## 3. Terminology and Conventions

### 3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope”, "Release Version Overview" and “Conformance Requirements Notation Details”, are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 8 and 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [SCR RULES].

### 3.2 Definitions

**Enabler Release** Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.

**Minimum Functionality Description** Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.

### 3.3 Abbreviations

<b>ERDEF</b>	Enabler Requirement Definition
<b>ERELD</b>	Enabler Release Definition
<b>NGSI</b>	Next Generation Service Interfaces
<b>OMA</b>	Open Mobile Alliance
<b>OMNA</b>	Open Mobile Naming Authority

## 4. Release Version Overview

The aim of OMA NGSI v1.0 is to create a collection of abstract definitions for service interfaces, defined as either extensions to Parlay X APIs or as new interfaces, with the focus set to personal communication service extensions including access to external media/data storage or social services. The focus of the NGSI v1.0 is the standardization of new functional APIs essential to the extensions of personalized communication services from the 3rd Party Service Access point of view. In order to allow for advanced service creation based on multiple services/enablers, interface functionalities for identity federation and related obligations as well as management for the composition of services allowing for dynamic service mash-up are included. The focus is not limited to mobile networks only.

### 4.1 Version 1.0 Functionality

The NGSI Version 1.0 introduces the following functionalities:

- Data Configuration and Management
- Call Control and Configuration
- Multimedia List Handling Extensions
- Context Management
- Registration and Discovery
- Identity Control functionalities

## 5. Document Listing for NGSI

This section is normative.

Doc Ref	Permanent Document Reference	Description
<b>Requirement Document</b>

## 6. OMNA Considerations

## 7. Conformance Requirements Notation Details

This section is informative

The tables in following chapters use the following notation:

- Item:** Entry in this column **MUST** be a valid ScrItem according to [SCRRULES].
- Feature/Application:** Entry in this column **SHOULD** be a short descriptive label to the **Item** in question.
- Requirement:** Expression in the column **MUST** be a valid TerminalExpression according to [SCRRULES] and it **MUST** accurately reflect the architectural requirement of the **Item** in question.

## 8. ERDEF for NGSI - Client Requirements

NGSI interfaces are defined as abstract interfaces. There are no client requirements defined.

## 9. ERDEF for NGSI - Server Requirements

NGSI interfaces are defined as abstract interfaces. There are no server requirements defined.
