Use of this document is subject to all of the terms and conditions of the Use Agreement located at http://www.openmobilealliance.org/UseAgreement.html.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at http://www.openmobilealliance.org/ipr.html. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.

THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS.

1. Scope

The scope of this document is limited to the Enabler Release Definition of SCIDM according to OMA Release process and the Enabler Release specification baseline listed in section 5.
2. References

2.1 Normative References

2.2 Informative References

3. Terminology and Conventions

3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope”, “Release Version Overview” and “Conformance Requirements Notation Details”, are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in sections 8 and 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [SCRRULES].

3.2 Definitions

<table>
<thead>
<tr>
<th><strong>Enabler Release</strong></th>
<th>Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfill a number of related market requirements.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Minimum Functionality</strong></td>
<td>Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.</td>

4. Release Version Overview

Today, mobile content spreads all over the mobile service world. How to securely and efficiently identify a mobile digital content is becoming a more and more important issue, and is expected to have potential impact on the successful deployment of mobile services. Secure content identification makes managing intellectual property in a networked environment much easier and more convenient, and allows the construction of automated services and transactions. With the recent development of Web2.0, secure identification of user generated content becomes an important concern as well. The potential applications of secure content identification include charging, content search/management, automatic content monitoring for copyright verification and usage statistics, content filtering/blocking, content tracing, selective recording/playback, remote triggering of ads in broadcast chains, etc.

Secure identification and authentication of digital content would allow secure interactions between content and all other entities (e.g. content provider, content distributor, service provider, operator, enabler, end user) in the mobile service environment, resulting in a more trustworthy and efficient service/transaction environment. This will greatly benefit all parties involved.

The SCIDM Enabler provides a basic service: a standardized trusted content ID (which is a more efficient, and secure (trusted) representation of the content than simply a content name). Specific applications/services can take advantage of SCIDM to offer a more efficient and trustworthy service.

This specification collects the use cases and corresponding requirements, the Enabler architecture and its technical specification, in order to develop a standardized approach to fulfil the above market needs.

4.1 Version 1.0 Functionality

The SCIDM V1.0 introduced following functionalities:

- Content identity registration/query/verification/certification/error reporting and and issuing of content ID certificate
- Content ID assignment
- Secure content identification/authentication mechanisms
5. Document Listing for SCIDM

This section is normative.

6. OMNA Considerations
7. Conformance Requirements Notation Details

This section is informative

The tables in following chapters use the following notation:

**Item:** Entry in this column MUST be a valid ScrItem according to [SCRRULES].

**Feature/Application:** Entry in this column SHOULD be a short descriptive label to the Item in question.

**Requirement:** Expression in the column MUST be a valid TerminalExpression according to [SCRRULES] and it MUST accurately reflect the architectural requirement of the Item in question.
8. ERDEF for SCIDM - Client Requirements

This section is normative.

<table>
<thead>
<tr>
