCD Client, used by the DCD Client to send notifications and / or content to the DCD Enabled Client Application, and enabling the DCD Enabled Client Application to retrieve content from the DCD Client.
<b>DCD-CAR</b>	A bi-directional interface between the DCD Enabled Client Application and the DCD Client, used by the DCD Enabled Client Application to register with the DCD Client when the application is installed on a terminal.
<b>DCD-CPDE</b>	A bi-directional interface between the DCD Content Provider and the DCD Server, used by the Content Provider to publish content at the DCD Server and by the DCD Server to retrieve content from the Content Provider.
<b>DCD-CPR</b>	A bi-directional interface between the DCD Content Provider and the DCD Server, used by the Content Provider to register new content channels with the DCD Server and to notify the DCD Server about subscription events and vice versa.
<b>DCD-Enabled Client Application</b>	See [DCD-AD].
<b>Dynamic Content Delivery</b>	See [DCD-AD].
<b>Enabler Release</b>	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.
<b>HTTP Digest Authentication</b>	A method of credentials negotiation between an HTTP client and HTTP server, defined in [RFC 2617].

<b>Minimum Functionality Description</b>	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.
<b>Pull</b>	A service delivery method in which the client initiates a service transaction.
<b>Push</b>	A service delivery method in which the server initiates a service transaction.
<b>Push-OTA</b>	The over-the-air interface via which OMA Push messages are delivered to terminals.
<b>Receive-Only Client Case</b>	Broadcast-related deployment model for DCD in which a DCD Client has no need or ability to transmit requests or responses to DCD transactions.
<b>RSS</b>	A family of web feed formats, including Really Simple Syndication (RSS 2.0) and RDF Site Summary (RSS 1.0)
<b>Subscription</b>	An arrangement to receive or be given access to content and services delivered via DCD.
<b>Subscription Personalization</b>	The process of adapting DCD Enabled services to a particular user's preferences and context.
<b>Subscription Validation</b>	The process of verifying DCD Enabled Client Application agreement with a DCD Server-initiated Channel Subscription action.
<b>User Agent Profile</b>	A document format defined by the OMA UAProf enabler [OMA-UAPROF], via which a device vendor discloses characteristics of a device and the OMA enablers that it supports.
<b>Wi-Fi</b>	Trade name for a collection of wireless technology specifications for private and public wireless networks operating in unlicensed frequency bands.

### 3.3 Abbreviations

<b>AP</b>	Application Profile
<b>APN</b>	Access Point Name
<b>BCAST</b>	The OMA BCAST enabler
<b>CBS</b>	Cell Broadcast Service
<b>CP</b>	Content Provider
<b>DC</b>	DCD Client
<b>DCD</b>	Dynamic Content Delivery
<b>DECA</b>	DCD Enabled Client Application
<b>DS</b>	DCD Server
<b>DTLS</b>	Datagram Transport Layer Security
<b>ERDEF</b>	Enabler Requirement Definition
<b>ERELD</b>	Enabler Release Definition
<b>HTTP</b>	Hypertext Transport Protocol
<b>ID</b>	Identifier
<b>IP</b>	Internet Protocol
<b>MIME</b>	Multipurpose Internet Mail Extensions
<b>MNO</b>	Mobile Network Operator
<b>OMA</b>	Open Mobile Alliance
<b>OMNA</b>	Open Mobile Naming Authority
<b>PAP</b>	Push Access Protocol
<b>PLMN</b>	Public Land Mobile Network

---

<b>RADIUS</b>	Remote Authentication Dial-In User Service (RFC 2865)
<b>RFC</b>	Request for Comments
<b>TLS</b>	Transport Layer Security
<b>UAProf</b>	User Agent Profile
<b>UMTS</b>	Universal Mobile Telecommunications System
<b>URI</b>	Universal Resource Identifier
<b>URL</b>	Universal Resource Locator
<b>WAP</b>	Wireless Application Protocol
<b>WBXML</b>	WAP Binary XML
<b>WSP</b>	Wireless Session Protocol
<b>XDMS</b>	XML Document Management Service

## 4. Introduction

The purpose of this document is to provide test cases for DCD Enabler Release 1.0.

The implementation of some features is optional for the Clients and/or the Servers in the DCD Enabler. The tests associated with these optional features are marked as "(Includes Optional Features)" in the test specification.

The following items on an overall level are needed to adequately test the DCD enabler:

- A DCD Server, configured to provide DCD-enabled services to a DCD Client
- A DCD Client, configured to access DCD-enabled services via the DCD Server
- A set of DCD-enabled services that have been established at the DCD Server as DCD Channels with associated Channel Metadata, configured per the requirements of the test cases
- A means to drive the tests from the DCD Client ("client driver") and DCD Server ("server driver") sides, one or more of:
  - External test drivers that execute specific test scenarios using pre-defined DCD external interface messages (or a functionally equivalent abstraction of the interfaces/messages), including channel/content metadata and content.
  - Internal test drivers provided by participating vendors, in compliance with test scenarios based upon specific channel/content metadata and content.
  - Actual applications (content provider applications and/or client applications), that provide/obtain service via the DCD enabler. Note use of test applications does not imply dependency upon the DCD-specified external interfaces; client/server products can be tested using proprietary external interfaces, since the focus in DCD 1.0 testing is on client/server interaction.

Note the term "driver" as used in the test case descriptions may apply to either a test driver or an actual application, as chosen by the client/server product vendor involved in the test.

## 5. DCD Conformance Test Cases

Not available.

## 6. DCD Interoperability Test Cases

Note: not explicitly tested at this time:

DCD-CAR  
DCD-CADE  
DCD-CPR  
DCD-CPDE

Tests not included in ETR, or conformance tests not planned for inclusion in ETS:

Client Activation by DS  
Client Deactivation by DS  
Internal Subscription to an Unregistered Channel  
Network Preferences  
Content Availability Notification  
Channel Suspension by DS  
Channel Resumption by DS  
Suspended Channel Handling by DC  
Suspended Channel Handling by DS  
Resumed Channel Handling by DC  
Resumed Channel Handling by DS  
Personalization/Contextualization by DS  
Personalization/Contextualization by DC  
Content Priority  
On-Demand Channel Discovery  
Channel Registration  
Content Publication  
Offline Charging (Internal Subscription, External Subscription, Subscription to an Unregistered Channel, Subscription Update, Internal Unsubscription, External Unsubscription, External Unsubscription with Confirmation, Content Pull, Content Pull with Confirmation, Content Push, Content Push with Confirmation, Content Submission, Error Handling, Usage Tracking)  
Online Charging (Internal Subscription, External Subscription, Subscription to an Unregistered Channel, Internal Unsubscription, External Unsubscription, Content Pull, Content Pull with Confirmation, Content Push, Content Push with Confirmation, Content Submission, Usage Tracking)

### 6.1 DCD-1.0-int-001 Client Activation

<b>Test Case Id</b>	DCD-1.0-int-001
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Client Activation
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.1]
<b>SCR Reference</b>	DCD-C-001 DCD-S-001
<b>ETR Reference</b>	ACT-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver, for registration-triggered client activation</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve client</li> <li>- client configured with server details in DCD-3 connection profile</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>-</li> </ul>
<b>Test Procedure</b>	<p>(1) Client activation is triggered, either by design (e.g. automatic upon startup) or by client driver (registration request)</p> <p>(2) The client sends ClientActivationRequest to the server</p> <p>(3) The server sends ClientActivationResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ClientActivationResponse is received and processed by the client without error</p>

**Table 1: DCD-1.0-int-001 Client Activation**

Note: not explicitly tested at this time:  
 ClientActivationRequest.Version  
 ClientActivationRequest.Session-ID  
 ClientActivationRequest.Broadcast-Service-ID  
 ClientActivationRequest.Session-TTL

## 6.2 DCD-1.0-int-002 Client Deactivation

<b>Test Case Id</b>	DCD-1.0-int-002
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Client Deactivation
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.2]
<b>SCR Reference</b>	DCD-C-001 DCD-S-001
<b>ETR Reference</b>	ACT-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver, for deregistration-triggered client deactivation</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- client activated</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> </ul>
<b>Test Procedure</b>	<p>(1) Client deactivation is triggered, either by UI (if client allows user to manually deactivate) or by client driver (e.g. by deregistration of the last registered client app)</p> <p>(2) The client sends ClientDeactivationRequest to the server</p> <p>(3) The server sends ClientDeactivationResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ClientDeactivationResponse is received and processed by the client without error</p>

Table 2: DCD-1.0-int-002 Client Deactivation

Note: not explicitly tested at this time:  
 ClientDeactivationRequest.Version  
 ClientDeactivationRequest.Session-ID  
 ClientDeactivationRequest.Broadcast-Service-ID  
 ClientDeactivationRequest.Session-TTL  
 ClientDeactivationNotification  
 ApplicationDeregistrationNotification  
 ApplicationDeregistrationConfirmation

### 6.3 DCD-1.0-int-010 Application Registration

<b>Test Case Id</b>	DCD-1.0-int-010
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Application Registration
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.3]
<b>SCR Reference</b>	DCD-C-002 DCD-S-002
<b>ETR Reference</b>	REG-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve application</li> <li>- client activated</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001 (unless tested at the same time)</li> </ul>
<b>Test Procedure</b>	<p>(1) Registration is triggered, either by design (e.g. automatic by client for some application, upon startup) or by client driver (registration request)</p> <p>(2) The client sends ApplicationRegistrationRequest to the server</p> <p>(3) The server sends ApplicationRegistrationResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ApplicationRegistrationResponse is received and processed by the client without error</p>

**Table 3: DCD-1.0-int-010 Application Registration**

Note: not explicitly tested at this time:

ApplicationRegistrationRequest.Session-ID  
 ApplicationRegistrationRequest.Message-ID  
 ApplicationRegistrationRequest.application-profile.channel-discoverynotification  
 ApplicationRegistrationRequest.application-profile.dcd-3-connectionprofile-name  
 ApplicationRegistrationRequest.application-profile.dcd-3-connectionprofile  
 ApplicationRegistrationRequest.application-profile.broadcast-profile  
 ApplicationRegistrationRequest.application-profile.dcd-channelselection-metadata  
 ApplicationRegistrationResponse.Session-ID  
 ApplicationRegistrationResponse.Message-ID  
 ApplicationRegistrationResponse.Channel-Guide

## 6.4 DCD-1.0-int-020 Internal Subscription

<b>Test Case Id</b>	DCD-1.0-int-020
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Internal Subscription
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.7]
<b>SCR Reference</b>	DCD-C-003 DCD-S-004
<b>ETR Reference</b>	SUB-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> </ul>
<b>Test Procedure</b>	<p>(1) Subscription is triggered, either by design (automatic subscription upon startup) or by client driver (subscription request)</p> <p>(2) The client sends ChannelSubscriptionRequest to the server</p> <p>(3) The server sends ChannelSubscriptionResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ChannelSubscriptionResponse is received and processed by the client without error</p> <p>(2) Content delivery begins per the channel metadata</p>

**Table 4: DCD-1.0-int-020 Internal Subscription**

Note: not explicitly tested at this time:  
 ChannelSubscriptionRequest.Message-ID  
 ChannelSubscriptionRequest.Session-ID  
 ChannelSubscriptionRequest.Channel-Metadata  
 ChannelSubscriptionRequest.Selected-Purchase-Option  
 ChannelSubscriptionRequest.Subscription-IDs  
 ChannelSubscriptionRequest.Content-Address  
 ChannelSubscriptionResponse.Message-ID  
 ChannelSubscriptionResponse.Session-ID  
 ChannelSubscriptionResponse.Channel-Metadata

## 6.5 DCD-1.0-int-021 Internal Unsubscription

<b>Test Case Id</b>	DCD-1.0-int-021
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Internal Unsubscription
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.8]
<b>SCR Reference</b>	DCD-C-003 DCD-S-004
<b>ETR Reference</b>	SUB-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Unsubscription is triggered by client driver (unsubscription request)</p> <p>(2) The client sends ChannelUnsubscriptionRequest to the server</p> <p>(3) The server sends ChannelUnsubscriptionResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ChannelUnsubscriptionResponse is received and processed by the client without error</p> <p>(2) Content delivery ends for the channel</p>

**Table 5: DCD-1.0-int-021 Internal Unsubscription**

Note: not explicitly tested at this time:  
 ChannelUnsubscriptionRequest.Message-ID  
 ChannelUnsubscriptionRequest.Session-ID  
 ChannelUnsubscriptionRequest.Channel-ID  
 ChannelUnsubscriptionResponse.Message-ID  
 ChannelUnsubscriptionResponse.Session-ID

## 6.6 DCD-1.0-int-030 Scheduled Content Update Request

<b>Test Case Id</b>	DCD-1.0-int-030
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Scheduled Content Update Request
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.8]
<b>SCR Reference</b>	DCD-C-007 DCD-S-011
<b>ETR Reference</b>	CDEL-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel with a defined pull-schedule</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per the channel pull-schedule</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ContentUpdateResponse is received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

**Table 6: DCD-1.0-int-030 Scheduled Content Update Request**

Note: not explicitly tested at this time:

- ContentUpdateRequest.Message-ID
- ContentUpdateRequest.Session-ID
- ContentUpdateRequest.Channel-IDs
- ContentUpdateRequest.Content-IDs
- ContentUpdateRequest.Content-addresses
- ContentUpdateResponse.Message-ID
- ContentUpdateResponse.Session-ID
- ContentUpdateResponse.Channel-ID
- ContentUpdateResponse.Content-Package

## 6.7 DCD-1.0-int-031 On-Demand Content Update Request

<b>Test Case Id</b>	DCD-1.0-int-031
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	On-Demand Content Update Request
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.8]
<b>SCR Reference</b>	DCD-C-007 DCD-S-011
<b>ETR Reference</b>	CDEL-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel with on-demand request allowed</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered by client driver (content update request)</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ContentUpdateResponse is received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 7: DCD-1.0-int-031 On-Demand Content Update Request

## 6.8 DCD-1.0-int-032 Confirmed Content Update Request

<b>Test Case Id</b>	DCD-1.0-int-032
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Confirmed Content Update Request
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.8]
<b>SCR Reference</b>	DCD-C-007 DCD-S-011
<b>ETR Reference</b>	CDEL-001, CDEL-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel with a defined pull-schedule and on-demand request allowed, and content items with content-delivery-notification set to “True”</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-030 or DCD-1.0-int-031</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per the channel pull-schedule, or on-demand content update is triggered by client driver</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client</p> <p>(4) The client sends ContentDeliveryConfirmation to the server</p>
<b>Pass-Criteria</b>	<p>(1) ContentDeliveryConfirmation is received and processed by the server without error</p>

**Table 8: DCD-1.0-int-032 Confirmed Content Update Request**

Note: not explicitly tested at this time:  
 ContentDeliveryConfirmation.Message-ID  
 ContentDeliveryConfirmation.Session-ID  
 ContentDeliveryConfirmation.Content-Confirmation

## 6.9 DCD-1.0-int-033 Content Item Retrieval by Content Id

<b>Test Case Id</b>	DCD-1.0-int-033
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Item Retrieval by Content Id
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.4]
<b>SCR Reference</b>	DCD-C-010 DCD-S-011
<b>ETR Reference</b>	CDEL-001, CDEL-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via scheduled and/or on-demand update request, with some contents items being referenced in content update responses via content-id.</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-030 or DCD-1.0-int-031</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per the channel pull-schedule, or on-demand content update is triggered by client driver</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client, including some content items referenced by content-id only (without the actual content)</p> <p>(4) For content items referenced by content-id only, the client sends ContentUpdateRequest to the server, including the content-id for all the referenced items</p> <p>(5) The server sends ContentUpdateResponse to the client, including the requested content items</p>
<b>Pass-Criteria</b>	<p>(1) The content items are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 9: DCD-1.0-int-033 Content Item Retrieval by Content Id

## 6.10 DCD-1.0-int-034 Content Item Retrieval by Content Address

<b>Test Case Id</b>	DCD-1.0-int-034
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Item Retrieval by Content Address
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.4, 6.2.6.5]
<b>SCR Reference</b>	DCD-C-010 DCD-S-011
<b>ETR Reference</b>	CDEL-001, CDEL-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via scheduled and/or on-demand update request, with some contents items being referenced in content update responses via content-address.</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-030 or DCD-1.0-int-031</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per the channel pull-schedule, or on-demand content update is triggered by client driver</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client, including some content items referenced by content-address only (without the actual content)</p> <p>(4) For each content item referenced by content-address only, the client sends ContentUpdateRequest to the server at the indicated content-address</p> <p>(5) For each ContentUpdateRequest, the server sends ContentUpdateResponse to the client, including the requested content item</p>
<b>Pass-Criteria</b>	<p>(1) The content items are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 10: DCD-1.0-int-034 Content Item Retrieval by Content Address

## 6.11 DCD-1.0-int-035 Aux Content Item Retrieval

<b>Test Case Id</b>	DCD-1.0-int-035
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Aux Content Item Retrieval
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.5]
<b>SCR Reference</b>	DCD-C-010 DCD-S-011
<b>ETR Reference</b>	CDEL-001, CDEL-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via scheduled and/or on-demand update request, with some contents items including auxiliary content referenced in content update responses via aux-content-link.</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-030 or DCD-1.0-int-031</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per the channel pull-schedule, or on-demand content update is triggered by client driver</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client, including some content items with auxiliary content referenced via aux-content-link</p> <p>(4) For each auxiliary content referenced via aux-content-link, the client sends ContentUpdateRequest to the server at the indicated aux-content-link</p> <p>(5) For each ContentUpdateRequest, the server sends ContentUpdateResponse to the client, including the requested content item</p>
<b>Pass-Criteria</b>	<p>(1) The content items are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 11: DCD-1.0-int-035 Aux Content Item Retrieval

## 6.12 DCD-1.0-int-036 Content Item Replacement

<b>Test Case Id</b>	DCD-1.0-int-036
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Item Replacement
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.9]
<b>SCR Reference</b>	DCD-C-010 DCD-S-011
<b>ETR Reference</b>	CDEL-001, CDEL-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via scheduled and/or on-demand update request, with content item replacement.</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-030 or DCD-1.0-int-031</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per the channel pull-schedule, or on-demand content update is triggered by client driver</p> <p>(2) The client sends ContentUpdateRequest to the server</p> <p>(3) The server sends ContentUpdateResponse to the client, including some content items. The client stores the content items</p> <p>(4) Content update is again triggered per the channel pull-schedule, or on-demand content update is triggered by client driver</p> <p>(5) The client sends ContentUpdateRequest to the server</p> <p>(6) The server sends ContentUpdateResponse to the client, including replaces-content-id for some content items to be replaced</p> <p>(6) The client replaces the content items and associated metadata indicated by the replaces-content-id</p>
<b>Pass-Criteria</b>	<p>(1) The indicated content items and associated metadata are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

**Table 12: DCD-1.0-int-036 Content Item Replacement**

### 6.13 DCD-1.0-int-040 Content Update Notification

<b>Test Case Id</b>	DCD-1.0-int-040
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Update Notification
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.5, 6.2.6.8]
<b>SCR Reference</b>	DCD-C-009 DCD-S-013
<b>ETR Reference</b>	CDEL-003
<b>Tool</b>	TBD

<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via scheduled and/or on-demand update notifications</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update notification is triggered per the channel push-schedule, or on-demand by server driver</p> <p>(2) The server sends ContentUpdateNotification to the client, including content items referenced by content-id</p> <p>(3) The client sends ContentUpdateRequest to the server, including the content-id for all the referenced items</p> <p>(4) The server sends ContentUpdateResponse to the client, including the requested content items</p>
<b>Pass-Criteria</b>	<p>(1) The content items are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to deliver content items with content-price metadata</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-030, DCD-1.0-int-031, DCD-1.0-int-040, DCD-1.0-int-041</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) New/updated content is made available for a subscribed channel, with content-price specified for a content item</p> <p>(2) Channel update is initiated, either via pull or push content delivery transactions, and the content item with purchase-option is delivered to the client</p> <p>(3) The client informs the application of the received content item with content-price</p>
<b>Pass-Criteria</b>	<p>(1) The application successfully receives the content-price information</p>

**Table 27: DCD-1.0-int-073 Charging-Related Content Metadata Handling**

## 6.28 DCD-1.0-int-100 Connection Profile Update

<b>Test Case Id</b>	DCD-1.0-int-100
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Connection Profile Update
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.14, 16.2]
<b>SCR Reference</b>	
<b>ETR Reference</b>	ACT-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- client activated, and assigned a non-zero Session-TTL value</li> <li>- application registered</li> <li>- client is subscribed to channels configured for operation over DCD-1 and DCD-2, and which do not have specific DCD-1 or DCD-2 connection profiles</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) An update of default DCD-1, DCD-2, and DCD-3 connection profiles is triggered at the server, e.g. through server administration</p> <p>(2) The server sends ConnectionProfileUpdate to the client, with the updated connection profiles</p> <p>(3) Content Update Request is triggered either by schedule or on-demand of the application or client driver, and the client uses the new DCD-1 connection profile in sending ContentUpdateRequest</p> <p>(3) Content Update Push or Content Update Notification is triggered at the server, and the client uses the new DCD-2 connection profile in receiving the content push or notification</p> <p>(4) The client uses the new DCD-3 connection profile for the next DCD session, i.e. upon Session-TTL expiration</p>
<b>Pass-Criteria</b>	<p>(1) The Connection Profile Update is received by the client and processed without error</p> <p>(2) The new default connection profiles are applied for each interface</p>

Table 28: DCD-1.0-int-100 Connection Profile Update

Note: not explicitly tested at this time:  
Named connection profile update  
Immediate application of DCD-3 connection profile changes for sessions with Session-TTL value zero  
Immediate application of changes for removed connection profiles

## 6.29 DCD-1.0-int-110 External Subscription

<b>Test Case Id</b>	DCD-1.0-int-110
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	External Subscription
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.3.2, 6.2.4.2]
<b>SCR Reference</b>	DCD-C-004 DCD-S-005

<b>ETR Reference</b>	SUB-003
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to support external subscription to channel</li> <li>- client activated</li> <li>- application registered</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> </ul>
<b>Test Procedure</b>	<p>(1) External subscription for a channel triggered, either by design (subscription notification from content provider) or by server driver</p> <p>(2) The server sends ChannelSubscriptionNotification to the client</p> <p>(3) The client validates the subscription with the application</p> <p>(4) The client receives a subscription validation response, either by application design or by client driver</p> <p>(5) The client sends ChannelSubscriptionNotificationResponse to the server</p>
<b>Pass-Criteria</b>	<p>(1) ChannelSubscriptionNotification is received and processed by the client without error</p> <p>(2) ChannelSubscriptionNotificationResponse is received and processed by the server without error</p> <p>(3) Content delivery begins per the channel metadata</p>

Table 29: DCD-1.0-int-110 External Subscription

Note: not explicitly tested at this time:  
 ErrorNotification upon unacceptable ChannelSubscriptionNotificationResponse  
 External subscription declined by application

## 6.30 DCD-1.0-int-111 External Unsubscription

<b>Test Case Id</b>	DCD-1.0-int-111
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	External Unsubscription
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.3.4, 6.2.4.5]
<b>SCR Reference</b>	DCD-C-004 DCD-S-005
<b>ETR Reference</b>	SUB-004
<b>Tool</b>	TBD

<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to support external subscription to channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) External unsubscription for a channel triggered, either by design (subscribed channel deregistration by the content provider, or other subscription-terminating event at the server) or by server driver</p> <p>(2) The server sends ChannelUnsubscriptionNotification to the client</p> <p>(3) The client sends ChannelUnsubscriptionConfirmation to the server</p>
<b>Pass-Criteria</b>	<p>(1) ChannelUnsubscriptionNotification is received and processed by the client without error, including notification to the application</p> <p>(2) ChannelUnsubscriptionConfirmation is received and processed by the server without error</p> <p>(3) Content delivery ends for the channel</p>

Table 30: DCD-1.0-int-111 External Unsubscription

## 6.31 DCD-1.0-int-130 DCD-Provided Storage

<b>Test Case Id</b>	DCD-1.0-int-130
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	DCD-Provided Storage
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.9]
<b>SCR Reference</b>	DCD-C-010 DCD-S-014
<b>ETR Reference</b>	CDEL-005
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via pull or push, with DCD-provided storage indicated in channel metadata</li> <li>- content items available with specified values for the content metadata items: content-expiration, parental-rating, content-address, content-price, content-name, content-types, content-length, mime-type, content-updated, content-id, channel-id</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-030, DCD-1.0-int-031, or DCD-1.0-int-041</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<ol style="list-style-type: none"> <li>(1) Content update is triggered per design or client/server driver</li> <li>(2) The server delivers content and content metadata to the client per the applicable content update transaction, and stored in the DCD-provided storage</li> <li>(3) The application is notified of the content update</li> <li>(4) The application subsequently requests one of the stored content items, and the client provides the content item and content metadata</li> </ol>
<b>Pass-Criteria</b>	<ol style="list-style-type: none"> <li>(1) The content items and content metadata are stored, and are accurately provided to the application upon notification and/or request</li> </ol>

Table 31: DCD-1.0-int-130 DCD-Provided Storage

## 6.32 DCD-1.0-int-131 Content Decoding

<b>Test Case Id</b>	DCD-1.0-int-131
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Decoding
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.9]
<b>SCR Reference</b>	DCD-C-010 DCD-S-014
<b>ETR Reference</b>	CDEL-005
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via pull or push</li> <li>- content items available, with delivery in encoded form per the content-encoding content metadata attribute</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-030, DCD-1.0-int-031, or DCD-1.0-int-041</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<ol style="list-style-type: none"> <li>(1) Content update is triggered per design or client/server driver</li> <li>(2) The server delivers content and content metadata to the client per the applicable content update transaction</li> <li>(3) The application is notified of the content update</li> <li>(4) The application subsequently requests one of the encoded content items</li> </ol>
<b>Pass-Criteria</b>	<ol style="list-style-type: none"> <li>(1) For content items with content-encoding specified, the client decodes the content before delivery to the application upon notification and/or request</li> </ol>

**Table 32: DCD-1.0-int-131 Content Decoding**

### 6.33 DCD-1.0-int-132 Content Expiration

<b>Test Case Id</b>	DCD-1.0-int-132
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Expiration
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.6, 6.2.6.9]
<b>SCR Reference</b>	DCD-C-010 DCD-S-014
<b>ETR Reference</b>	CDEL-005
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via pull or push, with DCD-provided storage indicated in channel metadata</li> <li>- content items available, with specified expiration</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-030, DCD-1.0-int-031, DCD-1.0-int-041, or DCD-1.0-int-130</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update is triggered per design or client/server driver</p> <p>(2) The server delivers content and content metadata to the client per the applicable content update transaction, including one or more content items with content-expiration specified</p> <p>(3) The expiration time passes for a content item</p>
<b>Pass-Criteria</b>	<p>(1) The expired content items and content metadata are removed from DCD-provided storage</p>

Table 33: DCD-1.0-int-132 Content Expiration

## 6.34 DCD-1.0-int-140 DC-initiated Suspension

<b>Test Case Id</b>	DCD-1.0-int-140
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	DC-initiated Suspension
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.7.2, 6.2.8.2]
<b>SCR Reference</b>	DCD-C-014 DCD-S-016
<b>ETR Reference</b>	SUSP-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> <li>- channel is not suspended</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) The client initiates channel suspension, either by design (e.g. per delivery-when-roaming channel metadata attribute, or client user menu option), or client driver</p> <p>(2) The client sends ChannelSuspendRequest to the server</p> <p>(3) The server sends ChannelSuspendResponse to the client</p> <p>(4) The client informs the application or client driver of the suspension result</p>
<b>Pass-Criteria</b>	<p>(1) ChannelSuspendRequest is received and processed by the server without error</p> <p>(2) ChannelSuspendResponse is received and processed by the client without error</p> <p>(3) Content delivery is suspended for the channel</p>

Table 34: DCD-1.0-int-140 DC-initiated Suspension

## 6.35 DCD-1.0-int-141 DC-initiated Resumption

<b>Test Case Id</b>	DCD-1.0-int-141
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	DC-initiated Resumption
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.7.2, 6.2.8.2]
<b>SCR Reference</b>	DCD-C-014 DCD-S-016
<b>ETR Reference</b>	SUSP-005
<b>Tool</b>	TBD

## 6.43 DCD-1.0-int-160 On-Demand Contextual Information Upload

<b>Test Case Id</b>	DCD-1.0-int-160
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	On-Demand Contextual Information Upload
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.10, 6.2.11]
<b>SCR Reference</b>	DCD-C-019 DCD-S-023
<b>ETR Reference</b>	CIUPL-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Contextual information upload is triggered, either by design (e.g. as a server feature) or by server driver</p> <p>(2) The server sends ContextualInformationUploadRequest to the client, omitting the Report-policy structure.</p> <p>(3) The client sends ContextualInformationUpload to the server, including the contextual information required for on-demand reports.</p>
<b>Pass-Criteria</b>	<p>(1) ContextualInformationUploadRequest is received and processed by the client without error</p> <p>(2) ContextualInformationUpload is received and processed by the server without error</p> <p>(3) The contextual information report is accurate per the current device context.</p>

Table 42: DCD-1.0-int-160 On-Demand Contextual Information Upload

## 6.44 DCD-1.0-int-161 Contextual Information Upload Policy Establishment

<b>Test Case Id</b>	DCD-1.0-int-161
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Contextual Information Upload Policy Establishment
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.10, 6.2.11]
<b>SCR Reference</b>	DCD-C-019 DCD-S-023
<b>ETR Reference</b>	CIUPL-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Contextual information upload policy establishment is triggered, either by design (e.g. as a server feature) or by server driver</p> <p>(2) The server sends ContextualInformationUploadRequest to the client, including the Report-policy structure with one or more Report-policy options</p> <p>(3) The client sends ContextualInformationUpload to the server, including the contextual information required by the new policy</p>
<b>Pass-Criteria</b>	<p>(1) ContextualInformationUploadRequest is received and processed by the client without error</p> <p>(2) ContextualInformationUpload is received and processed by the server without error</p> <p>(3) The contextual information report is accurate per the current device context.</p>

Table 43: DCD-1.0-int-161 Contextual Information Upload Policy Establishment

## 6.45 DCD-1.0-int-162 Contextual Information Upload Policy Replacement

<b>Test Case Id</b>	DCD-1.0-int-162
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Contextual Information Upload Policy Replacement
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.10, 6.2.11]
<b>SCR Reference</b>	DCD-C-019 DCD-S-023
<b>ETR Reference</b>	CIUPL-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> <li>- contextual information upload policy established</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-161</li> </ul>
<b>Test Procedure</b>	<p>(1) Contextual information upload policy replacement is triggered, either by design (e.g. as a server feature) or by server driver</p> <p>(2) The server sends ContextualInformationUploadRequest to the client, including the Report-policy structure for the existing Policy-ID, and one or more new/updated Report-policy options</p> <p>(3) The client sends ContextualInformationUpload to the server, including the contextual information required by the updated policy</p>
<b>Pass-Criteria</b>	<p>(1) ContextualInformationUploadRequest is received and processed by the client without error</p> <p>(2) ContextualInformationUpload is received and processed by the server without error</p> <p>(3) The contextual information report is accurate per the current device context.</p>

Table 44: DCD-1.0-int-162 Contextual Information Upload Policy Replacement

## 6.46 DCD-1.0-int-163 Contextual Information Upload Policy Removal

<b>Test Case Id</b>	DCD-1.0-int-163
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Contextual Information Upload Policy Removal
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.10, 6.2.11]
<b>SCR Reference</b>	DCD-C-019 DCD-S-023
<b>ETR Reference</b>	CIUPL-001
<b>Tool</b>	TBD

<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> <li>- contextual information upload policy established</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-161</li> </ul>
<b>Test Procedure</b>	<p>(1) Contextual information upload policy removal is triggered, either by design (e.g. as a server feature) or by server driver</p> <p>(2) The server sends ContextualInformationUploadRequest to the client, including the Report-policy structure for the existing Policy-ID, and excluding one or all Report-policy options</p> <p>(3) The client sends ContextualInformationUpload to the server, including the contextual information still required by the updated policy (if any)</p>
<b>Pass-Criteria</b>	<p>(1) ContextualInformationUploadRequest is received and processed by the client without error</p> <p>(2) ContextualInformationUpload is received and processed by the server without error</p> <p>(3) The contextual information report does not include information related to removed report policies</p>

Table 45: DCD-1.0-int-163 Contextual Information Upload Policy Removal

## 6.47 DCD-1.0-int-164 Policy-Based Contextual Information Upload

<b>Test Case Id</b>	DCD-1.0-int-164
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Policy-Based Contextual Information Upload
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.10, 6.2.11]
<b>SCR Reference</b>	DCD-C-019 DCD-S-023
<b>ETR Reference</b>	CIUPL-002

<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> <li>- contextual information upload policy established</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> <li>- DCD-1.0-int-161</li> </ul>
<b>Test Procedure</b>	<p>(1) Contextual information upload is triggered by an established policy</p> <p>(2) The client sends ContextualInformationUpload to the server, including the contextual information as required by the policy</p>
<b>Pass-Criteria</b>	<p>(1) ContextualInformationUpload is received and processed by the server without error</p> <p>(2) The contextual information report is accurate per the current device context.</p>

Table 46: DCD-1.0-int-164 Policy-Based Contextual Information Upload

## 6.48 DCD-1.0-int-170 Content Repair

<b>Test Case Id</b>	DCD-1.0-int-170
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Repair
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.12, 6.2.13]
<b>SCR Reference</b>	DCD-C-021 DCD-S-025
<b>ETR Reference</b>	CREP-001
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-010</li> <li>- DCD-1.0-int-020 or DCD-1.0-int-110</li> </ul>
<b>Test Procedure</b>	<p>(1) Delivery of a large content item is interrupted</p> <p>(2) The client sends ContentRepairRequest to the server, with the information about the content item needing repair</p> <p>(3) The server sends ContentRepairResponse to the client, with the content necessary to repair the content item</p>
<b>Pass-Criteria</b>	<p>(1) ContentRepairRequest is received and processed by the server without error</p> <p>(2) ContentRepairResponse is received and processed by the server without error, and delivery of the content item is successfully completed</p>

Table 47: DCD-1.0-int-170 Content Repair

## 6.49 DCD-1.0-int-200 Operation over Cell Broadcast

### 6.49.1 DCD-1.0-int-201 Client Activation

<b>Test Case Id</b>	DCD-1.0-int-201
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Client Activation, with allocation of Broadcast-service-id
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.1] [DCD-TS-CBS] [8.1.1], [8.4.1]
<b>SCR Reference</b>	DCD-CBS-C-001, DCD-CBS-C-002 DCD-CBS-S-001, DCD-CBS-S-002
<b>ETR Reference</b>	ACT-001 and NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver, for registration-triggered client activation</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- Server configured to serve client.</li> <li>- Server configure with Broadcast-Service-ID</li> <li>- client configured with server details in DCD-3 connection profile</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>-</li> </ul>
<b>Test Procedure</b>	<p>(1) Client activation is triggered, either by design (e.g. automatic upon startup) or by client driver (registration request)</p> <p>(2) The client sends ClientActivationRequest to the server</p> <p>(3) The server sends ClientActivationResponse to the client with Broadcast-Service-ID</p>
<b>Pass-Criteria</b>	<p>(1) ClientActivationResponse is received and processed by the client without error</p>

**Table 48: DCD-1.0-int-201 Client Activation**

### 6.49.2 DCD-1.0-int-210 Application Registration

<b>Test Case Id</b>	DCD-1.0-int-210
<b>Test Object</b>	DCD Client
<b>Test Case Description</b>	Application Registration with CBS profile as part of the DCD-3 connection profile
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.3] [DCD-TS-CBS] [8.4.2]
<b>SCR Reference</b>	DCD-C-002, DCD-S-002 DCD-CBS-C-003
<b>ETR Reference</b>	REG-001, NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and optionally server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- client activated</li> <li>- Application Profile to be registered at DCD client with DCD-3 connection-profile that contains CBS profile in addition to PTP connection profile.</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-201</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-201 (unless tested at the same time)</li> </ul>

<b>Test Procedure</b>	<p>(1) Registration is triggered, either by design (e.g. automatic by client for some application, upon startup) or by client driver (registration request) with CBS profile (dcd-3-connection-profile containing the cell-broadcast-message-id and optionally the broadcast-service-id)</p> <p>(2) The client sends ApplicationRegistrationRequest to the server with The client sends ApplicationRegistrationRequest to the server with optionally ApplicationRegistrationRequest.application-profile.dcd-3-connectionprofile</p> <p>(3) The server sends ApplicationRegistrationResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) the specified message identifier (cell-broadcast-message-id) is registered in the CBS stack and ready for reception on this 'channel' (DCD-3 interface)</p> <p>(2) ApplicationRegistrationResponse is received and processed by the client without error</p> <p>(3) Administration message to be received on the defined DCD-3 broadcast profile (Channel Discovery)</p>

Table 49: DCD-1.0-int-210 Application Registration

### 6.49.3 DCD-1.0-int-220 Internal Subscription to CBS based 'Channel'

<b>Test Case Id</b>	DCD-1.0-int-220
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Internal Subscription with DCD-2 connection profile already set in the DCD Client with connection profile containing the CBS profile
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.7] [DCD-TS-CBS] [8.4.3]
<b>SCR Reference</b>	DCD-C-003, DCD-S-004 DCD-CBS-C-006, DCD-CBS-S-005
<b>ETR Reference</b>	SUB-001, NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-232 Channel Discovery Push</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-201</li> <li>- DCD-1.0-int-210</li> <li>- DCD-1.0-int-252 (optionally)</li> </ul>

<b>Test Procedure</b>	<p>(1) Subscription is triggered, either by design (automatic subscription upon startup) or by client driver (subscription request)</p> <p>(2) The Client registered the DCD-2 connection profile cell-broadcast-message-id parameter in the CB handler of the device</p> <p>(3) The client sends ChannelSubscriptionRequest to the server</p> <p>(4) The server sends ChannelSubscriptionResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ChannelSubscriptionResponse is received and processed by the client without error</p> <p>(2) Content delivery using the Content Update Push per the channel metadata (cell-broadcast-message-id parameter)</p>

Table 50: DCD-1.0-int-220 Internal Subscription to CBS based 'Channel'

#### 6.49.4 DCD-1.0-int-221 Internal Unsubscription from CBS based Channel

<b>Test Case Id</b>	DCD-1.0-int-221
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Internal Unsubscription from CBS based Channel
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.8]
<b>SCR Reference</b>	DCD-C-003, DCD-S-004 DCD-CBS-C-006
<b>ETR Reference</b>	SUB-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-201</li> <li>- DCD-1.0-int-210</li> <li>- DCD-1.0-int-220</li> </ul>
<b>Test Procedure</b>	<p>(1) Unsubscription is triggered by client driver (unsubscription request)</p> <p>(2) The client sends ChannelUnsubscriptionRequest to the server</p> <p>(3) The server sends ChannelUnsubscriptionResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) ChannelUnsubscriptionResponse is received and processed by the client without error</p> <p>(2) Content delivery ends for the channel</p>

Table 51: DCD-1.0-int-221 Internal Unsubscription from CBS based Channel

### 6.49.5 DCD-1.0-int-241 Content Update Push over CBS

<b>Test Case Id</b>	DCD-1.0-int-241
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Update Push over CBS
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.4, 6.2.6.7] [7.1.2.1] [DCD-TS-CBS] [8.4.5], [8.4.5.1]
<b>SCR Reference</b>	DCD-C-008, DCD-S-012 DCD-CBS-C-008, DCD-CBS-S-007
<b>ETR Reference</b>	CDEL-004, NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> <li>- DCD enabled CBC</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via sheduled and/or on-demand update push</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-201</li> <li>- DCD-1.0-int-210</li> <li>- DCD-1.0-int-220</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update Push is prepared in the server constructed as one CBS message with no DCD concatenation construction and WBXML encoded.</p> <p>(2) Content update Push is generated by the server towards the CBC</p> <p>(3) The server sends ContentUpdatePush to the client, including content items (WBXML encoded)</p> <p>(4) Content Update Push is received in the client</p>
<b>Pass-Criteria</b>	<p>(1) The content items are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 52: DCD-1.0-int-241 Content Update Push over CBS

### 6.49.6 DCD1.0-int-242 DCD Concatenated Content Update Push

<b>Test Case Id</b>	DCD-1.0-int-242
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	DCD Concatenated Content Update Push over CBS
<b>Specification Reference</b>	[DCD-TS-CBS] [6.4] [8.1] [8.4]
<b>SCR Reference</b>	DCD-CBS-C-009 DCD-CBS-S-007
<b>ETR Reference</b>	CDEL-004, NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> <li>- DCD enabled CBC</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via on-demand content update push</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-201</li> <li>- DCD-1.0-int-210</li> <li>- DCD-1.0-int-220</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update Push is prepared in the server as number of CBS messages with DCD concatenation construction</p> <p>(2) The server sends ContentUpdatePush to the client, including content items</p> <p>(3) Content Update Push is received in the client</p> <p>(4) The Client is reassemble the message to one long message</p>
<b>Pass-Criteria</b>	<p>(1) ContentUpdatePush is received and reassembled by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 53: DCD-1.0-int-242 DCD Concatenated Content Update Push over CBS

### 6.49.7 DCD-1.0-int-252 Channel Discovery Push over CBS

<b>Test Case Id</b>	DCD-1.0-int-252
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Channel Discovery Push over CBS

<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.8.2], [6.2.9.3], [7.1.3.10.1] [DCD-TS-CBS] [8.1.8], [8.4.7.1]
<b>SCR Reference</b>	DCD-CBS-C-004 DCD-CBS-S-010
<b>ETR Reference</b>	DISC-001, NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	Equipment: - client and server - client driver - DCD enabled CBC State: - server configured to have channel guide - Server configured to serve the relevant application-id - client activated - application registered Continuation of / Can be tested at the same time as: - Prerequisite for this test: - DCD-1.0-int-201 - DCD-1.0-int-210 - DCD-1.0-int-220
<b>Test Procedure</b>	(1) Channel Guide to be present on the server (2) Channel Discovery message is sent to the client over CBS (3) Channel Discovery Push is to received in the client (3) Client to prepare Channel Guide for the registered DECA
<b>Pass-Criteria</b>	(1) Channel Guide for the registered DECA is to be created in the client

Table 54: DCD-1.0-int-252 Channel Discovery Push over CBS

## 6.50 DCD-1.0-int-300 Operation over OMA BCAST

### 6.50.1 DCD-1.0-int-310 Application Registration with BCAST Access Parameters

<b>Test Case Id</b>	DCD-1.0-int-310
<b>Test Object</b>	DCD Client
<b>Test Case Description</b>	Application Registration with BCAST access parameters included as part of the DCD-3 connection profile
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.3] [DCD-TS-BCAST] [5.3.1]

<b>SCR Reference</b>	DCD-C-002, DCD-S-002 DCD-BCAST-C-002
<b>ETR Reference</b>	REG-001, NET-003
<b>Tool</b>	TBD
<b>Test code</b>	TBD
<b>Preconditions</b>	Equipment: - client and optionally server - client driver State: - client activated Continuation of / Can be tested at the same time as: - DCD-1.0-int-001 Prerequisite for this test: - DCD-1.0-int-001 (unless tested at the same time)
<b>Test Procedure</b>	(1) Registration is triggered, either by design (e.g. automatic by client for some application, upon startup) or by client driver (registration request) with dcd-3-connection-profile containing bcast-access-info element (2) The client may optionally send ApplicationRegistrationRequest to the server if an interactive channel is available or may process the registration locally without interacting with the server (3) If the client sends ApplicationRegistrationRequest to the server, the server sends ApplicationRegistrationResponse to the client
<b>Pass-Criteria</b>	(1) Reception of DCD-3 administrative messaging over BCAST is initiated by the client based on the connection parameters provided in the bcast-access-info element of the dcd-3-connection-profile (2) If ApplicationRegistrationRequest is sent, ApplicationRegistrationResponse is received and processed by the client without error

Table 55 DCD-1.0-int-310 Application Registration with BCAST Access Paramete

## 6.50.2 DCD-1.0-int-320 Internal Subscription to BCAST Delivered Channel

<b>Test Case Id</b>	DCD-1.0-int-320
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Internal Subscription to a channel delivered over BCAST
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.7] [DCD-TS-BCAST] [5.5.1.2. 5.5.2.1]
<b>SCR Reference</b>	DCD-C-003, DCD-S-004 DCD-BCAST-C-005, DCD-BCAST-S-007
<b>ETR Reference</b>	SUB-001, NET-003
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-310</li> </ul>
<b>Test Procedure</b>	<p>(1) Subscription is triggered, either by design (automatic subscription upon startup) or by client driver (subscription request)</p> <p>(2) The client initiates content reception for the channel on the BCAST file delivery session specified in the DCD-2-connection-profile</p> <p>(3) The client may optionally send ChannelSubscriptionRequest to the server if an interactive channel is available.</p> <p>(4) If the client sends ChannelSubscriptionRequest to the server, the server sends ChannelSubscriptionResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) If ChannelSubscriptionRequest is sent to the server, ChannelSubscriptionResponse is received and processed by the client without error</p> <p>(2) Content reception over BCAST is initiated by the client per the connection parameters specified in the bcast-access-info element of the dcd-2-connection-profile</p>

**Table 56 DCD-1.0-int-320 Internal Subscription to BCAST Delivered Channel**

### 6.50.3 DCD-1.0-int-321 Internal Unsubscription from BCAST Delivered Channel

<b>Test Case Id</b>	DCD-1.0-int-321
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Internal Unsubscription from a channel delivered over BCAST
<b>Specification Reference</b>	[DCD-TS-Semantics] [7.1.3.8] [DCD-TS-BCAST] [5.5.1.4, 5.5.2.3]
<b>SCR Reference</b>	DCD-C-003, DCD-S-004 DCD-BCAST-C-007, DCD-BCAST-S-008
<b>ETR Reference</b>	SUB-002, NET-003
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-310</li> <li>- DCD-1.0-int-320</li> </ul>
<b>Test Procedure</b>	<p>(1) Unsubscription is triggered by client driver (unsubscription request)</p> <p>(2) The client may optionally send ChannelUnsubscriptionRequest to the server if an interactive channel is available</p> <p>(3) If the client sends ChannelUnsubscriptionRequest to the server, the server sends ChannelUnsubscriptionResponse to the client</p>
<b>Pass-Criteria</b>	<p>(1) If the client sends ChannelUnsubscriptionRequest to the server, ChannelUnsubscriptionResponse is received and processed by the client without error</p> <p>(2) Content reception over BCAST is terminated for the channel</p>

**Table 57 DCD-1.0-int-321 Internal Unsubscription from BCAST Delivered Channel**

### 6.50.4 DCD-1.0-int-341 Content Update Push over BCAST

<b>Test Case Id</b>	DCD-1.0-int-341
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Content Update Push over BCAST
<b>Specification Reference</b>	[DCD-TS-Semantics] [6.1.5.4, 6.2.6.7] [7.1.2.1] [DCD-TS-BCAST] [5.6.1, 5.6.2]
<b>SCR Reference</b>	DCD-C-008, DCD-S-012 DCD-BCAST-C-008, DCD-BCAST-S-009
<b>ETR Reference</b>	CDEL-004, NET-002
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver and server driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to serve channel via sheduled and/or on-demand update push</li> <li>- client activated</li> <li>- application registered</li> <li>- client subscribed to channel</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-310</li> <li>- DCD-1.0-int-320</li> </ul>
<b>Test Procedure</b>	<p>(1) Content update notification is triggered per the channel push-schedule, or on-demand by server driver</p> <p>(2) The server sends ContentUpdatePush to the client over BCAST, including content item, via the BCAST file delivery session associated with the channel</p>
<b>Pass-Criteria</b>	<p>(1) The content items are received and processed by the client without error</p> <p>(2) The content is delivered to the application per the application-profile</p>

Table 58 DCD-1.0-int-341 Content Update Push over BCAST

### 6.50.5 DCD-1.0-int-361 Channel Discovery Push over BCAST

<b>Test Case Id</b>	DCD-1.0-int-361
<b>Test Object</b>	DCD Client and DCD Server
<b>Test Case Description</b>	Channel Discovery Push over BCAST
<b>Specification Reference</b>	<p>[DCD-TS-Semantics] [6.1.8.2], [6.2.9.3], [7.1.3.10.1]</p> <p>[DCD-TS-BCAST [5.7.1.1], [5.7.1.2]</p>
<b>SCR Reference</b>	<p>DCD-BCAST-C-009</p> <p>DCD-BCAST-S-010</p>
<b>ETR Reference</b>	DISC-001, NET-003
<b>Tool</b>	TBD
<b>Test code</b>	TBD

<b>Preconditions</b>	<p>Equipment:</p> <ul style="list-style-type: none"> <li>- client and server</li> <li>- client driver</li> </ul> <p>State:</p> <ul style="list-style-type: none"> <li>- server configured to push channel discovery info</li> <li>- client activated</li> <li>- application registered</li> </ul> <p>Continuation of / Can be tested at the same time as:</p> <ul style="list-style-type: none"> <li>-</li> </ul> <p>Prerequisite for this test:</p> <ul style="list-style-type: none"> <li>- DCD-1.0-int-001</li> <li>- DCD-1.0-int-310</li> </ul>
<b>Test Procedure</b>	<p>(1) Channel discovery info is triggered by server design (e.g. upon channel registration/update by content provider) or server driver</p> <p>(2) The server sends ChannelDiscoveryInfo to the client over BCAST via the BCAST file delivery session associated with the DCD-3 interface</p>
<b>Pass-Criteria</b>	<p>(1) ChannelDiscoveryInfo is received and processed by the client without error</p> <p>(2) The channel discovery information is delivered to the application per the application-profile</p>

**Table 59 DCD-1.0-int-361 Channel Discovery Push over BCAST**

## Appendix A. Change History (Informative)

### A.1 Approved Version History

Reference	Date	Description
n/a	n/a	No prior version –or- No previous version within OMA

### A.2 Draft/Candidate Version 1.0 History

Document Identifier	Date	Sections	Description
OMA-ETS-DCD-V1_0	15 Jan 2009	All	Initial document to address the basic starting point
	10 Feb 2009	6.8-6.50	CR incorporated: OMA-IOP-BRO-2009-0025
	18 Mar 2009	n/a	CR incorporated: OMA-IOP-BRO-2009-0044
	20 Mar 2009	6.52	CR incorporated: OMA-IOP-BRO-2009-0034
	24 Jun 2009	all	CR incorporated: OMA-IOP-BRO-2009-0074
Candidate Version OMA-ETS-DCD-V1_0	14 Jul 2009	n/a	TP approval: OMA-TP-2009-0307-INP_DCD_1.0_ETS_for_Candidate_approval
