Enabler Test Specification for (Conformance) for MMS
Candidate Version 1.3 – 28 Jan 2008

Open Mobile Alliance
OMA-ETS-MMS_CON-V1_3-20080128-C
## Contents

1 SCOPE ................................................................................................................................. 8

2 REFERENCES .......................................................................................................................... 9

2.1 NORMATIVE REFERENCES ............................................................................................ 9

2.2 INFORMATIVE REFERENCES .......................................................................................... 9

3 TERMINOLOGY AND CONVENTIONS .................................................................................. 10

3.1 CONVENTIONS .................................................................................................................. 10

3.2 DEFINITIONS ..................................................................................................................... 10

3.3 ABBREVIATIONS .............................................................................................................. 11

4 INTRODUCTION .................................................................................................................... 12

4.1 TEST OBJECTS .................................................................................................................. 12

4.2 TEST CASE SELECTION ................................................................................................... 12

4.3 TEST PROCEDURES ......................................................................................................... 12

   4.3.1 Test case execution ..................................................................................................... 12

   4.3.2 Addressing ................................................................................................................ 13

   4.3.3 Reference Content ..................................................................................................... 13

4.4 GENERAL .......................................................................................................................... 13

   4.4.1 Test Tool .................................................................................................................... 13

   4.4.2 Initial Conditions ...................................................................................................... 14

5 CLIENT TEST CASES .......................................................................................................... 15

5.1 CLIENT SENDING .............................................................................................................. 15

   5.1.1 Message ..................................................................................................................... 15

      5.1.1.1 General ................................................................................................................ 15

         5.1.1.1.1 MMS-1.3-con-102 - SMIL layout portrait with text above the image .............. 15

         5.1.1.1.2 MMS-1.3-con-103 - SMIL layout portrait with text below the image ............ 16

         5.1.1.1.3 MMS-1.3-con-104 - SMIL layout landscape with text to the left of the image . 17

         5.1.1.1.4 MMS-1.3-con-105 - SMIL layout landscape with text to the right of the image 18

         5.1.1.1.5 MMS-1.3-con-106 - Multiple objects in same page ........................................ 19

         5.1.1.1.6 MMS-1.3-con-107 - Multiple pages ........................................................ .......... 20

         5.1.1.1.7 MMS-1.3-con-108 - Multiple pages with page timing and time dependent content 21

         5.1.1.1.8 MMS-1.3-con-109 - Multiple pages with page timing .................................... 23

         5.1.1.1.9 MMS-1.3-con-111 - Subject field with UTF8 encoding ................................ 24

         5.1.1.1.10 MMS-1.3-con-171 - Long Subject field ......................................................... 25

         5.1.1.1.11 MMS-1.3-con-161 - Send MMS message without defining the <par> dur value ... 26

         5.1.1.1.12 MMS-1.3-con-162 - Send MMS message with user specific <par> dur value ... 27

   5.1.2 Core MM Content Domain ......................................................................................... 28

      5.1.2.1 Text ...................................................................................................................... 28

         5.1.2.1.1 MMS-1.3-con-112 - Text with US-ASCII encoding ......................................... 28

         5.1.2.1.2 MMS-1.3-con-113 - Text with UTF-8 encoding ............................................. 29

      5.1.2.2 Image ................................................................................................................... 30

         5.1.2.2.1 MMS-1.3-con-116 - JPG Image size 160x120 ..................................................... 30

         5.1.2.2.2 MMS-1.3-con-118 - JPG Image size 640x480 .................................................... 31

         5.1.2.2.3 MMS-1.3-con-120 - GIF Image size 160x120 ................................................... 32

         5.1.2.2.4 MMS-1.3-con-122 - GIF Image size 640x480 ................................................... 33

         5.1.2.2.5 MMS-1.3-con-124 - Animated GIF Image size 160x120 ............................... 34

         5.1.2.2.6 MMS-1.3-con-126 - Animated GIF Image size 640x480 ............................... 35

         5.1.2.2.7 MMS-1.3-con-128 - WBMP Image size 160x120 ............................................. 36

         5.1.2.2.8 MMS-1.3-con-130 - WBMP Image size 640x480 ............................................. 37

         5.1.2.2.9 MMS-1.3-con-160 - Sending MM with JPEG and Huffman table ................. 38

      5.1.2.3 Audio ..................................................................................................................... 39

         5.1.2.3.1 MMS-1.3-con-131 - AMR audio NB ............................................................... 39

         5.1.2.3.2 MMS-1.3-con-132 - 3GPP2 13k speech ......................................................... 40

      5.1.2.4 Video .................................................................................................................... 41

         5.1.2.4.1 MMS-1.3-con-133 - 3GPP Video QCIF ......................................................... 41

         5.1.2.4.2 MMS-1.3-con-134 - 3GPP Video sub-QCIF ................................................... 42

         5.1.2.4.3 MMS-1.3-con-135 - 3GPP2 Video QCIF (MPEG4+13k) ............................... 43

         5.1.2.4.4 MMS-1.3-con-136 - 3GPP2 Video QCIF (MPEG4+AMR) ............................ 44

         5.1.2.4.5 MMS-1.3-con-137 - 3GPP2 Video QCIF (H.263+13k) ............................... 45

         5.1.2.4.6 MMS-1.3-con-138 - 3GPP2 Video QCIF (H.263+AMR) ............................ 46
### 5.2 CLIENT RECEIVING

#### 5.2.1 General

- **5.2.1.1 Preconditions**
- **5.2.1.2 Generic MM**

#### 5.2.2 Message Structure and Handling

- **5.2.2.1 Presentation**
  - **5.2.2.1.1 MMS-1.3-con-201 - Empty text file**
  - **5.2.2.1.2 MMS-1.3-con-202 - SMIL layout portrait with text above the image**
  - **5.2.2.1.3 MMS-1.3-con-203 - SMIL layout portrait with text below the image**
  - **5.2.2.1.4 MMS-1.3-con-204 - SMIL layout landscape with text to the left of the image**
  - **5.2.2.1.5 MMS-1.3-con-205 - SMIL layout landscape with text to the right of the image**
  - **5.2.2.1.6 MMS-1.3-con-206 - Multiple objects in same page**
  - **5.2.2.1.7 MMS-1.3-con-207 - Multiple pages**
  - **5.2.2.1.8 MMS-1.3-con-208 - Multiple pages with page timing and time dependent content**
  - **5.2.2.1.9 MMS-1.3-con-209 - Multiple pages with page timing**
  - **5.2.2.1.10 MMS-1.3-con-276 - Support of 3GPP PSS6 SMIL Language Profile – Attributes and values supported**
  - **5.2.2.1.11 MMS-1.3-con-277 - Support of 3GPP PSS6 SMIL Language Profile – Attributes and/or Values not supported**
  - **5.2.2.1.12 MMS-1.3-con-278 – Hyperlinks - Recognition**
  - **5.2.2.1.13 MMS-1.3-con-279 – Hyperlinks - No impact on presentation**
  - **5.2.2.1.14 MMS-1.3-con-280 – Hyperlinks - Not followed automatically**

- **5.2.2.2 Header Field Handling**
  - **5.2.2.2.1 MMS-1.3-con-210 - Long Content-Location field**
  - **5.2.2.2.2 MMS-1.3-con-211 - Subject field with UTF8 encoding**
  - **5.2.2.2.3 MMS-1.3-con-271 - Long Subject field**
  - **5.2.2.2.4 MMS-1.3-con-272 - Long X-Mms-Content-Location field in Notification**
  - **5.2.2.2.5 MMS-1.3-con-273 - Size Indication in Notification – Non-rejection of incoming MM**
  - **5.2.2.2.6 MMS-1.3-con-281 - Receive unrecognised header field**
  - **5.2.2.2.7 MMS-1.3-con-282 - Receive recognised fields with unrecognised values**

- **5.2.2.3 Malformed Content Handling**
  - **5.2.2.3.1 MMS-1.3-con-274 - Corrupted Content**
  - **5.2.2.3.2 MMS-1.3-con-275 - Content not supported by Client B (e.g. PDF content)**

#### 5.2.3 Core MM Content Domain

- **5.2.3.1 Text**
  - **5.2.3.1.1 MMS-1.3-con-212 - Text with US-ASCII encoding**
  - **5.2.3.1.2 MMS-1.3-con-213 - Text with UTF-8 encoding**
  - **5.2.3.1.3 MMS-1.3-con-214 - Text with UTF-16(LE) encoding**

- **5.2.3.2 Image**
  - **5.2.3.2.1 MMS-1.3-con-216 - JPG Image size 160x120**
  - **5.2.3.2.2 MMS-1.3-con-218 - JPG Image size 640x480**
  - **5.2.3.2.3 MMS-1.3-con-220 - GIF Image size 160x120**
  - **5.2.3.2.4 MMS-1.3-con-222 - GIF Image size 640x480**
  - **5.2.3.2.5 MMS-1.3-con-224 - Animated GIF Image size 160x120**
  - **5.2.3.2.6 MMS-1.3-con-226 - Animated GIF Image size 640x480**
  - **5.2.3.2.7 MMS-1.3-con-228 - WBMP Image size 160x120**
  - **5.2.3.2.8 MMS-1.3-con-230 - WBMP Image size 640x480**
5.2.3.3.3 MMS-1.3-con-231 - AMR audio NB ..............................99
5.2.3.3.3 MMS-1.3-con-232 - 3GPP2 13k speech .....................100
5.2.3.3.4 Video ...................................................................101
5.2.3.3.4 MMS-1.3-con-233 - 3GPP Video QCIF .....................101
5.2.3.3.4 MMS-1.3-con-234 - 3GPP Video sub-QCIF ...............102
5.2.3.3.4 MMS-1.3-con-235 - 3GPP2 Video QCIF (MPEG4+13k) 103
5.2.3.3.4 MMS-1.3-con-236 - 3GPP2 Video QCIF (MPEG4+AMR) 104
5.2.3.3.4 MMS-1.3-con-237 - 3GPP2 Video QCIF (H.263+13k) 105
5.2.3.3.4 MMS-1.3-con-238 - 3GPP2 Video QCIF (H.263+AMR) 106
5.2.3.3.4 MMS-1.3-con-239 - 3GPP2 Video sub-QCIF (MPEG4+13k) 107
5.2.3.3.4 MMS-1.3-con-240 - 3GPP2 Video sub-QCIF (MPEG4+AMR) 108
5.2.3.3.4 MMS-1.3-con-241 - 3GPP2 Video sub-QCIF (H.263+13k) 109
5.2.3.3.4 MMS-1.3-con-242 - 3GPP2 Video sub-QCIF (H.263+AMR) 110

5.2.3.5 Attachment............................................................111
5.2.3.5.1 MMS-1.3-con-243 - vCard ........................................111
5.2.3.5.2 MMS-1.3-con-244 - vCalendar .................................112
5.2.3.6 Megapixel..............................................................114
5.2.3.6.1 MMS-1.3-con-245 - Full conformance to mega pixel class – retrieval and presentation of single page ..........114
5.2.3.6.2 MMS-1.3-con-246 - Full conformance to mega pixel class – retrieval and presentation of multiple objects...115
5.2.3.6.3 MMS-1.3-con-247 - Rich Text in megapixel content class ..........................................................116
5.2.3.6.4 MMS-1.3-con-248 - XHTML Family User Agent conformance ..............................................117

5.2.4 Content MM Content Domain ........................................118
5.2.4.1 Content Basic Content Class ....................................118
5.2.4.1.1 MMS-1.3-con-250 - Retrieval and presentation of Content Basic content class ..................................................118
5.2.4.1.2 MMS-1.3-con-252 - Rich Text in Content Basic content class ..........................................................119
5.2.4.2 Content Rich Content Class ......................................120
5.2.4.2.1 MMS-1.3-con-251 - Retrieval and presentation of Content Rich content class ..................................................120
5.2.4.2.2 MMS-1.3-con-253 - Rich Text in Content Rich content class ..........................................................121

5.3 CLIENT CREATION MODE ..............................................122
5.3.1 Content Creation .......................................................122
5.3.1.1 MMS-1.3-con-301 - Creation mode - Restricted - oversize ..........................................................122
5.3.1.2 MMS-1.3-con-302 - Creation mode - Restricted - inclusion of non core domain content ..................123
5.3.1.3 MMS-1.3-con-303 - Creation mode - Restricted - oversize image resolution ..........................................................124
5.3.1.4 MMS-1.3-con-304 - Creation mode - Restricted – forwarding oversize ..........................................................125
5.3.1.5 MMS-1.3-con-305 - Creation mode - Restricted – forwarding non conformant message ..........................................................126
5.3.1.6 MMS-1.3-con-306 - Creation mode - Restricted - forwarding non conformant content ..........................................................127
5.3.2 Content Adaptation .....................................................128
5.3.2.1 MMS-1.3-con-310 - Ability to reduce in size any image taken by the integrated camera to fit into an MM of the Core MM Content Domain ..........................................................128

5.4 CLIENT TRANSACTION .................................................129
5.4.1 Message Delivery Status Report ................................129
5.4.1.1 MMS-1.3-con-601 - Delivery report – Retrieved message ..........................................................129
5.4.1.2 MMS-1.3-con-602 - Delivery report – Rejected message ..........................................................131
5.4.1.3 MMS-1.3-con-603 - Delivery report – Expired message ..........................................................132
5.4.1.4 MMS-1.3-con-604 - Delivery report – Multiple recipients each with Different Delivery Status ..................133
5.4.1.5 MMS-1.3-con-620 - Delivery report – Interpreting Message-ID field ..........................................................135
5.4.2 Message Read-Reply Status Report ................................138
5.4.2.1 MMS-1.3-con-605 - Read-Reply report Date ..................138
5.4.2.2 MMS-1.3-con-606 - Read-Reply report ..........................140
5.4.2.3 MMS-1.3-con-607 - Read-Reply Report when sending to multiple recipients ..........................................................141
5.4.2.4 MMS-1.3-con-608 - Read report when sending to single recipient ..........................................................143
5.4.2.5 MMS-1.3-con-621 - Read report – Interpreting Message-ID field ..........................................................145
5.4.3 Forwarding ...............................................................148
5.4.3.1 MMS-1.3-con-611 - Forward without Prior retrieval ..........................................................148
5.4.3.2 MMS-1.3-con-612 Forward without prior retrieval - Validity Period (Expiry Time) set by Client when forwarding ..........................................................149
5.4.3.3 MMS-1.3-con-613 - Forward without prior retrieval - Forwarding Delivery report – Retrieved message ..........................................................150
5.4.3.4 MMS-1.3-con-614 - Forward without prior retrieval - Forwarding Delivery report – Rejected message ..........................................................151
5.4.3.5 MMS-1.3-con-615 - Forward without prior retrieval - Forwarding Delivery report – Expired message ..........................................................152
5.4.3.6 MMS-1.3-con-616 - Forward without prior retrieval - Read report when forwarding to single recipient ..........................................................153
5.4.3.7 MMS-1.3-con-617 - Forward without prior retrieval - Delivery Report when Forwarding – Interpreting Message-ID field ..........................................................154
5.4.3.8 MMS-1.3-con-618 - Forward without prior retrieval - Read Report when Forwarding – Interpreting Message-ID field

5.4.3.9 MMS-1.3-con-619 - Forward without prior retrieval - Long X-Mms-Content-Location field when Forwarding

5.4.4 Cancel

5.4.4.1 MMS-1.3-con-623 - Cancel

5.5 CLIENT B (RECIPIENT)

5.5.1 Download options

5.5.1.1 MMS-1.3-con-701 - Download options – Immediate retrieval

5.5.1.2 MMS-1.3-con-702 - Download options – Deferred retrieval

5.5.1.3 MMS-1.3-con-703 - Download options – Rejected retrieval

5.5.2 DRM Support

5.5.2.1 Normal Flow

5.5.2.1.1 MMS-1.3-con-704 - DRM support – Forward Lock

5.5.2.1.2 MMS-1.3-con-705 - Combined delivery restrictions on the submission of MM

5.5.2.1.3 MMS-1.3-con-706 - Message presentation with valid rights: Combined delivery

5.5.2.1.4 MMS-1.3-con-707 - Message presentation with valid rights: Separate delivery

5.5.2.2 Error Flow

5.5.2.2.1 MMS-1.3-con-711 - Message presentation with rights expired: Combined delivery

5.5.2.2.2 MMS-1.3-con-712 - Message presentation without valid rights: Separate delivery

5.5.3 Re-submission Mode

5.5.3.1 Normal Flow

5.5.3.1.1 MMS-1.3-con-715 - Re-submission of MM not conformant to MM Content Class: re-submission FREE

5.5.3.1.2 MMS-1.3-con-716 - Re-submission of MM not conformant to MM Content Class: re-submission WARNING

5.5.3.1.3 MMS-1.3-con-717 - Re-submission of MM adding media object conformant to MM class with total size lower than maximum supported

5.5.3.2 Error Flow

5.5.3.2.1 MMS-1.3-con-721 - No Re-submission of MM not conformant to MM Content Class: re-submission RESTRICTED

5.5.3.2.2 MMS-1.3-con-722 - No Re-submission of MM adding media object not conformant to the Core MM Content Domain

5.5.3.2.3 MMS-1.3-con-723 - No Re-submission of MM adding media object conformant to MM class with total size larger than maximum supported

5.5.3.2.4 MMS-1.3-con-724 - Creation mode set to FREE; Re-submission mode follows Creation mode

5.5.3.2.5 MMS-1.3-con-725 - Creation mode set to WARNING; Re-submission mode follows Creation mode

5.5.4 MMS Template Handling

5.5.4.1 MMS-1.3-con-761 - Valid MTD

5.5.4.2 MMS-1.3-con-762 - Invalid MTD

5.5.4.3 MMS-1.3-con-763 - Supported MTD Version

5.5.4.4 MMS-1.3-con-764 - Unsupported MTD Version

5.5.4.5 MMS-1.3-con-765 - Replace media objects by target name

5.5.4.6 MMS-1.3-con-766 - Add media objects by target name

5.5.4.7 MMS-1.3-con-767 - Invalid target type for replacement

5.5.4.8 MMS-1.3-con-768 - Fixed media objects

5.5.4.9 MMS-1.3-con-769 - Guidance message

5.5.4.10 MMS-1.3-con-770 - Input media object by plain text editor

5.5.4.11 MMS-1.3-con-771 - Input media object by file manager

5.5.4.12 MMS-1.3-con-772 - Input media object by address book

5.5.4.13 MMS-1.3-con-773 - Input media object by still-camera application

5.5.4.14 MMS-1.3-con-774 - Input media object by video-camera application

5.5.4.15 MMS-1.3-con-775 - Input media object by sound recorder application

5.5.4.16 MMS-1.3-con-776 - Input media object by rich text editor

5.5.4.17 MMS-1.3-con-777 - Forward/Backward navigation with steps

5.5.4.18 MMS-1.3-con-778 - Check for required attribute

5.5.4.19 MMS-1.3-con-779 - Set header values

5.5.4.20 MMS-1.3-con-780 - Make pre-filled MMS header values available to the user

5.6 CLIENT ENCAPSULATION

5.6.1 Sending of Multimedia Messages

5.6.1.1 MMS-1.3-con-731 - Support for X-Mms-Message-Type field

5.6.1.2 MMS-1.3-con-732 - Support for X-Mms-Transaction-ID field

5.6.1.3 MMS-1.3-con-733 - Support for Date field

5.6.1.4 MMS-1.3-con-734 - Support for From field

5.6.1.5 MMS-1.3-con-735 - Support for To field

5.6.1.6 MMS-1.3-con-736 - Support for Cc field

5.6.1.7 MMS-1.3-con-737 - Support for Bcc field

APPENDIX C.  OBSOLETE TESTS (INFORMATIVE) .......................... 242
1 Scope

This document describes in detail available conformance test cases for MMS Enabler 1.3, http://www.openmobilealliance.org/.

The MMS test cases are split in two categories, conformance and interoperability test cases.

The conformance test cases are aimed to verify the adherence to normative requirements described in the technical specifications.

The interoperability test cases are aimed to verify that implementations of the specifications work satisfactory and are defined in [MMSETSINT].

2.1 Normative References

2.2 Informative References

3 Terminology and Conventions

3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope” and “Introduction”, are normative, unless they are explicitly indicated to be informative.

The following numbering scheme is used:

xxx-y.z-con-number where:

xxx Name of enabler, e.g. MMS or Browsing
y.z Version of enabler release, e.g. 1.2 or 1.2.1
con Indicating this test is a conformance test case
number Leap number for the test case

Or

xxx-y.z-int-number where:

xxx Name of enabler, e.g. MMS or Browsing
y.z Version of enabler release, e.g. 1.2 or 1.2.1
int Indicating this test is an interoperability test case
number Leap number for the test case

3.2 Definitions

Client A The MMS client, which sends a multimedia message (Mobile Originating)
Client B The MMS client, which receives a multimedia message (Mobile Terminating)
Client X The MMS client representative of a unique implementation. In testing, can take a role of either client A or client B
Client Y The MMS client representative of a unique implementation. In testing, can take a role of either client A or client B
Multimedia Messaging Service (MMS) A system application by which a client is able to provide a messaging operation with a variety of media types.
MMS Client The MMS service endpoint located on the client device.
MMS Proxy-Relay A server, which provides access to various messaging systems.
MMS Server A server that provides storage and operational support for the MMS service.
MMS SMIL A SMIL subset defined for MMS purposes.
Reasonably Presented “Something intelligible, which is not necessarily a close reflection of the author’s original intentions.” From the World Wide Web Consortium, W3C
Reference Content Specified text, audio and images used in test cases. Reference content shall be available with the Enabler Test Specification (ETS).
Textually Correct The property of a text, being word for word and letter by letter, presented in the same manner as originally written. There are no specific demands on identical font, color or size of presented text.
Transaction One or more PDU exchanges that collectively are considered logically separate from other PDU exchanges.

4 Introduction

The purpose of this document is to provide test cases for MMS Enabler Release 1.3.

The intention of this test specification is to test conformance and interoperability between MMS implementations on MMS protocol and MMS content level and hence the test cases do not address the specific transport protocols (e.g. WAP 1.2.1 or HTTP).

4.1 Test Objects

Test objects can be the following:

- Client A, which originates messages
- Client B, which receives messages. Client B is a role, not a physical client. There may be several clients taking on the role of Client B in some test cases. Client B may also be an email client.
- MMSC Server, which is forwarding messages from Client A to Client B(s) and/or to Email recipient(s) and Email sender to Client B. During client-to-client testing, the MMSC is not a test object.
- Email recipient, which is a combination of an email server and an email program. These are used to receive messages. Email recipient is a role, not a physical client. There may be several clients taking on the role of email recipient in some test cases.
- Email sender, which is a combination of an email server and an email program. These are used to originate messages.

Each separate test case specifies the test objects for that test case.

4.2 Test case selection

The tests associated with mandatory and optional features are selected based on the appropriate EICS (Enabler Implementation Conformance Statement). If a feature is marked as supported, the corresponding test cases MUST be included. Selection of the conformance test cases is performed as follows:

Client testing

1. Select the test cases for the Client in the role of test object Client A (Originating messages)
2. Select the test cases for the Client in the role of test object Client B (Terminating messages)
3. The total test scope for the Client is defined as the sum of steps 1 and 2 above.

Server testing

1. Select the test cases for the test object MMSC.

4.3 Test procedures

4.3.1 Test case execution

Test cases marked as applicable are executed in the order of the test report. Testing of the test object is deemed completed when all applicable test cases in the test report have been executed and the result of each test case has been recorded.
4.3.2 Addressing

- MSISDN numbers are used to identify clients. The international format for these numbers is always used, i.e. +1 234 567890
- Email addressing [RFC 2822] is used to identify email recipients. The address is on the format: Id@domain.

4.3.3 Reference Content

Reference content is specified text, video, audio and images and other content used in test cases. Reference content shall be made available with the Enabler Test Specification. Many test cases have specified the content file to be used.

When a client supports loading of such content and subsequent use of it in MMs, this content SHALL be used.

In case client does not support loading of content and subsequent use of it in MMS, alternative means of populating the test case MAY be used. If such content is used, it should be retained and made available with the test report.

Content should be pre-loaded into clients and email recipients beforehand. Optionally, the reference content can be provided by an external media, e.g. CD or a server.

4.4 General

Conformance tests only have one object under test. Even though the test cases in the pre-conditions and the test procedures and the pass criteria mention other objects, these can be emulated/simulated in a test tool.

For example in the case where the test object is client A, the terminating client B may be represented by the use of a test tool.

4.4.1 Test Tool

The test cases in this section of the document assume the use of a Test Tool for verification of the Pass Criteria. Test cases are described in a way that there is always only one Test Object. This may act as “Client A” (when sending MMs) or “Client B” (when receiving MMs). The Test Object interacts in the Test Case with the Test Tool in different ways.

For the purposes of this document, the concept of a “Test Tool” may have different meanings. The criteria for the stringency of the Test Tool may vary depending on where the results of tests will be used.

The following is a non-exhaustive list of possible “Test Tool set-ups”:

1. Single Test Tool, which emulates an MMSC and either Client A or Client B.
2. Multiple test tools, one emulating the MMSC and one emulating either Client A or Client B
3. Real MMSC, including functions to analyse incoming messages. Emulated or real Client A and Client B.
4. Real MMSC, separate analysis tool to analyse incoming messages (e.g. EtherReal). Emulated or real Client A and Client B

When selecting the environment to be the “Test Tool” in a given situation, it is important to realise the different observation points in the different test cases and assess the “test Tool’s” ability to produce a stable verdict of the Test Case.

Note however, that the Points of Control and Observation (PCOs) should be unambiguously defined for the Conformance Tests. The PCOs should not be left as implementation dependent. For MMS Client Conformance Test Cases there should (and need) be only two PCOs defined covering all test cases:

1. At the control/display interface of the MMS Client Under Test
2. At the MMS(M) interface of the MMSC, as defined in section 5 of the OMA MMS Architecture document [MMSARCH].
Furthermore, since clause 4 of this document states that:
"The intention of this test specification is to test conformance and interoperability between MMS implementations on
MMS protocol and MMS content level and hence the test cases do not address the specific transport protocols (e.g.
WAP 1.2.1 or HTTP)."

### 4.4.2 Initial Conditions

In order to better facilitate repeatability of conformance test results each separate conformance test should start with the
Test Object in a defined state.

The test case pre-amble for each of the client conformance test cases should establish the required initial state of the
Test Object. Unless specified otherwise in the individual test case description the initial condition for all client
conformance test cases is:

1. MM inbox empty
2. SMS inbox empty
5 CLIENT TEST CASES

5.1 CLIENT SENDING

5.1.1 Message

5.1.1.1 General

5.1.1.1.1 MMS-1.3-con-102 - SMIL layout portrait with text above the image

Test Case Id MMS-1.3-con-102
Test Object Client A
Test Case Description The purpose is to verify that messages with SMIL layouts, here portrait with text above the image, is correctly sent from Client A.
Verification is done by sending the message from Client A to a test tool, which will verify that the SMIL part of the MM sent by Client A contains the appropriate layout information.

Specification Reference [MMSCONF] Chapter 8
SCR Reference MMSCONF-MED-C-025
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-102
Preconditions -Client A
   Capability:
      Ability to create portrait layout with text above the image.

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, use portrait layout, enter text as in file Generic_Text.txt on top and add image file/object JPG80x60.jpg below.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message .
6. Verify the pass criteria below.

Pass Criteria The SMIL part of the MM sent from Client A contains the following layout information:
   Image Top > Text Top
   And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.2  MMS-1.3-con-103 - SMIL layout portrait with text below the image

Test Case Id          MMS-1.3-con-103
Test Object           Client A
Test Case Description The purpose is to verify that messages with SMIL layouts, here portrait with text below the image, is correctly sent from Client A.
Verification is done by sending the message from Client A to a test tool, which will verify that the SMIL part of the MM sent by Client A contains the appropriate layout information.

Specification Reference [MMSCONF] Chapter 8
SCR Reference         MMSCONF-MED-C-025
Tool                  MMS Conformance tool
Test Code             Validated test code for test case MMS-1.3-con-103
Preconditions         -Client A
                      Capability:
                      Ability to create portrait layout with text element below the image.

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, use portrait layout, add image file/object JPG80x60.jpg on top and enter text as in file Generic_Text.txt below.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message .
6. Verify the pass criteria below.

Pass Criteria
The SMIL part of the MM sent from Client A contains the following layout information:
Image Top < Text Top
And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
### 5.1.1.1.3 MMS-1.3-con-104 - SMIL layout landscape with text to the left of the image

</tr>
</tbody>
</table>

#### Test Procedure

1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, use landscape layout, enter text as in file Generic_Text.txt to the left and add image file/object JPG80x60.jpg to the right.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message.

Verify the pass criteria below.

#### Pass Criteria

The SMIL part of the MM sent from Client A contains the following layout information:

Image Left > Text Left

And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.4 MMS-1.3-con-105 - SMIL layout landscape with text to the right of the image

Test Case Id MMS-1.3-con-105

Test Object Client A

Test Case Description The purpose is to verify that messages with SMIL layouts, here landscape with text to the right of the image, is correctly sent from Client A

Verification is done by sending the message from Client A to a test tool, which will verify that the SMIL part of the MM sent by Client A contains the appropriate layout information.

Specification Reference [MMSCONF] Chapter 8

SCR Reference MMSCONF-MED-C-025

Tool MMS Conformance tool

Test Code Validated test code for test case MMS-1.3-con-105

Preconditions -Client A
  Capability:
    Ability to create landscape layout

Test Procedure

1. In Client A, create a new MM.

2. In MM header: To-field is set to any legal address.

3. In MM content: In the message body, use landscape layout, add image file/object JPG80x60.jpg to the left enter text as in file Generic_Text.txt to the right.

4. In Client A, send MM to Test Tool

5. In the Test Tool, accept the message.

Verify the pass criteria below

Pass Criteria The SMIL part of the MM sent from Client A contains the following layout information:

Image Left < Text Left

And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.5 MMS-1.3-con-106 - Multiple objects in same page

Test Case Id      MMS-1.3-con-106
Test Object       Client A
Test Case Description
The purpose is to verify that multiple objects (one image, one text and one audio file) are correctly sent from Client A
Verification is done by sending the message from Client A to a test tool, which will verify that three objects of the correct type are present in the MM sent by Client A.

MMSCONF-MED-C-023, MMSCONF-MED-C-013

Tool
MMS Conformance tool

Test Code
Validated test code for test case MMS-1.3-con-106

Preconditions
-Client A
  Capability:

    Ability to create a page with multiple objects

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, create one page and enter the text “Hello World”, add the image JPG80x60.jpg file/object and add the file/object Audio1NB.amr.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria
The MM sent by Client A contains exactly 3 media objects and that there is one object of content type text/plain, one object of content type image/jpeg and one object of content type audio/AMR
And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.6 MMS-1.3-con-107 - Multiple pages

Test Case Id: MMS-1.3-con-107
Test Object: Client A
Test Case Description: The purpose is to verify that multiple pages are correctly sent from Client A. Verification is done by sending the message from Client A to a test tool, which will verify that the MM sent from Client A contains as many pages as were specified.

Specification Reference: [MMSCONF] Chapter 7.1.7
SCR Reference: MMSCONF-MED-C-023
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-107

Preconditions:
- Client A
  Capability:
  Ability to create multiple pages

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, create ixit_page_count pages, adding the files/objects images GIF1.gif through GIF10.gif to these pages as applicable, with one image per page.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
The SMIL part of the MM sent by Client A contains ixit_page_count pages and there is one image/gif object per page.
And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.7 MMS-1.3-con-108 - Multiple pages with page timing and time dependent content

Test Case Id MMS-1.3-con-108

Test Object Client A

Test Case Description The purpose is to verify that multiple pages and objects with page timing are correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the SMIL part of the MM sent by Client A contains the right number of pages, with the correct timing values and that the objects for these pages are present in the MM.

Specification Reference [MMSCONF] Chapter 7.1.7

SCR Reference MMSCONF-MED-C-023, MMSCONF-MED-C-013, MMSCONF-MED-C-053

Tool MMS Conformance tool

Test Code Validated test code for test case MMS-1.3-con-108

Preconditions -Client A
   Capability:
      Ability to create multiple pages
      Ability to specify Page Timing for multiple pages
      Ability to specify Page Timing for pages that contain media video or audio files

Test Procedure 1. In Client A, create a new MM.

2. In MM header: To-field is set to any legal address

3. In MM content: In the message body, create the following three pages:
   - Page 1, enter text as in file Generic_Text.txt, add the file/object JPEG80x60.jpg, add the file/object 20sec_audio.amr or 20sec_audio.qcp and specify a page timing to ixit_8sec_page_timing seconds.
   - Page 2, enter the text as in file Text_us-ascii.txt, add the file/object GIF80x60.gif, add the file/object (either audio2NB.amr or audio2.qcp) and specify page timing to ixit_8sec_page_timing seconds.
   - Page 3, enter the text Generic_Text.txt, add the file/object WBMP_80x60.wbmp, add the file/object 20sec_audio.amr or 20sec_audio.qcp and specify page timing to ixit_8sec_page_timing seconds.

3. In Client A, send MM to the Test Tool.

4. In the Test Tool, accept the message

5. Verify the pass criteria below.

Pass Criteria The SMIL part of the MM sent by Client A contains 3 pages and that the page timing for all the pages is set to ixit_8sec_page_timing seconds

Page 1 contains JPEG80x60.jpg and 20sec_audio.amr/20sec_audio.qcp

Page 2 contains GIF80x60.gif and audio3NB.amr/audio3.qcp

Page 3 contains WBMP_80x60.wbmp and 20sec_audio.amr/20sec_audio.qcp

And the SMIL content of the MM received from Client A is valid “MMS
SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.8 MMS-1.3-con-109 - Multiple pages with page timing

Test Case Id: MMS-1.3-con-109
Test Object: Client A

Test Case Description: The purpose is to verify that messages with different SMIL page timing are sent correctly from Client A. This message contains 4 different pages and page times:
- Page 1 with page timing `ixit_min_page_time`
- Page 2 with 5 seconds page timing
- Page 3 with page time `ixit_max_page_time`
- Page 4 with no page timing

Note: Since the last page of a SMIL presentation can be shown indefinitely on a client until further actions, this fourth page is only used to permit the period of time that page 3 is displayed to be determined.

Verification is done by sending the message from Client A to a test tool, which will verify that the number of pages is correct and that the timing values exist in the message.

Specification Reference: [MMSCONF] Chapter 7.1.7
SCR Reference: MMSCONF-MED-C-023
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-109

Preconditions:
- Client A
  Capability: Ability to specify different SMIL page timings and support multiple pages with images

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, create the following four pages:
   - Page 1, enter the text “Page 1” and specify timing to `ixit_min_page_time`.
   - Page 2, add the file/object JPG80x60.jpg and specify timing to 5 seconds.
   - Page 3, enter the text “Page 3” and specify timing to `ixit_max_page_time`.
   - Page 4, add the file/object JPG80x60.jpg.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message
6. Verify the pass criteria below.

Pass Criteria: The SMIL part of the MM sent by Client A contains 4 pages and the page timing is set to `ixit_min_page_time`, 5 and `ixit_max_page_time` respectively for pages 1, 2 and 3. The text or image content of pages 1, 2 and 3 shall be as defined in the test procedure above.

And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.9 MMS-1.3-con-111 - Subject field with UTF8 encoding

Test Case Id: MMS-1.3-con-111

Test Object: Client A

Test Case Description: The purpose is to verify that a subject field encoded in UTF-8 is correctly sent from Client A. Verification is done by sending the message from Client A to a test tool, which will verify that the text entered is correctly encoded in the MM sent by Client A.

Specification Reference: MMSENC Table 1, Table 3, Table 5

SCR Reference: MMSE-C-025, MMSE-C-046, MMSE-C-067

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-111

Preconditions: Client A
- Capability: UTF-8 charset encoding of Subject field

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM header: Subject-field is set to the character string given in the reference content file “Short_Text_UTF-8.txt” and the encoding is set to UTF-8. (Alternative characters may be substituted where necessary as described in the reference content document “Content used in OMA MMS tests.doc”).
4. In MM content: In the message text part, enter the text “Hello World”.
5. In Client A, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria: The MM sent by Client A contains a “Subject” header field containing the entered text correctly encoded in UTF-8.
5.1.1.1.10 MMS-1.3-con-171 - Long Subject field

Test Case Id MMS-1.3-con-171
Test Object Client A
Test Case Description The purpose is to verify that a Client will not send multimedia message with a Subject-field longer than 40 characters.
Specification Reference [MMSCONF] Chapter 10.2.5
SCR Reference MMSCONF- GEN-C-003
Tool MMS Conformance Tool
Test Code Validated test code for test case MMS-1.3-con-171
Preconditions
Test Procedure 1. In Client A, create a new MM.
2. In MM header: Enter $ixit_max_subject_len$ characters of the following 41 characters to the subject field, “abcdefghijklmnopqrstuvwxyz0123456789/-+@?”
3. In MM content: In the message text part, enter the text “Hello World”.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.
Pass Criteria The M-Send.req PDU sent by Client A contains a “Subject” header field containing $ixit_max_subject_len$ characters, being a subset of the characters specified in the Test Procedure.
5.1.1.1.11 MMS-1.3-con-161 - Send MMS message without defining the <par> dur value

Test Case Id: MMS-1.3-con-161
Test Object: Client A

Test Case Description:
The purpose is to verify that Client will set the dur attribute to the same value as the duration of the media object contained in the slide presentation.

Verification is done by sending the message from Client A to a test tool, which will verify that the Client is able to support the appropriate <par> dur attribute.

Specification Reference: [MMSCONF] Chapter 8.1.2
SCR Reference: MMSCONF-MED-C-052
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-161

Preconditions

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address
3. In MM content: Add to the first slide of the message the audio file/object 30k_basic_AMR.amr (45 seconds long). Add to the second slide only the file Text_us-ascii.txt
4. In Client A, send MM to the Test Tool
5. In the Test Tool, accept the message.

Pass Criteria:
Client A has successfully created the message, the message sent by the client was accepted by the Test Tool and the dur attribute within the SMIL header is set to 45 sec.
And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.1.1.12 MMS-1.3-con-162 - Send MMS message with user specific <par> dur value

Test Case Id: MMS-1.3-con-162
Test Object: Client A
Test Case Description: The purpose is to verify that Client will accept to set the dur attribute to a user specific value.
Verification is done by sending the message from Client A to a test tool, which will verify that the Client is able to support the appropriate <par> dur attribute.

Specification Reference: [MMSCONF] Chapter 8.1.2
SCR Reference: MMSCONF-MED-C-053
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-162

Preconditions:

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address
3. In MM content: Add to the first slide audio file/object Audio3NB.amr (10 seconds long) and specify timing to 20 seconds or client maximum. Add to the second slide only Text_us-ascii.txt
4. In Client A, send MM to the Test Tool
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
Client A has successfully created the message, the message sent by the client was accepted by the Test Tool and the dur attribute within the SMIL header is set to 20 seconds or client maximum.

And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.

                  5. In the Test Tool, accept the message.  
                  6. Verify the pass criteria below. |
| Pass Criteria | The MM sent by Client A contains a text part containing the entered text correctly encoded in USASCII.  
                  The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related if a presentation part is present or the MM PDU content type is set to application/vnd.wap.multipart.mixed if the MM does not contain a presentation part. |
5.1.2.1.2 MMS-1.3-con-113 - Text with UTF-8 encoding

Test Case Id
MMS-1.3-con-113

Test Object
Client A

Test Case Description
The purpose is to verify that a text object with UTF-8 encoding is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the text entered is correctly encoded in the MM sent by Client A.

Specification Reference
[MMSCONF] Chapter 7.1.8

SCR Reference
MMSCONF-MED-C-003, MMSE-C-033

Tool
MMS Conformance tool

Test Code
Validated test code for test case MMS-1.3-con-113

Preconditions
- Client A
  - Support of UTF-8 charset encoding
  - Supports utf-8 (IANA MIBenum 106) [Unicode] encoding when creating messages

Test Procedure
1. In Client A, create a new MM. If supported by the Client create the MM without a presentation part.

2. In MM header: To-field is set to any legal address.

3. In MM content: In the message body, enter text as in file Text_UTF-8.txt. (Alternative characters may be substituted where necessary as described in the reference content document “Content used in OMA MMS tests.doc”)

4. In Client A, send MM to the Test Tool.

5. In the Test Tool, accept the message.

6. Verify the pass criteria below.

Pass Criteria
The MM sent by Client A contains a text part containing the entered text correctly encoded in UTF-8.

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related if a presentation part is present or the MM PDU content type is set to application/vnd.wap.multipart.mixed if the MM does not contain a presentation part.
5.1.2.2 Image

5.1.2.2.1 MMS-1.3-con-116 - JPG Image size 160x120

Test Case Id: MMS-1.3-con-116
Test Object: Client A
Test Case Description: The purpose is to verify that a JPG image of the size 160x120 is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the image file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7
SCR Reference: MMSCONF-MED-C-007, MMSE-C-033
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-116
Preconditions: -Client A

Test Procedure:
6. In Client A, create a new MM.
7. In MM header: To-field is set to any legal address
8. In MM content: Add image file/object JPG160x120.jpg to the message.
9. In Client A, send MM to the Test Tool
10. In the Test Tool, accept the message.
11. Verify the pass criteria below.

Pass Criteria:
3GPP Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/jpeg and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/jpeg and this shall contain the complete contents of the image file.
5.1.2.2.2 MMS-1.3-con-118 - JPG Image size 640x480

Test Case Id MMS-1.3-con-118

Test Object Client A

Test Case Description The purpose is to verify that a JPG image of the size 640x480 is correctly sent from Client A. Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the image file is included in its entirety in the MM sent by Client A.

Specification Reference [MMSCONF] Chapter 7

SCR Reference MMSCONF-MED-C-007, MMSE-C-033

Tool MMS Conformance tool

Test Code Validated test code for test case MMS-1.3-con-118

Preconditions -Client A
Capability:
  Content class greater than Image Basic class

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address
3. In MM content: Add image file/object JPG640x480.jpg to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

PassCriteria 3GPP Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/jpeg and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/jpeg and this shall contain the complete contents of the image file.

#### Test Procedure

1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add image file/object GIF87a160x120.gif to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

#### Pass Criteria

**3GPP Client:**

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/gif and contain the complete contents of the image file. A part with content type application/smil shall also be present.

**3GPP2 Client:**

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/gif and this shall contain the complete contents of the image file.
5.1.2.2.4 MMS-1.3-con-122 - GIF Image size 640x480

Test Case Id: MMS-1.3-con-122

Test Object: Client A

Test Case Description: The purpose is to verify that a GIF87a image of the size 640x480 is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the image file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7

SCR Reference: MMSCONF-MED-C-009, MMSE-C-033

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-122

Preconditions: - Client A
  Capability:
  Content class greater than Image Basic class

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add image file/object GIF87a640x480.gif to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
3GPP Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/gif and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/gif and this shall contain the complete contents of the image file.
5.1.2.2.5 MMS-1.3-con-124 - Animated GIF Image size 160x120

Test Case Id: MMS-1.3-con-124

Test Object: Client A

Test Case Description: The purpose is to verify that an animated GIF89a image of the size 160x120 is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the image file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7

SCR Reference: MMSCONF-MED-C-010, MMSE-C-033

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-124

Preconditions:

Test Procedure:

1. In Client A, create a new MM.

2. In MM header: To-field is set to any legal address.

3. In MM content: Add image file/object AnimatedGIF89a_160x120.gif to the message.

4. In Client A, send MM to the Test Tool.

5. In the Test Tool, accept the message.

6. Verify the pass criteria below.

Pass Criteria:

3GPP Client:

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/gif and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/gif and this shall contain the complete contents of the image file.

### Test Procedure

1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add image file/object AnimatedGIF89a_640x480.gif to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

### Pass Criteria

3GPP Client:  
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/gif and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:  
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/gif and this shall contain the complete contents of the image file.
5.1.2.2.7 MMS-1.3-con-128 - WBMP Image size 160x120

Test Case Id: MMS-1.3-con-128

Test Object: Client A

Test Case Description: The purpose is to verify that a WBMP image of the size 160x120 is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the image file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7

SCR Reference: MMSCONF-MED-C-011, MMSE-C-033

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-128

Preconditions - Client A

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add image file/object WBMP_160x120.wbmp to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:

3GPP Client:

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/vnd.wap.wbmp and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:

The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/vnd.wap.wbmp and this shall contain the complete contents of the image file.
5.1.2.2.8 MMS-1.3-con-130 - WBMP Image size 640x480

Test Case Id: MMS-1.3-con-130

Test Object: Client A

Test Case Description: The purpose is to verify that a WBMP image of the size 640x480 is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the image file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7

SCR Reference: MMSCONF-MED-C-011, MMSE-C-033

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-130

Preconditions:
- Client A
  Capability:
  - Content class greater than Image Basic class

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add image file/object WBMP_640x480.wbmp to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:

3GPP Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/vnd.wap.wbmp and contain the complete contents of the image file. A part with content type application/smil shall also be present.

3GPP2 Client:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to image/vnd.wap.wbmp and this shall contain the complete contents of the image file.
5.1.2.2.9 MMS-1.3-con-160 - Sending MM with JPEG and Huffman table

Test Case Id
MMS-1.3-con-160

Test Object
Client A

Test Case Description
The purpose is to verify that Client A fully supports creation and submission of an MM with an JPEG including the following Huffman tables:

- 1 AC Luminance Table
- 1 DC Luminance Table
- 1 AC Chrominance Table
- 1 DC Chrominance Table

Verification is done by sending the message from Client A to a test tool which will verify that the above mentioned Huffman tables are all included in the image.

Specification Reference
[MMSCONF] Chapter 7.1.1

SCR Reference
MMS Conformance tool

Test Code
Validated test code for test case MMS-1.3-con-160

Preconditions
--Client B

Support of JPEG with Huffman table

UE has a built in camera

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address
3. In MM content: Take a picture with the built in camera and add it with format image/jpeg to the message.
4. In Client A, send MM to the Test Tool
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/jpeg and contain the complete contents of the image file. A part with content type application/smil shall also be present.

The image within the MM contains the above mentioned Huffman tables.
5.1.2.3 Audio

5.1.2.3.1 MMS-1.3-con-131 - AMR audio NB

Test Case Id: MMS-1.3-con-131

Test Object: Client A

Test Case Description: The purpose is to verify that an AMR audio NB object/content is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the audio file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7

SCR Reference: MMSCONF-MED-C-013, MMSE-C-033

Tool: MMS Conformance Tool

Test Code: Validated test code for test case MMS-1.3-con-131

Preconditions:
- Support for AMR audio NB

Test Procedure:
1. In Client A, create a new MM.

2. In MM header: To-field is set to any legal address.

3. In MM content: Add audio file/object audio1NB.amr to the message and set page timing to allow for the audio1NB.amr file to be played.

4. In Client A, send MM to the Test Tool.

5. In the Test Tool, accept the message.

6. Verify the pass criteria below.

Pass Criteria: The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to audio/amr and contain the complete contents of the audio file. A part with content type application/smil shall also be present.

Test Code:

Preconditions:
- Client A
  Capability
    supports MPEG4 and 13k

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add video file/object (mp4_13k_qcif.3g2) to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.4 MMS-1.3-con-136 - 3GPP2 Video QCIF (MPEG4+AMR)

Test Case Id MMS-1.3-con-136
Test Object Client A
Test Case Description The purpose is to verify that a QCIF video file/object is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

Specification Reference [MMSCONF] Chapter 7
SCR Reference MMSCONF-MED-C-021, MMSE-C-033

Tool
Test Code
Preconditions -Client A
Capability supports MPEG4 and AMR

Test Procedure 1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add video file/object (mp4_amr_qcif.3g2) to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.5 MMS-1.3-con-137 - 3GPP2 Video QCIF (H.263+13k)

Test Case Id: MMS-1.3-con-137

Test Object: Client A

Test Case Description: The purpose is to verify that a QCIF video file/object is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7

SCR Reference: MMSCONF-MED-C-021, MMSE-C-033

Tool

Test Code

Preconditions:
- Client A
  - Capability
    - supports H.263 and 13k

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add video file/object (h263_13k_qcif.3g2) to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria: The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.6 MMS-1.3-con-138 - 3GPP2 Video QCIF (H.263+AMR)

Test Case Id MMS-1.3-con-138

Test Object Client A

Test Case Description The purpose is to verify that a QCIF video file/object is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

Specification Reference [MMSCONF] Chapter 7

SCR Reference MMSCONF-MED-C-021, MMSE-C-033

Tool

Test Code

Preconditions -Client A
  
  Capability
  supports H.263 and AMR

Test Procedure

1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add video file/object (h263_amr_qcif.3g2) to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.7 MMS-1.3-con-139 - 3GPP2 Video sub-QCIF (MPEG4 +13k)

Test Case Id MMS-1.3-con-139

Test Object Client A

Test Case Description The purpose is to verify that a sub-QCIF video file/object is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

Specification Reference [MMSCONF] Chapter 7

SCR Reference MMSCONF-MED-C-021, MMSE-C-033

Tool

Test Code

Preconditions -Client A
    Capability supports MPEG4 and 13k

Test Procedure 1. In Client A, create a new MM.

2. In MM header: To-field is set to any legal address.

3. In MM content: Add video file/object (mp4_13k_sqcif.3g2) to the message.

4. In Client A, send MM to the Test Tool.

5. In the Test Tool, accept the message.

6. Verify the pass criteria below.

Pass Criteria The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.8 MMS-1.3-con-140 - 3GPP2 Video sub-QCIF (MPEG4 +AMR)

Test Case Id: MMS-1.3-con-140
Test Object: Client A
Test Case Description: The purpose is to verify that a sub-QCIF video file/object is correctly sent from Client A. Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7
SCR Reference: MMSCONF-MED-C-021, MMSE-C-033

Tool:
Test Code:

Preconditions:
- Client A supports MPEG4 and AMR

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add video file/object (mp4_amr_sqcif.3g2) to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message
6. Verify the pass criteria below.

Pass Criteria:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.9 MMS-1.3-con-141 - 3GPP2 Video sub-QCIF (H.263 +13k)

Test Case Id                      MMS-1.3-con-141
Test Object                      Client A
Test Case Description          The purpose is to verify that a sub-QCIF video file/object is correctly sent from Client A.
                                Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

                                supports H.263 and 13k
Test Procedure                   1. In Client A, create a new MM.
                                2. In MM header: To-field is set to any legal address.
                                3. In MM content: Add video file/object (h263_13k_sqcif.3g2) to the message.
                                4. In Client A, send MM to the Test Tool.
                                5. In the Test Tool, accept the message.
                                6. Verify the pass criteria below.
Pass Criteria                   The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/smil shall also be present.
5.1.2.4.10 MMS-1.3-con-142 - 3GPP2 Video sub-QCIF (H.263 +AMR)

Test Case Id: MMS-1.3-con-142
Test Object: Client A
Test Case Description: The purpose is to verify that a sub-QCIF video file/object is correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the video file is included in its entirety in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7
SCR Reference: MMSCONF-MED-C-021, MMSE-C-033

Tool: Test Code

Preconditions:
- Client A
  - Capability: supports H.263 and AMR

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: Add video file/object (h263_amr_sqcif.3g2) to the message.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to video/3gpp2 and contain the complete contents of the video file. A part with content type application/xmil shall also be present.

 |                   | Capability:  
 |                   | vCard 2.1 MIP |
| Test Procedure     | 1. In Client A, create a new Address Book entry containing all possible fields of the reference content “John Doe.vcf” as supported by the MMI of Client A  
 |                   | 2. In Client A, create a new MM using the vCard object from the above mentioned address book entry.  
 |                   | 3. In MM header: To-field is set to any legal address.  
 |                   | 4. In Client A, send MM to the Test Tool.  
 |                   | 5. In the Test Tool, accept the message.  
 |                   | 6. Verify the pass criteria below.  
| Pass Criteria      | Test Tool has received the message with vCard object and the message PDU content type is set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed. The MM message content shall contain a part with content type set to text/x-vCard. If itx mms version equals “1.3” the text/x-vCard part shall contain, at least, the following vCard properties:  
 |                   | - N (Name), which shall be textually correct  
 |                   | - VERSION, which shall be set to “2.1”  
 |                   | - Three EMAIL property fields which shall be textually correct  
 |                   | - Three TEL property fields which shall be textually correct. |
5.1.2.5.2 MMS-1.3-con-144 - vCalendar

Test Case Id: MMS-1.3-con-144

Test Object: Client A

Test Case Description: The purpose is to verify that a vCalendar MIP object correctly sent from Client A.

Verification is done by sending the message from Client A to a test tool, which will verify that the Content type is correct and that the vCalendar file is included in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7.1.3

SCR Reference: MMSCONF-MED-C-027, MMSE-C-033

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-144

Preconditions:
- Client A
  Capability: vCalendar 1.0 MIP

Test Procedure:
1. In Client A, create a new Calendar entry containing all possible fields of the reference content “Christmas.vcs” as supported by the MMI of Client A.
2. In Client A, create a new MM using the above mentioned vCalendar object.
3. In MM header: To-field is set to any legal address.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
Test Tool has received the message with vCalendar object and the message PDU content type set to application/vnd.wap.multipart.related or application/vnd.wap.multipart.mixed.

The MM message content shall contain a part with content type set to text/x-vCalendar. If its mms version equals “1.3” the text/x-vCalendar part shall contain, at least, the following vEvent properties:

- VERSION, which shall be set to “1.0” and it shall follow directly after the BEGIN:VCALENDAR property.
- CATEGORIES, which shall be textually correct or set to null (0x00h).
- DESCRIPTION, which shall be textually correct or set to null (0x00h).
- DTEND, which shall be textually correct or set to null (0x00h).
- RRULE, which shall be textually correct or set to null (0x00h).
- DTSTART, which shall be textually correct or set to null (0x00h).
5.1.2.6 Megapixel

5.1.2.6.1 MMS-1.3-con-157 - Full conformance to mega pixel class – creation and submission of single object

Test Case Id MMS-1.3-con-157
Test Object Client A
Test Case Description The purpose is to verify that Client A is compliant to “Full conformance to mega pixel class” in creation and submission.

Verification is done by sending the message from Client A to a test tool, which will verify that the Client is able to create and submit a message belonging to the mega pixel class.

Specification Reference [MMSCONF] Chapter 12.1
SCR Reference MMSCONF-CCC-C-017
MMSCONF-MPC-C-001
MMSCONF-MPC-C-002

Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-157
Preconditions --Client A

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address
3. In MM content: Add image file/object JPG1600x1200-550kB.jpg to the message.
4. In Client A, send MM to the Test Tool
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria The MM sent by Client A has the MM PDU content type set to application/vnd.wap.multipart.related. The MM message content shall contain at least two parts in the MIME multipart content. One of these parts shall have content type set to image/jpeg and contain the complete contents of the image file. A part with content type application/xmml shall also be present.
5.1.2.6.2 MMS-1.3-con-158 - Rich Text in megapixel content class

Test Case Id: MMS-1.3-con-158

Test Object: Client A

Test Case Description: The purpose is to verify that a Rich Text object is correctly sent from Client A in an MM of class megapixel.

Verification is done by sending the message from Client A to a test tool, which will verify that the rich text entered is correctly encoded in the MM sent by Client A.

Specification Reference: [MMSCONF] Chapter 7.1.9.2.2

SCR Reference: MMSCONF-RTX-C-003

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-158

 Preconditions:
- Support of megapixel class

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, create the following two pages:
   - Page 1, enter rich text as in file Rich-Text-module-text1.html, add the file/object JPG1600X1200.jpg and specify page timing that will permit assessment of the pass criteria.
   - Page 2, enter rich text as in file Rich-Text-module-lists.html, add the file/object GIF80x60.gif and specify page timing that will permit assessment of the pass criteria.
4. In Client A, send MM to the Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria:
The MM sent by Client A contains two pages, each with a rich text part which validates correctly against the DTD defined in the XHTML Mobile Profile specification.

The rich text part in page 1 contains at least one example of each of the following XHTML MP 1.2 elements from the Structure module:

- body, head, html, title

The rich text part in page 1 contains at least one example of each of the following XHTML MP 1.2 elements from the Text module:

- address, b, div, h1, h3, h6, p, span, strong

The rich text part in page 1 contains at least one example of each of the following XHTML MP 1.2 elements from the Stylesheet module:

- style

The rich text part in page 1 contains at least one example of each of the following XHTML MP 1.2 style properties:
• color
• text-decoration with value underline.

The rich text part in page 2 contains at least one example of each of the following XHTML MP 1.2 elements from the List module;

• dd, dl, dt, li, ol, ul
5.1.2.6.3 MMS-1.3-con-159 - Full conformance to mega pixel class – creation and submission of multiple objects

Test Case Id MMS-1.3-con-159
Test Object Client A
Test Case Description The purpose is to verify that Client A is compliant to “Full conformance to mega pixel class” in creation and submission.
Verification is done by sending the message from Client A to a test tool, which will verify that the Client is able to create and submit a message belonging to the mega pixel class and containing as many pages as were specified.

Specification Reference [MMSCONF] Chapter 12.1
SCR Reference MMSCONF-CCC-C-017
MMSCONF-MPC-C-001
MMSCONF-MPC-C-002

Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-159
Preconditions --Client A
Capability:
Ability to create multiple pages

Test Procedure
1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In MM content: In the message body, create ixit_page_count pages, adding the files/objects images GIF1-40kB.gif through GIF10-40kB.gif to these pages as applicable, with one image per page and Rich-Text-1.html through Rich-Text-10.html with one text part per page.
4. In Client A, send MM to Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria The SMIL part of the MM sent by Client A contains ixit_page_count pages and there is one image/gif object + one XHTML text file per page.
And the SMIL content of the MM received from Client A is valid “MMS SMIL” as defined by the XML Schema for MMS SMIL.
5.1.3 MM Content Domain Independent Services

5.1.3.1 Postcard Service

5.1.3.1.1 Normal Flow

5.1.3.1.2 MMS-1.3-con-153 - Postcard vCard attachment to multiple recipients

**Test Procedure**

1. In Client A, create two new Address Book entries containing only N, Version and ADR fields as in the reference contents “Postcard_John_Doe.vcf and Postcard_Jane_Doe.vcf”
2. In Client A, create a new postcard MM.
3. In MM header: To-field is set to Postcard service address
4. In MM content: add image file/object JPG640X480PC.jpg
5. Add vCard objects from the above mentioned address book entries
6. In Client A, send MM to the Test Tool.
7. In test Tool, accept the MM
8. Verify the pass criteria below.

**Pass Criteria**

Client A has sent a message and the test tool verifies that each of the vCard attachments contain ONLY N, Version and ADR.
5.1.3.1.3 MMS-1.3-con-154 - Postcard vCard attachment to multiple recipients with additional vCard properties

Test Case Id: MMS-1.3-con-154
Test Object: Client A
Test Case Description: The purpose is to verify that a MM is correctly sent to multiple recipients using the MMS Postcard service when each recipient is identified by its own vCard attachments
Specification Reference: [MMSCONF] 17.1
SCR Reference: MMSCONF-PST-C-002
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-154
Preconditions: -Client A
Support of Postcard Service

Test Procedure:
1. In Client A, create two new Address Book entries containing only N, Version and ADR fields as in the reference contents “John_Doe.vcf and Jane_Doe.vcf”
2. In Client A, create a new postcard MM.
3. In MM header: To-field is set to Postcard service address
4. In MM content: add image file/object JPG640X480PC.jpg
5. Add vCard objects from the above mentioned address book entries
6. In Client A, send MM to the Test Tool.
7. In test Tool, accept the MM
8. Verify the pass criteria below (a) or (b)

Pass Criteria:
a) Client A is not allowing the user to send the MM (note: indicating to the user the reason why it can not send the MM)
b) Client A sends a message and the test tool verifies that each of the vCard attachments contain ONLY N, Version and ADR.
5.1.3.1.4 MMS-1.3-con-155 - Postcard X-MMS-GREETINGTEXT

Test Case Id: MMS-1.3-con-155

Test Object: Client A

Test Case Description: The purpose is to verify that in a postcard message the X-MMS-GREETINGTEXT field is used correctly.

Specification Reference: [MMSCONF] 17.2

SCR Reference: MMSCONF-PST-C-004

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-xxx

Preconditions:
- Client A supports Postcard Service

Test Procedure:
1. In Client A, create new Address Book entry containing only N, Version and ADR fields as in the reference content “Postcard_John_Doe.vcf”
2. In Client A, create a new MM.
3. In MM header: To-field is set to Postcard service address
4. In MM content: add image file/object JPG640X480PC.jpg
5. Add vCard object from the above mentioned address book entry
6. Edit a greeting text “Greetings from OMA”
7. In Client A, send MM to the Test Tool
8. In test Tool, accept the MM
9. Verify the pass criteria below.

Pass Criteria: Client A has sent a message and the test tool verifies that the X-MMS-GREETINGTEXT header field is set to “Greetings from OMA”
5.1.3.1.5 Error Flow

5.1.3.1.6 MMS-1.3-con-156 - Postcard vCard attachment with ADR field empty

Test Case Id: MMS-1.3-con-156
Test Object: Client A
Test Case Description: The purpose is to verify that the MMS client does not allow the user to send a MM to a postcard service if the fields N and/or Address are empty.
Specification Reference: [MMSCONF] 17.1
SCR Reference: MMSCONF-PST-C-002
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-155
Preconditions: Support of Postcard Service
Test Procedure:
1. In Client A, create new Address Book entry containing only N, and Version fields as in the reference content “EmptyADRfield.vcf”
2. In Client A, create a new postcard MM.
3. In MM header: To-field is set to Postcard service address
4. In MM content: add image file/object JPG640X480PC.jpg
5. Try to add vCard object from the above created address book entry
6. Verify the pass criteria below.
Pass Criteria: Client A identifies that it is a Postcard service address and does not allow the user to send a MM to the postcard service if one of the fields N and/or Address is empty (note: the terminal should warn the user that one of the fields required of the intended recipient is empty)
5.2 CLIENT RECEIVING

5.2.1 General

5.2.1.1 Preconditions

The client under test is set to immediate retrieval mode unless this feature is not supported, in this case the deferred retrieval mode is utilized.

The MM sent from the Test Tool to Client B in the Test Cases in this section are predefined and stored in the Test Tool, all messages share a common structure, while particular variants are created for the different test cases. The following table shows the common structure. Under each test case, the differences from this structure are specified.

Not all phones may support anonymous messages. A legal value is added to avoid testing the anonymous feature.
5.2.2 Message Structure and Handling

5.2.2.1 Presentation

5.2.2.1.1 MMS-1.3-con-201 - Empty text file

Test Case Id: MMS-1.3-con-201
Test Object: Client B
Test Case Description: The purpose is to verify that a message with subject and empty content is correctly received by Client B and that the received message is reasonably presented, with no error.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: MMSENC Table 3, Table 5
SCR Reference: MMSE-C-046, MMSE-C-067, MMSCTR-FTC-C-001
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-201
Preconditions: --Client B

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message and the received message is reasonably presented.

MM Content specific to this Test Case.

MM Content: MMS Headers: To <address of Client B>
MMS Content: An empty text file
5.2.2.1.2 MMS-1.3-con-202 - SMIL layout portrait with text above the image

Test Case Id: MMS-1.3-con-202
Test Object: Client B
Test Case Description: The purpose is to verify that messages with SMIL layouts, here portrait with text above the image, is correctly received by Client B and that the received message is reasonably presented.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 8
SCR Reference: MMSCONF-MED-C-025
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-202
Preconditions: Client B

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message. A layout is used and both image and text objects are reasonably presented.

MM Content specific to this Test Case:

MMS Content: MMS Headers: To <address of Client B>
MMS Content: Multipart structure with the following sections:
- SMIL: default layout with 1 slide, portrait oriented, Text on top and Image below. 50% image, 50% text.
- Text object: Generic_Text.txt
- Image object: JPG80x60.jpg
### 5.2.2.1.3 MMS-1.3-con-203 - SMIL layout portrait with text below the image

5.2.2.1.4 MMS-1.3-con-204 - SMIL layout landscape with text to the left of the image

Test Case Id: MMS-1.3-con-204
Test Object: Client B
Test Case Description: The purpose is to verify that messages with SMIL layouts, here landscape with text to the left of the image, is correctly received by Client B and that the received message is reasonably presented.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 8
SCR Reference: MMSCONF-MED-C-025
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-204

Preconditions:

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message. A layout is used and both image and text objects are reasonably presented.

MM Content specific to this Test Case:

MM Content:
- MMS Headers: To <address of Client B>
- MMS Content: Multipart structure with the following sections:
  - SMIL: default layout with 1 slide, landscape oriented, Text to the left and Image to the right. 50% image, 50% text.
  - Text object: Generic_Text.txt
  - Image object: JPG80x60.jpg

5.2.2.1.6 MMS-1.3-con-206 - Multiple objects in same page

Test Case Id: MMS-1.3-con-206

Test Object: Client B

Test Case Description: The purpose is to verify that multiple objects (one image, one text and one audio file) are correctly received by Client B and that all contents of the received message are reasonably presented.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 7.1.7

SCR Reference: MMSCONF-MED-C-023

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-206

Preconditions: -Client B

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message and all contents of the received message are reasonably presented in one page.

MM Content specific to this Test Case.

MM Content: MMS Headers: To <address of Client B>

MMS Content: Multipart structure with the following sections:
- SMIL: add reference to Audio object
- Text object: “Hello World” (ASCII encoded)
- Image object: JPG80x60.jpg
- Audio object: audio1NB.amr
### 5.2.2.1.7 MMS-1.3-con-207 - Multiple pages

5.2.2.1.8 MMS-1.3-con-208 - Multiple pages with page timing and time dependent content

Test Case Id: MMS-1.3-con-208
Test Object: Client B
Test Case Description: The purpose is to verify that multiple pages and objects with page timing are correctly received by Client B and that all pages and objects are reasonably presented in the correct order. The timing of the pages follows the specified values or client default values.

Note: Since the last page of a SMIL presentation can be shown indefinitely on a client until further actions, a dummy last page is added to the MM so that the period of time that page 3 is displayed can be determined.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 7.1.7
SCR Reference: MMSCONF-MED-C-023
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-208
Preconditions: -Client B

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message and pages 1-3 and their associated objects are reasonably presented in the correct order. The timing of pages 1-3 follows the specified values.

MM Content specific to this Test Case:

MMS Content: Multipart structure with the following sections:
- SMIL: add 2 more pages with same layout.
- Page 1 contains Generic_Text.txt, JPG-80x60.jpg and timing is 3 seconds.
- Page 2 contains Text_us-ascii.txt, GIF_80x60.gif and timing is 5 seconds.
- Page 3 contains Generic_Text.txt, WBMP_80x60.wbmp, audio3NB.amr and timing is 5 seconds
- Page 4 contains Image file JPG_80x60.jpg and timing is set to 5 seconds.
- Text object Generic_Text.txt
- Image object JPG-80x60.jpg
- Text object Text_us-ascii.txt
- Image object GIF80x60.gif
- Image object WBMP80x60.wbmp

To: <address of Client B>
5.2.2.1.9 MMS-1.3-con-209 - Multiple pages with page timing

Test Case Id: MMS-1.3-con-209
Test Object: Client B

Test Case Description: The purpose is to verify that messages with different SMIL page timing can be received and reasonably presented. This message contains 4 different pages and page times:
- Page 1 with page timing 100 ms or ixit_min_page_time.
- Page 2 with 5 seconds page timing.
- Page 3 with page time 20 seconds or ixit_max_page_time.
- Page 4 with 5 seconds page timing.

Note: Since the last page of a SMIL presentation can be shown indefinitely on a client until further actions, this fourth page is only used to permit the period of time that page 3 is displayed to be determined. It is then possible to verify that the timing of page 3 received by Client B is the same that was sent.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 7.1.7
SCR Reference: MMSCONF-MED-C-023
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-209

Preconditions: --Client B

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message and pages 1, 2 and 3 of the received message are reasonably presented. The timing of pages 1, 2 and 3 follows the specified values (100ms, 5secs and 20 secs).

MM Content specific to this Test Case:

MM Content: MMS Headers: To <address of Client B>

MMS Content: Multipart structure with the following sections:
- SMIL: add 3 more pages with same layout. Page 1 contains “Page 1”, and timing is 100 milliseconds or ixit_min_page_time. Page 2 contains Image file JPG-80x60.jpg and timing is 5 seconds. Page 3 contains “Page 3”, and timing is 20 seconds or ixit_max_page_time. Page 4 contains Image file JPG_80x60.jpg and timing is set to 5 seconds.
- Text object “Page 1” (ASCII encoding)
- Image object JPG80x60.jpg
- Text object “Page 3” (ASCII encoding)
5.2.2.1.10 MMS-1.3-con-276 - Support of 3GPP PSS6 SMIL Language Profile – Attributes and values supported

Test Case Id MMS-1.3-con-276
Test Object Client B
Test Case Description The purpose is to verify that a client is able to recognise a presentation part of PSS SMIL Profile as a valid document and is able to handle it correctly.
Specification Reference [MMSCONF] 7.1.8

5.2.2.2 Header Field Handling

5.2.2.2.1 MMS-1.3-con-210 - Long Content-Location field

Test Case Id       MMS-1.3-con-210
Test Object       Client B
Test Case Description The purpose is to verify that a message, where the SMIL part references an object using a long Content-Location field, is correctly received by Client B and that the image is reasonably presented.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference [MMSCONF] Chapters 10.2.2, 10.2.4
SCR Reference MMSCONF- GEN-C-003
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-210
Preconditions - Client B

Test Procedure 1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria Client B has received the message and the image is reasonably presented.

MM Content specific to this Test Case.

MM Content: MMS Headers: To <address of Client B>
MMS Content: Multipart structure with the following sections:
  - SMIL: The image reference (“src” attribute value) is set to the same long file name string used for the gif image below.
  - Image object part: The Content-Location field of the MIME multipart header is set to:
"Long_file_name_for_gif_image_60X80_with_non_ASCII_characters_ooo_Length_is_93_characters.gif"
5.2.2.2 MMS-1.3-con-211 - Subject field with UTF8 encoding

Test Case Id: MMS-1.3-con-211

Test Object: Client B

Test Case Description: The purpose is to verify that a subject field encoded in UTF-8 is correctly received by Client B and that the message subject displayed is textually correct.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: MMSENC Table 1, Table 3, Table 5

SCR Reference: MMSE-C-025, MMSE-C-046, MMSE-C-067

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-211

Preconditions:
- Client B
  - Capability
    - Subject field UTF-8 encoding

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve and display the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message and the message subject associated with the MM itself (not the MM notification) when displayed is textually correct.

MM Content specific to this Test Case:

MM Content: MMS Headers:
- To <address of Client B>
- Subject Character string as given in reference content file “Short_Text_UTF-8.txt in UTF-8 encoding without BOM (UTF-8 signature mark).

MMS Content:
- SMIL: no change
- Text Object: “Hello World” (ASCII encoded)
5.2.2.2.3 MMS-1.3-con-271 - Long Subject field

Test Case Id: MMS-1.3-con-271

Test Object: Client B

Test Case Description: The purpose is to verify that a maximum length subject field is correctly received and displayed by Client B in both the M-Notification.ind PDU and the M-Retrieve.conf PDU.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 10.2.5

SCR Reference: MMSCONF- GEN-C-003

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-271

Preconditions: Client B

Test Procedure:
1. Set retrieval mode to deferred in client B
2. In Test Tool, send notification for an MM to Client B.
3. In Client B receive MM notification and if applicable display Subject field and verify section a. of pass criteria.
4. In Client B, initiate download of MM, receive and open the MM.
5. Verify section b. of the pass criteria below.

Pass Criteria:

a. Client B has received the MM notification and if applicable the subject associated with the MM notification when displayed is textually correct.

b. Client B has received and opened the MM and the message subject associated with the MM itself when displayed is textually correct.

MM Content specific to this Test Case.

MM Content: MMS Headers: To: <address of Client B>

Subject: "abcdefghijklmnopqrstuvwxyz0123456789/-+@"
in us-ascii encoding

MMS Content:

– SMIL: no change
– Text Object: “Hello World” (ASCII encoded)
5.2.2.2.4 MMS-1.3-con-272 - Long X-Mms-Content-Location field in Notification

Test Case Id MMS-1.3-con-272
Test Object Client B
Test Case Description The purpose is to verify that a multimedia message, where the X-Mms-Content-Location field in the M-Notification-ind PDU has a length equal to the maximum permitted value, is correctly received by Client B and that the MM is reasonably presented.

Verification is done by sending a Notification PDU from a Test Tool to Client B and then observe how the multimedia message is retrieved and presented.

Specification Reference [MMSCONF] Chapter 10.2.5
SCR Reference MMSCONF- GEN-C-003
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-272
Preconditions -Client B
Test Procedure 1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.
Pass Criteria Client B has retrieved the multimedia message and it is reasonably presented.

MMS PDU Content specific to this Test Case.

| M-Notification-ind Headers: X-Mms-Content-Location | A URI format text string having a length of 100 characters. The URI value itself will be Test Tool dependent, but the length must be 100 characters in total. |

5.2.3.5 Attachment

5.2.3.5.1 MMS-1.3-con-243 - vCard

Test Case Id MMS-1.3-con-243
Test Object Client B
Test Case Description The purpose is to verify that a vCard MIP object can be correctly received by Client B and that the received vCard as displayed is textually correct.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference [MMSCONF] Chapter 7.1.3
SCR Reference MMSCONF-MED-C-016, MMSE-C-072
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-243
Preconditions --Client B
Capability:
vCard 2.1 MIP

Test Procedure
1. In Test Tool, send two MM notifications to Client B.
2. In Client B, receive the MM notifications and retrieve MM#1 and MM#2.
3. Verify the pass criteria below.

Pass Criteria
Client B has received and parsed both messages. Client B has registered the supported properties from the messages. If $\operatorname{if} \text{mms version equals } “1.3”$ the registered vCard entry derived from each of the messages shall contain fields which correspond to the following message properties and the fields are textually correct:

- N (Name) property field
- Three EMAIL property fields
- Three TEL property fields.

Message #1
MM Content specific to this Test Case.

Test Case Description The purpose is to verify that a MM belonging to the content basic class is correctly received by Client B and that the message is reasonably presented.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference [MMSCONF] Chapter 7
SCR Reference MMSCONF-CBC-C-001, MMSCONF-CBC-C-002, MMSCONF-RTX-C-006, MMSE-C-072

Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-250

Preconditions --Client B
Capability to receive content basic class messages

Test Procedure 1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria Client B has received the message and all pages with the content belonging to content basic class are reasonably presented.

MM Content specific to this Test Case.

MM Content: MMS Headers: To <address of Client B>
MMS Content: Multi-part structure with the following sections:
- 1st SMIL page (4 sec)
  o Rich-text.html
  o JPG640x480.jpg
- 2nd SMIL page (8 sec)
  o AnimatedGIF89a_640X480.gif
  o Text_UTF-8.txt
  o audio.mid
- 3rd SMIL page (13 sec)
  o WBMP640x480.wbmp
  o Text_us-ascii.txt
  o audio1NB.amr
5.2.4.1.2 MMS-1.3-con-252 – Rich Text in Content Basic content class

Test Case Id: MMS-1.3-con-252

Test Object: Client B

Test Case Description: The purpose is to verify that a MM belonging to the content basic class, containing the mandatory supported features of Rich Text, is correctly received by Client B and that the message is reasonably presented.

Verification is done by sending the message from a Test Tool to Client B, and observe how the message is presented.

Specification Reference: [MMSCONF] Chapter 7.1.9.2

SCR Reference: MMSCONF-RTX-C-002

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-252

Preconditions: --Client B

   Capability to receive content basic class messages

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has received the message and all pages with the content belonging to content basic class are reasonably presented.

                     Creation Mode set to Restricted |
| Test Procedure    | 1. From the test tool send an MM to Client A with a message containing the image JPG1650X1238.jpg so that image resolution is greater than the maximum allowed in the core domain in RESTRICTED mode.  
                     2. In Client A, receive the MM notification and retrieve the MM.  
                     3. Client A: Try to forward this message  
                     4. Verify the pass criteria below. |
| Pass Criteria     | Client A refuses to forward the message. |
5.3.1.6 MMS-1.3-con-306 - Creation mode - Restricted - forwarding non conformant content

Test Case Id MMS-1.3-con-306
Test Object Client A
Test Case Description The purpose is to verify that a message containing non conformant content is refused to be forwarded when Client A is in RESTRICTED mode.

Verification is done by sending an MM to Client A, with one or more arbitrarily selected content, files not belonging to the core domain, and observe if this MM is possible to forward or not.

Specification Reference [MMSCONF] Chapter 12
SCR Reference MMSCONF-CMO-C-002
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-306
Preconditions -Client A
Setting:
Creation Mode set to Restricted

Test Procedure 1. From the test tool send an MM to Client A with a message containing content that is not allowed in the core domain (song.wav, song.mp3, Song.imy or image.png).
2. In Client A, receive the MM notification and retrieve the MM.
3. Client A: Try to forward this message.
4. Verify the pass criteria below.

Pass Criteria Client A refuses to forward the message.
5.3.2 Content Adaptation

5.3.2.1 MMS-1.3-con-310 - Ability to reduce in size any image taken by the integrated camera to fit into an MM of the Core MM Content Domain

Test Case Id: MMS-1.3-con-310
Test Object: Client A
Test Case Description: The purpose of this test is to verify that the terminal is able to reduce in size the picture taken by the integrated camera such that it fits into a MM of the Core MM Content Domain.
Specification Reference: [MMSCONF] 9.5.1
SCR Reference: missing
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-310
Preconditions:
- Client A camera integrated into the terminal
- maximum message size supported is lower than size of picture taken with highest resolution
Test Procedure:
1. In Client A, take a picture with the camera integrated in the terminal with the highest resolution
2. In client A, send this picture to the test tool via MMS
3. Verify the pass criteria below
Pass Criteria: Test tool verifies that the image in the MM received is compliant with the Core MM Domain.
5.4 CLIENT TRANSACTION

5.4.1 Message Delivery Status Report

5.4.1.1 MMS-1.3-con-601 - Delivery report – Retrieved message

<td>Delivery report request</td>
</tr>
</tbody>
</table>

**Test Procedure**

1. In Client A, create a new MM.
2. In MM header: set Delivery Report Request-Field to ON.
3. In MM header: To-field is set to a legal address
4. In MM content: In the message text part, enter the text “Hello World”.
5. In Client A, send MM to Test Tool.
6. In test Tool, accept the MM and send Delivery Report back to Client A
7. Verify the pass criteria below.

**Pass Criteria**

Client A has sent a message with the correct request for Delivery Report. If Client A is able to display delivery report notification through the MMI, ensure that it has done so and that the retrieved status has been appropriately indicated. If client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

X-Mms-Status
5.4.1.4 MMS-1.3-con-604 - Delivery report – Multiple recipients each with Different Delivery Status

Test Case Id: MMS-1.3-con-604

Test Object: Client A

Test Case Description: The purpose is to verify that if a message with a request for a delivery report from Client A is sent to multiple recipients then the originator (Client A) can receive and display a separate delivery report for each recipient, with the correct Delivery Status for each recipient after message delivery or message delivery attempt (in the case of Expired Status) to each separate recipient.

Veriﬁcation is done by sending the message from Client A to a test tool, requesting a Delivery report. Veriﬁcation of the reception of multiple Delivery Reports is done by sending several delivery reports from a Test Tool back to Client A, and observe client behaviour upon reception.

Preconditions - Client A

Capability: Delivery report request

Test Procedure:

1. In Client A, create a new MM.
2. In MM header: set Delivery Report Request-Field to ON.
3. In MM header: To-field is set to: a sequence of four legal addresses
4. In MM content: In the message text part, enter the text “Hello World”.
5. In Client A, send MM to Test Tool. NOTE: Each Client B will generate a different MM Delivery Status.
6. In Test Tool accept the MM.
7. In the Test Tool send 1st Delivery report back to Client A, reporting the first addressee received the MM.
8. In the Test Tool send 2nd Delivery report back to Client A, reporting the second addressee received the MM.
9. In the Test Tool send 3rd Delivery report back to Client A, reporting the third addressee rejected the MM.
10. In the Test Tool send 4th Delivery report back to Client A, reporting the fourth addressee did not receive the MM before it expired.

In Client A, wait until all 4 delivery reports have arrived

Verify the pass criteria below.

Pass Criteria: Client A has received a separate delivery report for each recipient, with the correct Delivery Status for each recipient after message delivery or message delivery attempt.
delivery attempt (in the case of Expired Status) to each separate recipient.

If Client A is able to display delivery report notification through the MMI, ensure that is has done so and that the retrieved status has been appropriately indicated. If client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

5.4.1.5 MMS-1.3-con-620 - Delivery report – Interpreting Message-ID field

Test Case Id: MMS-1.3-con-620

Test Object: Client A

Test Case Description: The purpose is to verify that the originator of multiple MMs can correctly utilise the Message-ID field to associate received Delivery Reports with their respective MMs.

Specification Reference:
- [MMSENC] Chapter 6.1.2 Table 2 and Chapter 6.6 Table 9
- [MMSCTR] Chapter 6.1.1 and Chapter 6.5.1

SCR Reference:
- MMSE-C-039, MMSE-C-087, MMSCTR-SND-C-003, MMSCTR-DRP-C-002

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-617

Preconditions:

- Client A
  - Capability:
    - Delivery report request
    - Support for interpreting Message-ID field
    - Display of Delivery Report

Test Procedure:

1. In Client A, create a new MM (Message1); set the Delivery Report request field to ON; set the To field to a legal address; and in the message text part enter the text “Hello World – Retrieved”.

2. In Client A, send the MM to the Test Tool.

3. In the Test Tool, accept the MM and send an M-Send.conf PDU to Client A with the Message-ID field set to “retrieved@mmsc”.

4. In Client A, create a new MM (Message2); set the Delivery Report request field to ON; set the To field to the same legal address as above; and in the message text part enter the text “Hello World – Rejected”.

5. In Client A, send the MM to the Test Tool.

6. In the Test Tool, accept the MM and send an M-Send.conf PDU to Client A with the Message-ID field set to “rejected@mmsc”.

7. In Client A, create a new MM (Message3); set the Delivery Report request field to ON; set the To field to the same legal address as above; and in the message text part enter the text “Hello World – Expired”.

8. In Client A, send the MM to the Test Tool.

9. In the Test Tool, accept the MM and send an M-Send.conf PDU to Client A with the Message-ID field set to “expired@mmsc”.

10. In the Test Tool, send a Delivery Report in response to the third MM send request received; i.e. in the M-Delivery.ind PDU include the Message-ID field set to “expired@mmsc”.

11. In the Test Tool, send a Delivery Report in response to the first MM send request received; i.e. in the M-Delivery.ind PDU include the Message-ID field set to “retrieved@mmsc”.

12. In the Test Tool, send a Delivery Report in response to the second
MM send request received; i.e. in the M-Delivery.ind PDU include the Message-ID field set to “rejected@mmsc”.

13. In Client A, examine each of the three received Delivery Reports

14. Verify the pass criteria below

**Pass Criteria**

Client A displays the delivery status of Message1 as Retrieved; and Client A displays the delivery status of Message2 as Rejected; and Client A displays the delivery status of Message 3 as Expired.

Send Confirmation Content specific to this Test Case.

5.4.2 Message Read-Reply Status Report

5.4.2.1 MMS-1.3-con-605 - Read-Reply report Date

Test Case Id MMS-1.3-con-605
Test Object Client A
Test Case Description The purpose is to verify that a message with a request for a Read-Reply report is correctly sent from Client A and that Client A is able to receive and reasonably present the Read-Reply report sent from the MMSC.

Verification is done by sending the message from Client A to a test tool, requesting a Read-Reply report. The Test Tool will verify that the request is correct. Verification of the reception of the Read-Reply Report is done by sending a Read-Reply report from a Test Tool back to Client A, and observe client behaviour upon reception.

Specification Reference [MMSENC] Chapter 6.7.1 Table 10, Table 11
SCR Reference MMSCTR-RRP-C-002, MMSCTR-RRP-C-008, MMSE-RDR-C-003
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-605
Preconditions -Client A
   Capability: Read Report request
   Support for PDU Read Reporting functionality

Test Procedure 1. In Client A, create a new MM.
   2. In MM header: Read-Reply Report Request-Field is set to ON.
   3. In MM header: To-field is set to a legal address
   4. In MM content: In the message text part, enter the text “Hello World”.
   5. In Client A, send MM to Test Tool.
   6. In Test Tool, accept MM.
   7. In Test Tool, send a Read-Reply report back to Client A.
   8. In Client A, open the received Read-Reply report.
   9. Verify the pass criteria below.

Pass Criteria Client A has sent an MM with a correct request for Read-Reply Report. Client A has received a Read-Reply report with the date on which the message was read. If Client A is able to display the read reply report message through the MMI, ensure that it has done so and that the retrieved status has been appropriately indicated. If the client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

5.4.2.3 MMS-1.3-con-607 - Read-Reply Report when sending to multiple recipients

Test Case Id: MMS-1.3-con-607
Test Object: Client A

Test Case Description: The purpose is to verify that a message with a request for a Read-Reply report is correctly sent from Client A to multiple recipients and that the originator can receive a separate and correct Read-Reply report from each recipient after the message has been read by each recipient.

Verification is done by sending the message from Client A to a test tool, requesting a Read-Reply report. The Test Tool will verify that the request is correct. Verification of the reception of the Read-Reply Report is done by sending several Read-Reply reports from a Test Tool back to Client A, and observe client behavior upon reception.

Specification Reference: [MMSENC] Chapter 6.7.1 Table 10, Table 11
SCR Reference: MMSE-RDR-C-003, MMSCTR-RRP-C-002, MMSCTR-RRP-C-008
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-607

Preconditions:
- Client A
  Capability: Read Report request
  Support for PDU Read Reporting functionality

Test Procedure:
1. In Client A, create a new MM.
2. In MM header: Read-Reply Report Request-Field is set to ON.
3. In MM header: To-field is set to: a sequence of three legal addresses
4. In MM content: In the message text part, enter the text “Hello World”.
5. In Client A, send MM to Test Tool.
6. In Test Tool accept the MM.
7. In the Test Tool send 1st Read-Reply report back to Client A, reporting that the first addressee deleted the MM without reading it.
8. In the Test Tool send the 2nd and 3rd Read-Reply reports back to Client A, reporting that the MM was read.
9. Verify the pass criteria below.

Pass Criteria:
Client A receives a separate Read-Reply report from 2 recipients that the messages was read, and a Read-Reply report from 1 recipient that the message was deleted without being read. If Client A is able to display read reply report messages through the MMI, ensure that it has done so and that the retrieved status has been appropriately indicated for all recipients. If the client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

5.4.2.5 MMS-1.3-con-621 - Read report – Interpreting Message-ID field

Test Case Id: MMS-1.3-con-621
Test Object: Client A
Test Case Description: The purpose is to verify that the originator of multiple MMs can correctly utilise the Message-ID field to associate received Read Reports with their respective MMs.

Specification Reference: [MMSENC] Chapter 6.1.2 Table 2 and Chapter 6.7 Table 11
[MMSCTR] Chapter 6.1.1 and Chapter 6.6

SCR Reference: MMSE-C-037, MMSE-RDR-C-006, MMSCTR-SND-C-003, MMSCTR-RRP-C-008

Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-621

Preconditions:
- Client A
  - Capability:
    - Ability to request Read Reports
    - Ability to handle Read Reports in the form of PDUs
    - Support for interpreting Message-ID field

Test Procedure:
1. In Client A, create a new MM (Message1); set the Read Report request field to ON; set the To field to a legal address; and in the message text part enter the text “Hello World – Read1”.
2. In Client A, send the MM to the Test Tool.
3. In the Test Tool, accept the MM and send an M-Send.conf PDU to Client A with the Message-ID field set to “read1@mmsc”.
4. In Client A, create a new MM (Message2); set the Read Report request field to ON; set the To field to the same legal address as above; and in the message text part enter the text “Hello World – deleted”.
5. In Client A, send the MM to the Test Tool.
6. In the Test Tool, accept the MM and send an M-Send.conf PDU to Client A with the Message-ID field set to “deleted@mmsc”.
7. In Client A, create a new MM (Message3); set the Read Report request field to ON; set the To field to the same legal address as above; and in the message text part enter the text “Hello World – Read2”.
8. In Client A, send the MM to the Test Tool.
9. In the Test Tool, accept the MM and send an M-Send.conf PDU to Client A with the Message-ID field set to “read2@mmsc”.
10. In the Test Tool, send a Read Report in response to the third MM send request received; i.e. in the M-Read-orig.ind PDU include the Message-ID field set to “read2@mmsc”.
11. In the Test Tool, send a Read Report in response to the first MM send request received; i.e. in the M-Read-orig.ind PDU include the Message-ID field set to “read1@mmsc”.

© 2008 Open Mobile Alliance Ltd. All Rights Reserved.
Used with the permission of the Open Mobile Alliance Ltd. under the terms as stated in this document.
12. In the Test Tool, send a Read Report in response to the second MM send request received; i.e. in the M-Read-orig.ind PDU include the Message-ID field set to “deleted@mmsc”.

13. In Client A, examine each of the three received Read Reports

14. Verify the pass criteria below

Pass Criteria

Client A displays the read status of Message1 as Read; and Client A displays the read status of Message2 as Deleted; and Client A displays the read status of Message 3 as Read.

Send Confirmation Content specific to this Test Case.

Step 3

PDU Content: MMS Headers:

X-Mms-Message-Type m-send-conf
X-Mms-Transaction-ID <same as in the M-Send.req PDU from Client A>
X-Mms-MMS-Version 1.3
X-Mms-Response-Status Ok
Message-ID “read1@mmsc”

Step 6

PDU Content: MMS Headers:

X-Mms-Message-Type m-send-conf
X-Mms-Transaction-ID <same as in the M-Send.req PDU from Client A>
X-Mms-MMS-Version 1.3
X-Mms-Response-Status Ok

5.4.3 Forwarding

5.4.3.1 MMS-1.3-con-611 - Forward without Prior retrieval

Test Case Id: MMS-1.3-con-611
Test Object: Client B
Test Case Description: The purpose is to verify that a message can be forwarded without prior retrieval. Verification is done by sending a notification from a Test Tool to Client B. Client B then sends a forwarding message to the Test Tool. The Test Tool verifies that this message is correct.

Specification Reference: [MMSENCE] Chapter 6.5 Table 5
SCR Reference: MMSCTR-FWD-C-002
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-611
Preconditions: Client B
   Capability:
      Deferred Retrieval mode
      Forwarding without prior retrieval
Test Procedure:
1. Set retrieval mode to deferred in client B
2. In Test Tool, send notification for an MM to Client B.
3. In Client B, initiate the forwarding of the MM, without prior retrieval, to another, legal, address.
4. In Test Tool, receive the forwarding message.
5. Verify the pass criteria below.
Pass Criteria: The Client B has sent a correct forwarding message.
5.4.3.2 MMS-1.3-con-612  Forward without prior retrieval - Validity Period (Expiry Time) set by Client when forwarding

Test Case Id MMS-1.3-con-612
Test Object Client B
Test Case Description The purpose is to verify that a request to forward a message with a Validity Period/Expiry Time, set by the client, is correctly formatted.
Specification Reference [MMSENC] Chapter 6.5 Table 7
SCR Reference MMSE-FWD-C-010
Tool MMS Conformance Tool
Test Code Validated test code for test case MMS-1.3-con-612
Preconditions -Client B
  Capability:
  Setting (relative) Expiry Time of a Forwarded message
  Deferred Retrieval mode
  Forwarding without prior retrieval
Test Procedure
1. Set retrieval mode to deferred in client B
2. In Test Tool, send notification for an MM to Client B.
3. In Client B, request that the Validity Period/Expiry Time, in the M-Forward.req PDU is set to 1 hour (or lowest possible value). In Client B, initiate the forwarding of the MM, without prior retrieval, to another, legal, address.
4. In Test Tool, receive the forwarding message.
5. Verify the pass criteria below.
Pass Criteria The Client B has sent a correct forwarding message and the X-Mms-Expiry value is set to 1 hour (or the lowest possible value allowed by the client).
5.4.3.3 MMS-1.3-con-613 - Forward without prior retrieval - Forwarding Delivery report – Retrieved message

Test Case Id MMS-1.3-con-613
Test Object Client B
Test Case Description The purpose is to verify that a message addressed to a client can be forwarded without prior retrieval. The forwarding Client B can request and subsequently receive a delivery report with the Retrieved status.

Specification Reference [MMSENC] Chapter 6.5.1 Table 7
SCR Reference MMSE-FWD-C-013
Tool MMS Conformance Tool
Test Code Validated test code for test case MMS-1.3-con-613

Preconditions -Client B
Capability:
To request a Delivery report
Deferred retrieval mode
Forwarding without prior retrieval

Test Procedure
1. Set retrieval mode to deferred in client B
2. In Test Tool, send notification for an MM to Client B
3. In Client B, do not retrieve the MM. Set Client B to request a Delivery Report and initiate the forwarding of the MM to another, legal, address.
4. In Test Tool, receive the forwarding message and send Delivery Report back to Client B.
5. Verify the pass criteria below.

Pass Criteria
Client B has sent an M-Forward.req PDU with the X-Mms-Delivery-Report field set to Yes. If Client B is able to display delivery report notification through the MMI, ensure that it has done so and that the Retrieved status has been appropriately indicated. If client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

**5.4.3.4 MMS-1.3-con-614 - Forward without prior retrieval - Forwarding Delivery report – Rejected message**

**Test Case Id**  
MMS-1.3-con-614

**Test Object**  
Client B

**Test Case Description**  
The purpose is to verify that a message addressed to a client can be forwarded without prior retrieval. The forwarding Client B can request and subsequently receive a delivery report with the Rejected status.

**Specification Reference**  
[MMSENC] Chapter 6.5.1 Table 7

**SCR Reference**  
MMSE-FWD-C-013

**Tool**  
MMS Conformance Tool

**Test Code**  
Validated test code for test case MMS-1.3-con-614

**Preconditions**  
-Client B  
  Capability:  
  To request a Delivery report  
  Deferred retrieval mode  
  Forwarding without prior retrieval

**Test Procedure**

1. Set retrieval mode to deferred in client B.
2. In Test Tool, send notification for an MM to Client B.
3. In Client B, do not retrieve the MM. Set Client B to request a Delivery Report and initiate the forwarding of the MM to another, legal, address.
4. In Test Tool, receive the forwarding message and send Delivery Report back to Client B.
5. Verify the pass criteria below.

**Pass Criteria**  
Client B has sent an M-Forward.req PDU with the X-Mms-Delivery-Report field set to Yes. If Client B is able to display delivery report notification through the MMI, ensure that it has done so and that the Rejected status has been appropriately indicated. If client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

5.4.3.5 MMS-1.3-con-615 - Forward without prior retrieval - Forwarding Delivery report – Expired message

Test Case Id MMS-1.3-con-615
Test Object Client B
Test Case Description The purpose is to verify that a message addressed to a client can be forwarded without prior retrieval. The forwarding Client B can request and subsequently receive a delivery report with the Expired status.

Specification Reference [MMSENC] Chapter 6.5.1 Table 7
SCR Reference MMSE-FWD-C-013
Tool MMS Conformance Tool
Test Code Validated test code for test case MMS-1.3-con-615

Preconditions -Client B
  Capability:
  To request a Delivery report
  Deferred retrieval mode
  Forwarding without prior retrieval

Test Procedure 1. Set retrieval mode to deferred in client B.
2. In Test Tool, send notification for an MM to Client B.
3. In Client B, do not retrieve the MM. Set Client B to request a Delivery Report and initiate the forwarding of the MM to another, legal, address.
4. In Test Tool, receive the forwarding message and send Delivery Report back to Client B.
5. Verify the pass criteria below.

Pass Criteria Client B has sent an M-Forward.req PDU with the X-Mms-Delivery-Report field set to Yes. If Client B is able to display delivery report notification through the MMI, ensure that it has done so and that the Expired status has been appropriately indicated. If client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

5.4.3.6 MMS-1.3-con-616 - Forward without prior retrieval - Read report when forwarding to single recipient

Test Case Id: MMS-1.3-con-616
Test Object: Client B
Test Case Description: The purpose is to verify that a message addressed to a client can be forwarded without prior retrieval. The forwarding Client B can request and subsequently receive a read report with the Read status.

Specification Reference: [MMSENC] Chapter 6.5.1 Table 7
SCR Reference: MMSE-FWD-C-014
Tool: MMS Conformance Tool
Test Code: Validated test code for test case MMS-1.3-con-616

Preconditions:
- Client B
  Capability:
  - To request a Read report
  - Deferred retrieval mode
  - Forwarding without prior retrieval

Test Procedure:
1. Set retrieval mode to deferred in client B.
2. In Test Tool, send notification for an MM to Client B.
3. In Client B, do not retrieve the MM. Set Client B to request a Read Report and initiate the forwarding of the MM to another, legal, address.
4. In Test Tool, receive the forwarding message and send Read Report back to Client B with Read-status-value of Read.
5. Verify the pass criteria below.

Pass Criteria:
Client B has sent an M-Forward.req PDU with the X-Mms-Read-Report field to Yes. If Client B is able to display read report notification through the MMI, ensure that it has done so and that the Read status has been appropriately indicated. If client is unable to display the notification then ensure that the MMS layer is still capable of functioning by the successful receipt of an additional MM.

5.4.3.7 MMS-1.3-con-617 - Forward without prior retrieval - Delivery Report when Forwarding – Interpreting Message-ID field

Test Case Id: MMS-1.3-con-617

Test Object: Client B

Test Case Description: The purpose is to verify that a Client forwarding multiple MMs can correctly utilise the Message-ID field to associate received Delivery Reports with their respective MMs.

Specification Reference:
- [MMSENC] Chapter 6.5.2 Table 8 and Chapter 6.6 Table 9
- [MMSCTR] Chapter 6.4.1 and Chapter 6.5.1

SCR Reference: MMSE-FWD-C-018, MMSE-C-087, MMSCTR-FWD-C-003, MMSCTR-DRP-C-002

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-617

Preconditions:
- Client B
  - Capability:
    - Delivery report request
    - Forwarding without prior retrieval
    - Support for interpreting Message-ID field
    - Display of Delivery Report

Test Procedure:

1. Set retrieval mode to deferred in client B.

2. In Test Tool, send a notification for an MM (Message1) to Client B; with the Subject field set to “Hello World – Retrieved”.

3. In Client B, do not retrieve the MM. Set Client B to request a Delivery Report and initiate the forwarding of the MM to another, legal, address (the Forwarding Address).

4. In the Test Tool, accept the forward request and send an M-Forward.conf PDU to Client B with the Message-ID field set to “retrieved@mmsc”.

5. In Test Tool, send a notification for an MM (Message2) to Client B; with the Subject field set to “Hello World – Rejected”.

6. In Client B, do not retrieve the MM. Set Client B to request a Delivery Report and initiate the forwarding of the MM to the Forwarding Address as used above.

7. In the Test Tool, accept the forward request and send an M-Forward.conf PDU to Client B with the Message-ID field set to “rejected@mmsc”.

8. In Test Tool, send a notification for an MM (Message3) to Client B; with the Subject field set to “Hello World – Expired”.

9. In Client B, do not retrieve the MM. Set Client B to request a Delivery Report and initiate the forwarding of the MM to the Forwarding Address as used above.

10. In the Test Tool, accept the forward request and send an M-Forward.conf PDU to Client B with the Message-ID field set to “expired@mmsc”.

11. In the Test Tool, send a Delivery Report in response to the third forward request received; i.e. in the M-Delivery.ind PDU include the Message-ID field set to “expired@mmsc”.

12. In the Test Tool, send a Delivery Report in response to the first forward request received; i.e. in the M-Delivery.ind PDU include the Message-ID field set to “retrieved@mmsc”.

13. In the Test Tool, send a Delivery Report in response to the second forward request received; i.e. in the M-Delivery.ind PDU include the Message-ID field set to “rejected@mmsc”.

14. In Client B, examine each of the three received Delivery Reports

15. Verify the pass criteria below

**Pass Criteria**

Client B displays the delivery status of Message1 as Retrieved; and Client B displays the delivery status of Message2 as Rejected; and Client B displays the delivery status of Message 3 as Expired.

**Forward Confirmation Content specific to this Test Case.**

5.4.3.8 MMS-1.3-con-618 - Forward without prior retrieval - Read Report when Forwarding – Interpreting Message-ID field

Test Case Id: MMS-1.3-con-618
Test Object: Client B
Test Case Description: The purpose is to verify that a Client forwarding multiple MMs can correctly utilise the Message-ID field to associate received Read Reports with their respective MMs.

Specification Reference: [MMSENC] Chapter 6.5.2 Table 8 and Chapter 6.6 Table 9
[MMSCTR] Chapter 6.4.1 and Chapter 6.6.3.2

SCR Reference: MMSE-FWD-C-018, MMSE-RDR-C-006, MMSCTR-FWD-C-003, MMSCTR-RRP-C-008

Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-618

Preconditions:
- Client B
  - Capability:
    - Ability to request Read Reports
    - Forwarding without prior retrieval
    - Ability to handle Read Reports in the form of PDUs
    - Support for interpreting Message-ID field

Test Procedure:
1. Set retrieval mode to deferred in client B.
2. In Test Tool, send a notification for an MM (Message1) to Client B; with the Subject field set to “Hello World – Read1”.
3. In Client B, do not retrieve the MM. Set Client B to request a Read Report and initiate the forwarding of the MM to another, legal, address (the Forwarding Address).
4. In the Test Tool, accept the forward request and send an M-Forward.conf PDU to Client B with the Message-ID field set to “read1@mmsc”.
5. In Test Tool, send a notification for an MM (Message2) to Client B; with the Subject field set to “Hello World – Deleted”.
6. In Client B, do not retrieve the MM. Set Client B to request a Read Report and initiate the forwarding of the MM to the Forwarding Address as used above.
7. In the Test Tool, accept the forward request and send an M-Forward.conf PDU to Client B with the Message-ID field set to “deleted@mmsc”.
8. In Test Tool, send a notification for an MM (Message3) to Client B; with the Subject field set to “Hello World – Read2”.
9. In Client B, do not retrieve the MM. Set Client B to request a Read Report and initiate the forwarding of the MM to the Forwarding Address as used above.
10. In the Test Tool, accept the forward request and send an M-Forward.conf PDU to Client B with the Message-ID field set to “read2@mmsc”.
11. In the Test Tool, send a Read Report in response to the third forward request received; i.e. in the M-Read-orig.ind PDU include the Message-ID field set to “read2@mmsc”.

12. In the Test Tool, send a Read Report in response to the first forward request received; i.e. in the M-Read-orig.ind PDU include the Message-ID field set to “read1@mmsc”.

13. In the Test Tool, send a Read Report in response to the second forward request received; i.e. in the M-Read-orig.ind PDU include the Message-ID field set to “deleted@mmsc”.

14. In Client B, examine each of the three received Read Reports

15. Verify the pass criteria below

Pass Criteria

Client B displays the read status of Message1 as Read; and Client B displays the read status of Message2 as Deleted; and Client B displays the read status of Message 3 as Read.

Forward Confirmation Content specific to this Test Case.

Step 4

PDU Content: MMS Headers: X-Mms-Message-Type X-Mms-Transaction-ID X-Mms-MMS-Version X-Mms-Response-Status Message-ID m-forward-conf <same as in the M-Forward.req PDU from Client B> 1.3 Ok “read1@mmsc”

Step 7

PDU Content: MMS Headers: X-Mms-Message-Type X-Mms-Transaction-ID X-Mms-MMS-Version X-Mms-Response-Status Message-ID m-forward-conf <same as in the M-Forward.req PDU from Client B> 1.3 Ok “deleted@mmsc”

Step 10

PDU Content: MMS Headers: X-Mms-Message-Type X-Mms-Transaction-ID X-Mms-MMS-Version X-Mms-Response-Status Message-ID m-forward-conf <same as in the M-Forward.req PDU from Client B> 1.3 Ok “read2@mmsc”

Read Report Content specific to this Test Case.

Step 11

PDU Content: MMS Headers: X-Mms-Message-Type X-Mms-MMS-Version Message-ID m-read-orig-ind 1.3 read2@mmsc <address of Client B> <Forwarding Address as in the M-Forward.req from Client B> <current date> Read

Step 12

PDU Content: MMS Headers: X-Mms-Message-Type X-Mms-MMS-Version m-read-orig-ind 1.3
Step 13

<table>

5.4.3.9 MMS-1.3-con-619 - Forward without prior retrieval - Long X-Mms-Content-Location field when Forwarding

Test Case Id: MMS-1.3-con-619
Test Object: Client B
Test Case Description: The purpose is to verify that a multimedia message, where the X-Mms-Content-Location field in the M-Notification-ind PDU has a length equal to the maximum permitted value, is correctly forwarded by Client B.

Verification is done by sending a Notification PDU from a Test Tool to Client B and then inspect the contents of the M-Forward-req PDU sent to the Test Tool.

Specification Reference: [MMSCONF] Chapter 10.2.5
SCR Reference: MMSCONF- GEN-C-003
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-617
Preconditions: -Client B

Test Procedure:
1. Set retrieval mode to deferred in client B
2. In Test Tool, send notification for an MM to Client B.
3. In Client B, initiate the forwarding of the MM, without prior retrieval, to another, legal, address.
4. In Test Tool, receive the forwarding message
5. Verify the pass criteria below

Pass Criteria: The contents of the X-Mms-Content-Location field in the M-Forward-req PDU received by the Test Tool is equal to the value sent by the Test Tool in the M-Notification-ind PDU.

MMS PDU Content specific to this Test Case.

M-Notification-ind MMS Headers: X-Mms-Content-Location

A URI format text string having a length of 100 characters. The URI value itself will be Test Tool dependent, but the length must be 100 characters in total.
5.4.4 Cancel

5.4.4.1 MMS-1.3-con-623 - Cancel

Test Case Id: MMS-1.3-con-623

Test Object: Client B

Test Case Description: The purpose is to verify that when a MM is received by Client B and a Cancel afterwards, the client does respond correctly and cancel the message at the client.

This is verified by sending an MM from a Test Tool to Client B, and a Cancel request afterwards.

[MMSCTR] Chapter 6.7

SCR Reference: MMSCTR-PDU-C-021, MMSCTR-CNC-C-001, MMSCTR-CNC-C-002, MMSCTR-CNC-C-003, MMSE-CNC-C-001, MMSE-CNC-C-002, MMSE-CNC-C-003, MMSE-CNC-C-004, MMSE-CNC-C-006

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-623

Preconditions:
- Test Tool
  - An MM addressed to Client B is created and stored
- Client B
  - Capability: Receiving of M-Cancel.req
  - Support for sending M-Cancel.conf

Test Procedure:
1. From the test tool send notification of an MM to Client B.
2. In Client B, receive the MM notification.
3. In Client B, retrieve and open the MM.
4. From the test tool send a M-Cancel.req to Client B.
5. Client B sends a M-Cancel.conf to the test tool.
6. Verify the pass criteria below.

Pass Criteria: In the test tool, verify that Client B has sent a M-Cancel.conf according the table below and that the MM retrieved in step 3 is cancelled at Client B.

M-Cancel.req content specific to this Test Case.

<table>
<thead>
<tr>
<th>PDU Content:</th>

5.5 CLIENT B (RECIPIENT)

5.5.1 Download options

5.5.1.1 MMS-1.3-con-701 - Download options – Immediate retrieval

Test Case Id: MMS-1.3-con-701
Test Object: Client B
Test Case Description: The purpose is to verify that a message is correctly received by Client B and that the message is immediately retrieved by using the Immediate Retrieval mode.

Verification is done by sending a notification from a Test Tool to Client B. Client B then immediately initiates a retrieval of the message from the Test Tool. On the Test Tool it can be verified that no M-NotifyResp.ind message is sent from Client B before the GET operation is initiated.

Specification Reference: [MMSCTR] Chapter 6.3.1
[MMSCTR] Chapter 6.2.1

SCR Reference: MMSCTR-FTC-C-002, MMSCTR-NTF-C-003

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-701

Preconditions:
- Client B
  - Capability: Immediate retrieval

Test Procedure:
1. In Test Tool, send notification of an MM to Client B.
2. In Client B, receive the MM notification and retrieve and open the MM.
3. Verify the pass criteria below.

Pass Criteria: Client B has retrieved the MMs immediately and responded with a M-NotifyResp.ind to the Test Tool after the initiation of the GET operation. The X-Mms-Status field SHALL have a Status-value of Retrieved.
### 5.5.1.2 MMS-1.3-con-702 - Download options – Deferred retrieval

</tbody>
</table>
### 5.5.1.3 MMS-1.3-con-703 - Download options – Rejected retrieval

**Test Case Id**  
MMS-1.3-con-703

**Test Object**  
Client B

**Test Case Description**  
The purpose is to verify that a message is correctly received by Client B and that Client B can reject the messages and not attempt message download.

Verification is done by sending a notification from a Test Tool to Client B. The MM is rejected at Client B. On the Test Tool it can be verified that an M-NotifyResp.ind message is sent from Client B with message retrieval status set to Rejected and no download attempt is made by Client B.

**Specification Reference**  
[MMSCTR] Chapter 6.3.1  
[MMSCTR] Chapter 6.2.1

**SCR Reference**  
MMSCTR-NTF-C-003

**Tool**  
MMS Conformance tool

**Test Code**  
Validated test code for test case MMS-1.3-con-703

**Preconditions**

-Client B  
  Setting:  
  Download option is set to Rejected Retrieval mode

**Test Procedure**

1.

2. In Test Tool, send notification of an MM to Client B.

3. In Client B, reject the MM.

4. Verify the pass criteria below.

**Pass Criteria**

Client B has received the notification. Client B has successfully rejected the message by responding with M-NotifyResp.ind with the message retrieval status code set to Rejected.
5.5.2 DRM Support

5.5.2.1 Normal Flow

5.5.2.1.1 MMS-1.3-con-704 - DRM support – Forward Lock

5.5.2.1.2 MMS-1.3-con-705 - Combined delivery restrictions on the submission of MM

Test Case Id       MMS-1.3-con-705
Test Object        Client B
Test Case Description The purpose of this test is to verify that when submitting an already received MM containing DRM combined delivery protected content and a text file, the MMS Client either submits the MM without enclosing the DRM content or restricts the submission of the MM

Specification Reference [MMSCONF] 16.2.1.1
SCR Reference      MMSCONF-DRM-C-004
Tool               MMS Conformance tool
Test Code          Validated test code for test case MMS-1.3-con-705
Preconditions      -Client B terminal supports OMA DRM Combined delivery protection mechanisms

Test Procedure
1. In test tool, create MM containing DRM combined delivery protected content and a text file.
2. In test tool, send MM to Client B.
3. In Client B, render and present MM.
4. In Client B, submit MM to test tool.
5. Verify pass criteria (a) or (b) below.

Pass Criteria
a) Test tool verifies that Client B submits the MM without enclosing the DRM content.
b) Client B restricts the submission of the MM.

MM Content specific to this Test Case.

MM Content:       MMS Headers: To <address of Client B>

2. In test tool, send MM to client B
3. In Client B, receive and open the MM.
4. In Client B, re-submit the received MM
5. Verify the pass criteria below.

#### Pass Criteria

Client B is able to re-submit the MM
5.5.3.2.5 MMS-1.3-con-725 - Creation mode set to WARNING; Re-submission mode follows
Creation mode

Test Case Id: MMS-1.3-con-725
Test Object: Client B
Test Case Description: The purpose of this test is to verify that re-submission follows the creation mode when the creation mode is set to WARNING.
Specification Reference: [MMSCONF] 15
SCR Reference: missing
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-725
Preconditions:

1. Client B's creation mode is set to WARNING.
2. The re-submission mode is set to RESTRICTED.
3. MMS Relay/Server: Content adaptation deactivated.

Test Procedure:
1. In test tool, create MM not belonging to the Core MM Content Domain; add image file/object oma_in_colour.svg.
2. In test tool, send MM to client B.
3. In Client B, receive and open the MM.
4. In Client B, try to re-submit the received MM.
5. Verify the pass criteria below.

Pass Criteria:
Client B displays a warning to the user indicating that the MM does not belong to the Core MM Content domain AND (a) or (b) below:

a) Client B is able to re-submit the MM if the user accepts to send the MM.

b) Client B does NOT re-submit the MM if the user does not accept to send the MM.
## 5.5.4 MMS Template Handling

### 5.5.4.1 MMS-1.3-con-761 - Valid MTD

*Test Case Id*: MMS-1.3-con-761  
*Test Object*: Client B  
*Test Case Description*: The purpose is to verify that Client B validates the MTD against the XML schema for a MMS Message Template before using the MTD for creating an MM, and pass if the MTD is valid.

*Specification Reference*: [MMSTEMP] Chapter 5.2.2.1  
*SCR Reference*: MMSTEMP-MMSTC-C-001  
*Tool*: MMS Conformance tool  
*Test Code*: Validated test code for test case MMS-1.3-con-761  
*Preconditions*:  
- Client B  
  *Capability:*  
  - Support to receive MMS Message Template  
  - Support to create MM with MMS Message Template

**Test Procedure**  
1. In Test Tool, send MM notification to Client B.  
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.  
3. In Client B, select the received MMS Message Template for creating MM.  
4. Verify the pass criteria below.

**Pass Criteria**: Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM.

**MM Content specific to this Test Case:**

**MM Content for Step 2:**  
<table>
<thead>
<tr>
<th>MM Content: MMS Headers</th>
<th>Content-Type</th>
<th>application/vnd.wap.multipart.mixed</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>MMS Message Template: Message Template Definition: Headers.mtd</th>
</tr>
</thead>
</table>

(a multimedia object with MIME type “application/vnd.omammsg-mtd+xml” which is valid in respect of the XML schema described in Appendix B of [MMSTEMP])
### 5.5.4.2 MMS-1.3-con-762 - Invalid MTD

5.5.4.5 MMS-1.3-con-765 - Replace media objects by target name

Test Case Id MMS-1.3-con-765
Test Object Client B
Test Case Description The purpose is to verify that Client B replaces the media object specified by the target-name described at a step element in the wizard part of the Message Template Definition (MTD) and to verify that Client B reflects the change of the media object's name in the MMS presentation part of the MTD.

Specification Reference [MMSTEMP] Chapter 5.2.2.2
SCR Reference MMSTEMP-WIZC-C-001, MMSTEMP-MMSTC-C-011
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-765
Preconditions -Client B
Contains image file “JPG80x60.jpg”
Capability:
- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template

Test Procedure
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, create a new MM with MMS Message Template.
4. While creating MM with the Message Template in Client B, the user selects media object “JPG80x60.jpg” at the step in wizard.
5. In Client B send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria
- The Resulting MM sent from Client B has the replaced media object named “JPG80x60.jpg” as the target-name described in the step element.
- The Resulting MM sent from Client B has a MMS presentation part, which has a reference to the name of the replaced media object (“JPG80x60.jpg”).

MM Content specific to this Test Case:

</tbody>
</table>
5.5.4.6 MMS-1.3-con-766 - Add media objects by target name

Test Case Id: MMS-1.3-con-766
Test Object: Client B
Test Case Description: The purpose is to verify that Client B adds the media object named as the target-name described in a step element in the wizard part of the Message Template Definition (MTD).

Specification Reference: [MMSTEMP] Chapter 5.2.2.2
SCR Reference: MMSTEMP-WIZC-C-001, MMSTEMP-MMSTC-C-011
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-766
Preconditions:
- Client B contains image file “JPG80x60.jpg”
  Capability:
  - Support to receive MMS Message Template
  - Support to create MM with MMS Message Template
  - Support the wizard function in MMS Client with MMS Message Template

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, create a new MM with MMS Message Template.
4. While creating MM with the Message Template in Client B, the user selects the media object “JPG80x60.jpg” at the step in wizard.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria:
The Resulting MM sent from Client B has the replaced media object named “JPG80x60.jpg” as the target-name described in the step element.

MM Content specific to this Test Case:
<table>
<thead>
<tr>
<th>MM Content:</th>
<th>MMS Headers:</th>
<th>Content-Type</th>
<th>application/vnd.wap.multipart.related</th>

<td></td>
</tr>
</tbody>
</table>
5.5.4.7 MMS-1.3-con-767 - Invalid target type for replacement

Test Case Id: MMS-1.3-con-767

Test Object: Client B

Test Case Description: The purpose is to verify that Client B prohibits replacement with a media object that violates the target type described in a step element in the wizard part of the Message Template Definition (MTD).

Specification Reference: [MMSTEMP] Chapter 5.2.2.2

SCR Reference: MMSTEMP-WIZC-C-002, MMSTEMP-MMSTC-C-011

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-767

Preconditions:
- Client B contains image file “image.png”
- Capability:
  - Support to receive MMS Message Template
  - Support to create MM with MMS Message Template
  - Support the wizard function in MMS Client with MMS Message Template

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. Verify the pass criteria below.

Pass Criteria:
Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the user is not able to select the media object “image.png” that has a different MIME type from the target-type.

MM Content specific to this Test Case:

MM Content for Step 2:

<table>
<thead>
<tr>
<th>MM Content:</th>

5.5.4.10 MMS-1.3-con-770 - Input media object by plain text editor

Test Case Id MMS-1.3-con-770
Test Object Client B
Test Case Description The purpose is to verify that Client B supports the replacement of a media object using the plain text editor while creating an MM with a MMS Message Template.

Specification Reference [MMSTEMP] Chapter 5.2.2.2
SCR Reference MMSTEMP-WIZC-C-005, MMSTEMP-MMSTC-C-011
Tool MMS Conformance tool
Test Code Validated test code for test case MMS-1.3-con-770
Preconditions -Client B
   Capability:
       Support to receive MMS Message Template
       Support to create MM with MMS Message Template
       Support the wizard function in MMS Client with MMS Message Template
       Support to launch text editor application to replace the text

Test Procedure 1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user inputs the text “Test” in the text editor application.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the plain text editor is launched for replacing the media object.
The Resulting MM sent from Client B has a content part with type text/plain, which contains the string “Test”.

5.5.4.11 MMS-1.3-con-771 - Input media object by file manager

Test Case Id: MMS-1.3-con-771
Test Object: Client B
Test Case Description: The purpose is to verify that Client B supports the replacement of a media object using the file manager while creating an MM with a MMS Message Template.

Specification Reference: [MMSTEMP] Chapter 5.2.2.2
SCR Reference: MMSTEMP-WIZC-C-005, MMSTEMP-MMSTC-C-011
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-771
Preconditions:
- Client B contains image file “JPG80x60.jpg”
Capability:
- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template
- Support to launch file manager application to replace the media object

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user selects the media object with “JPG80x60.jpg” in the file manager application.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria:
- Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the file manager is launched to replace the media object.
- The Resulting MM sent from Client B has the image file “JPG80x60.jpg”.

  (a multimedia object, with MIME type “application/vnd.omammsg-mtd+xml”, which uses the file manager in the first step)
5.5.4.12 MMS-1.3-con-772 - Input media object by address book

Test Case Id: MMS-1.3-con-772

Test Object: Client B

Test Case Description: The purpose is to verify that Client B supports the replacement of a media object using the address book while creating an MM with a MMS Message Template.

Specification Reference: [MMSTEMP] Chapter 5.2.2.2

SCR Reference: MMSTEMP-WIZC-C-005, MMSTEMP-MMSTC-C-011

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-772

Preconditions:

- Client B contains address book entry containing all supported fields in “John Doe.vcf”

Capability:

- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template
- Support to launch address book application to input address book entry
- Support for vCard (media type text/x-vcard)

Test Procedure:

1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user selects the address book entry in the address book application.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria:

Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the address book is launched to replace the media object.

The Resulting MM sent from Client B shall contain a part with content type set to text/x-vCard.

5.5.4.13 MMS-1.3-con-773 - Input media object by still-camera application

Test Case Id: MMS-1.3-con-773
Test Object: Client B
Test Case Description: The purpose is to verify that Client B supports the replacement of a media object using the still-camera application while creating an MM with a MMS Message Template.

Specification Reference: [MMSTEMP] Chapter 5.2.2.2
SCR Reference: MMSTEMP-WIZC-C-005, MMSTEMP-MMSTC-C-011
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-773
Preconditions: -Client B

Capability:
- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template
- Support to launch still-camera application to input the media object

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user inputs the media object in the still-camera application.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria:
Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the still-camera application is launched to replace the media object.

The Resulting MM sent from Client B shall contain a part with content type set to image/jpeg.

NOTE: The pass criteria above are based on the assumed implementation of the still-camera application in Client B.

Specification Reference: [MMSTEMP] Chapter 5.2.2.2
SCR Reference: MMSTEMP-WIZC-C-005, MMSTEMP-MMSTC-C-011
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-775
Preconditions: -Client B

Capability:
- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template
- Support to launch sound recorder application to input the media object
- Support for media type audio/amr

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user inputs the media object in the sound recorder application.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria:
Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the sound recorder application is launched to replace the media object.

The Resulting MM sent from Client B shall contain a part with content type set to audio/amr.

MM Content specific to this Test Case:

MM Content for Step 2:

<table>
<thead>
<tr>
<th>MM Content:</th>
<th>MMS Headers:</th>
<th>Content-Type:</th>
</tr>
</thead>
<tbody>
<tr>
<td>[MMSTEMP] Chapters 5.2.2.2, 5.2.2.2</td>
<td>[MMSTEMP] Chapters 5.2.2.2, 5.2.2.2</td>
<td>application/vnd.wap.multipart.mixed</td>
</tr>
</tbody>
</table>
MM Content: MMS
Message Template: Multipart structure with the following section:

- Message Template Definition: Sound_recorder.mtd
  (a multimedia object, with MIME type “application/vnd.omammsg-mtd+xml”, which uses the sound recorder application in the first step)
5.5.4.16 MMS-1.3-con-776 - Input media object by rich text editor

Test Case Id: MMS-1.3-con-776

Test Object: Client B

Test Case Description: The purpose is to verify that Client B supports the replacement of a media object using the rich text editor while creating an MM with a MMS Message Template.

Specification Reference: [MMSTEMP] Chapter 5.2.2.2

SCR Reference: MMSTEMP-WIZC-C-005, MMSTEMP-MMSTC-C-011

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-776

Preconditions - Client B

Capability:
- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template
- Support to launch rich text editor application to replace the text
- Support for media file application/vnd.wap.xhtml+xml

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user inputs the text string given in “Generic_Text.txt” as rich text using the rich text editor application.
5. In Client B, send MM to Test Tool.
6. In the Test Tool, accept the message.
7. Verify the pass criteria below.

Pass Criteria: Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. In creating the MM, the rich text editor is launched to replace the media object.

The Resulting MM sent from Client B shall contain a part with content type set to “application/vnd.wap.xhtml+xml”.

MM Content specific to this Test Case:

MM Content for Step 2:

MM Content: MMS Content-Type application/vnd.wap.multipart.mixed
Headers:

MM Content: MMS
Message Template: Multipart structure with the following section:

- Message Template Definition: Rich_text_editor.mtd
  (a multimedia object, with MIME type “application/vnd.omammsg-mtd+xml”, which uses the rich text editor application in the first step)
5.5.4.17 MMS-1.3-con-777 - Forward/Backward navigation with steps

Test Case Id                      MMS-1.3-con-777
Test Object                      Client B
Test Case Description            The purpose is to verify that Client B can go forward/backward to the next/previous step between several steps in the wizard part of a Message Template Definition (MTD).
Specification Reference          [MMSTEMP] Chapter 5.2.2.2
SCR Reference                    MMSTEMP-WIZC-C-007, MMSTEMP-MMSTC-C-011
Tool                             MMS Conformance tool
Test Code                        Validated test code for test case MMS-1.3-con-777
Preconditions                    -Client B
                                   Capability:
                                   Support to receive MMS Message Template
                                   Support to create MM with MMS Message Template
                                   Support the wizard function in MMS Client with MMS Message Template
Test Procedure                   1. In Test Tool, send MM notification to Client B.
                                   2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
                                   3. In Client B, select the received MMS Message Template for creating MM.
                                   4. In Client B, go forward to the next step.
                                   5. In Client B, go backward to the previous step.
                                   6. Verify the pass criteria below.
Pass Criteria                    Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. While creating the MM, the Client B can go forward and backward between the steps.

MM Content specific to this Test Case:

</table>
5.5.4.18 MMS-1.3-con-778 - Check for required attribute

Test Case Id: MMS-1.3-con-778
Test Object: Client B
Test Case Description: The purpose is to verify that Client B checks whether the “required” attribute is indicated for media objects within the steps of the wizard part of a Message Template Definition (MTD), and does not send the MM if the required media objects are not appropriately input.

Specification Reference: [MMSTEMP] Chapter 5.2.2.2
SCR Reference: MMSTEMP-WIZ-C-008, MMSTEMP-MMSTC-C-011
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-778
Preconditions: -Client B

Capability:
- Support to receive MMS Message Template
- Support to create MM with MMS Message Template
- Support the wizard function in MMS Client with MMS Message Template

Test Procedure:

1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM.
4. While creating MM with the Message Template in Client B, the user tries to create and send the Resulting MM without adding media objects at either of the wizard steps.
5. While creating MM with the Message Template in Client B, the user adds the text string defined in “Generic_text.txt” using the text editor application at the first step in the wizard.
6. In Client B, send MM to Test Tool.
7. In the Test Tool, accept the message.
8. Verify the pass criteria below.

Pass Criteria:
Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM.

In test procedure 4, Client B does not send the Resulting MM.

In test procedure 6, Client B sends the Resulting MM and the Test Tool has received the resulting MM containing a part of Content-Type text/plain containing the text string given in “Generic_Text.txt”.
MM Content specific to this Test Case:

**MM Content for Step 2:**

<table>
<thead>
<tr>
<th>MM Content</th>
<th>MMS Headers</th>
<th>Content-Type</th>
<th>application/vnd.wap.multipart.mixed</th>
</tr>
</thead>
</table>

<table>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Navi_req.mtd</td>
<td>(a multimedia object, with MIME type “application/vnd.omammsg-mtd+xml”, which has a wizard part with two-step elements. The first step element uses the text editor application and has the “required” attribute)</td>
</tr>
</tbody>
</table>
5.5.4.19 MMS-1.3-con-779 - Set header values

Test Case Id: MMS-1.3-con-779

Test Object: Client B

Test Case Description: The purpose is to verify that Client B sets the MMS header values of the resulting MM that was made using a MMS Message Template.

Specification Reference: [MMSTEMP] Chapter 5.2.2.3

SCR Reference: MMSTEMP-MMSTC-C-014

Tool: MMS Conformance tool

Test Code: Validated test code for test case MMS-1.3-con-779

Preconditions:
- Client B
  Capability:
  Support to receive MMS Message Template
  Support to create MM with MMS Message Template

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, create a new MM with MMS Message Template.
4. In Client B, send MM to Test Tool.
5. In the Test Tool, accept the message.
6. Verify the pass criteria below.

Pass Criteria: The To field and the Cc field of the Send Request contain the addresses of the addressed clients, and the Subject field contains the subject of the message, as given in the header elements of “Headers.mtd”.

MM Content specific to this Test Case:

MM Content for Step 2:

<table>
<thead>
<tr>
<th>MM Content: MMS Headers</th>
<th>Content-Type: application/vnd.wap.multipart.mixed</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>

</tbody>
</table>
5.5.4.20 MMS-1.3-con-780 - Make pre-filled MMS header values available to the user

Test Case Id: MMS-1.3-con-780
Test Object: Client B
Test Case Description: The purpose is to verify that Client B makes pre-filled MMS header values of the resulting MM available to the user before sending the MM.

Specification Reference: [MMSTEMP] Chapter 5.2.2.3
SCR Reference: MMSTEMP-MMSTC-C-015
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-780
Preconditions:
- Client B
  - Capability:
    - Support to receive MMS Message Template
    - Support to create MM with MMS Message Template

Test Procedure:
1. In Test Tool, send MM notification to Client B.
2. In Client B, receive the MM notification and retrieve the MM that contains a MMS Message Template.
3. In Client B, select the received MMS Message Template for creating MM and create a new MM with the Message Template.
4. In Client B, send MM to Test Tool.
5. Verify the pass criteria below.

Pass Criteria:
Client B has received the MMS Message Template as a message. The MMS Message Template is used for creating an MM. After creating the MM, Client B has made available to the user the pre-filled MMS header information before sending, for example, by displaying each of the pre-filled header values.

Note: The SCR item MMSTEMP-MMSTC-C-015 only specifies that headers should be made available to the user, but does not specify how to make them available. The method of making them available to the user is dependent upon the client's implementation.

MM Content specific to this Test Case:

MM Content for Step 2:

<table>

</tbody>
</table>

**Test Procedure**

1. In Client A, create a new MM.
2. In MM header: To-field is set to any legal address.
3. In Client A, send MM to Test Tool.
4. Test Tool responds to Client A with an M-Send.conf PDU.
5. Verify the pass criteria below.

**Pass-Criteria**

The M-Send.req.PDU from Client A contains an X-Mms-Message-Type field with the value m-send-req
### 5.6.1.2 MMS-1.3-con-732 - Support for X-Mms-Transaction-ID field

<table>
<thead>
<tr>

| Test code        | Validated test code for test case MMS-1.3-con-748 |
| Preconditions    | Client A able to request read reports |
| Test Procedure   | 1. In Client A, create a new MM with Read reports requested.  
2. In MM header: To-field is set to any legal address.  
3. In Client A, send MM to Test Tool.  
4. Test Tool responds to Client A with an M-Send.conf PDU.  
5. Verify the pass criteria below. |
| Pass-Criteria    | The M-Send.req PDU X-Mms-Read-Report field is present and contains the value Yes. |
5.6.1.19 MMS-1.3-con-749 - Support for X-MMS-Adaptation-Allowed field

Test Case Id: MMS-1.3-con-749
Test Object: Client A
Test Case Description: The purpose is to verify that the X-Mms-Adaptation-Allowed field is sent from Client A.
Specification Reference: [MMSENC] Table 1
SCR Reference: MMSE-SND-C-037
Tool: MMS Conformance tool
Test Code: Validated test code for test case MMS-1.3-con-749

Preconditions:
- Client A
  Capability: To set X-Mms-Adaptation-Allowed
  Setting: Set the Adaptation field to “Yes”

Test Procedure:
8. In Client A, create a new MM.
9. In MM header: To-field is set to a legal address
10. In MM content: In the message text part, enter the text “Hello World”.
11. Add a image/object JPG1000x500.jpg to the message
12. In Client A, send MM to Test Tool.
13. In test Tool, accept the MM
14. Verify the pass criteria below.

Pass Criteria: Client A has sent the message successfully and the received message within the test tool has the right encoded field for X-MMS-Adaptation-Allowed with the value “YES”.

Appendix B. Testcases applicability

B.1 Introduction

This section shall help implementers of the MMS Enabler to select appropriate test cases that are applicable to the features implemented.

This appendix lists all test cases testing only mandatory features, ICS (Implementation Conformance Specification), IXIT (protocol implementation extra information) and a mapping from ICS/IXIT to applicable test cases as defined by Open Mobile Alliance.

B.2 Test Cases testing only mandatory features

These test cases are independent from any precondition, are testing only mandatory SCRs and SHALL be run with every terminal.
