

SUPL Configuration Services

Candidate Version 1.0 – 20 Aug 2013

Open Mobile Alliance
OMA-RR-SUPL_Configuration_Services-V1_0-20130820-C

Use of this document is subject to all of the terms and conditions of the Use Agreement located at <http://www.openmobilealliance.org/UseAgreement.html>.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at <http://www.openmobilealliance.org/ipr.html>. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.

THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS.

1. Scope

This document is a combined document that includes requirements, architecture and the technical specification of the SUPL Configuration Services (SUPLCS) reference release.

The purpose of the SUPL Configuration Services 1.0 reference release is to provide a mobile operator the ability to host a SUPL configuration and provisioning service that SUPL devices may query to obtain SUPL configuration information.

The configuration information may include but not be limited to:

- An H-SLP for a mobile operator.
- Multiple E-SLPs for a mobile operator.
- Multiple D-SLPs for a mobile operator.
- An H-SLP to utilize for an individual application.

This configuration mechanism is needed to allow the mobile operator the most flexibility when building their mobile LBS platforms.

This document will define the methods for obtaining SUPL configuration data from a mobile operator. The architecture for transferring the configuration data will be implemented using the OMA Device Management [OMA DM] enabler.

3. Terminology and Conventions

3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope” and “Introduction”, are normative, unless they are explicitly indicated to be informative.

3.2 Definitions

| | |
|-----------------------------|---|
| SUPL Configuration Services | The SUPL Configuration Services [SUPL CS] reference release allows a mobile operator to define and configure multiple SLPs to be enabled for their subscriber’s handsets to utilize. |
| SUPL Roaming | For positioning not associated with an emergency services call, SUPL roaming occurs when a SET leaves the service area of its H-SLP. The service area of an H-SLP or E-SLP includes the area within which the H-SLP or E-SLP can provide a position estimate for a SET or relevant assistance data to a SET without contacting other SLPs. It should be noted that an H-SLP or E-SLP service area is not necessarily associated with the service area(s) of the underlying wireless network(s). |

3.3 Abbreviations

| | |
|---------------|------------------------------|
| D-SLP | Discovered SLP |
| DM | OMA Device Management |
| E-SLP | Emergency SLP |
| FQDN | Fully Qualified Domain Name |
| H-SLP | Home SLP |
| OMA | Open Mobile Alliance |
| OMNA | Open Mobile Naming Authority |
| SET | SUPL Enabled Terminal |
| SLP | SUPL Location Platform |
| SUPL | Secure User Plane Location |
| SUPLCS | SUPL Configuration Services |

4. Introduction

The SUPL Configuration Services (SUPLCS) reference release allows an operator to maximize the configuration of SLPs to be utilized in their environment. Multiple SLPs are desirable to maximize revenue and minimize expenses for the mobile operator. SUPLCS will be architected to be independent of the SUPL releases defined in OMA. This approach will enable SUPL to continue on its track and the SUPLCS can evolve independently. A mobile operator may choose to not even utilize this reference release. The use cases are developed so the mobile operator can choose the features defined in this reference release.

4.1 Version 1.0

The version 1.0 of the SUPL Configuration Services (SUPLCS) will enable a mobile operator to configure multiple SLPs to be utilized for SUPL services. The goal for version 1.0 is to enable SLPs to be configured for all of the SLP deployment models described in the SUPL releases ([OMA-SUPL-V1_0], [OMA-SUPL-V2_0], [OMA-SUPL-V2_0_1], [OMA-SUPL-V2_1] and [OMA-SUPL-V3_0]).

The SUPLCS defines configuration information that may include but not be limited to:

- An H-SLP for a mobile operator.
- Multiple E-SLPs for a mobile operator.
- Multiple D-SLPs for a mobile operator.
- An H-SLP to utilize for an individual application.

5. Requirements (Normative)

The requirements in this section define the full SUPL Configuration Services reference release.

5.1 High-Level Functional Requirements

| Label | Description | Release |
|---------------|---|-------------|
| SUPLCS-HLF-01 | SUPLCS SHALL support configuring a default H-SLP for a mobile operator. | SUPLCS V1.0 |
| SUPLCS-HLF-02 | SUPLCS SHALL support configuring one or more E-SLPs for the default H-SLP. | SUPLCS V1.0 |
| SUPLCS-HLF-03 | SUPLCS SHALL support configuring one or more D-SLPs for the H-SLP. | SUPLCS V1.0 |
| SUPLCS-HLF-04 | Configuration information for an SLP SHALL be consistent with SLP information defined in existing versions of SUPL in order to avoid new impacts to SUPL. This means the following: <ol style="list-style-type: none"> 1. for an H-SLP, configuration information SHALL be limited to the H-SLP address; 2. for a D-SLP, configuration information SHALL be the same as or a subset of D-SLP information provided by an H-SLP in SUPL 2.1; 3. for an E-SLP, configuration information SHALL be limited to the E-SLP address. | SUPLCS V1.0 |
| SUPLCS-HLF-05 | SUPL CS SHALL support configuration of multiple H-SLPs which may be accessed on a per application basis. | SUPLCS V1.0 |
| SUPLCS-HLF-06 | An application SHALL be permitted to access only one configured H-SLP. | SUPLCS V1.0 |

5.2 Security

| Label | Description | Release |
|---------------|---|-------------|
| SUPLCS-SEC-01 | SUPLCS SHALL utilize the security mechanisms defined in [OMA DM]. | SUPLCS V1.0 |

5.3 Authentication

| Label | Description | Release |
|---------------|---|-------------|
| SUPLCS-AUT-01 | SUPLCS SHALL utilize the authentication mechanisms defined in [OMA DM]. | SUPLCS V1.0 |

5.4 Authorization

| Label | Description | Release |
|----------------|--|-------------|
| SUPLCS-AUTH-01 | SUPLCS SHALL utilize the authorization mechanisms defined in [OMA DM]. | SUPLCS V1.0 |

5.5 Data Integrity

| Label | Description | Release |
|--------------|--|-------------|
| SUPLCS-DI-01 | Management Objects defined for SUPLCS SHALL be valid based on the schema definitions for [OMA DM]. | SUPLCS V1.0 |

5.6 Confidentiality

None identified.

5.7 Charging

None identified.

5.8 Administration and Configuration

| Label | Description | Release |
|----------------|---|-------------|
| SUPLCS-ADMC-01 | SUPLCS SHALL utilize the administration and configuration mechanisms defined in [OMA DM]. | SUPLCS V1.0 |

5.9 Usability

None identified.

5.10 Interoperability

| Label | Description | Release |
|---------------|--|-------------|
| SUPLCS-IOP-01 | SUPLCS SHALL be independent of the [OMA DM] release. | SUPLCS V1.0 |
| SUPLCS-IOP-02 | SUPLCS SHALL be independent of the [SUPL] release with the following restrictions: <ol style="list-style-type: none"> 1. A D-SLP SHALL be configured in association with SUPL 2.1 and later versions. 2. An E-SLP SHALL be configured in association with SUPL 3.0 and later versions. | SUPLCS V1.0 |
| SUPLCS-IOP-03 | A mobile operator MAY utilize the [SUPL MO] management object to define their H-SLP or this reference release. | SUPLCS V1.0 |

5.11 Privacy

| Label | Description | Release |
|----------------|--|-------------|
| SUPLCS-PRIV-01 | SUPLCS SHALL utilize the privacy mechanisms defined in [OMA DM]. | SUPLCS V1.0 |

6. Architectural Model

This section defines the functional components and the interfaces of the SUPL Configuration Services (SUPLCS) reference release, thus providing its architecture. The architecture is in alignment with the requirements that have been captured in the Requirements Section of this document. The architecture is described in the following sections.

The SUPLCS reference release defines the requirements and specification for an OMA DM Management Object that will be used to define multiple SLPs and other configuration items for a SET.

6.1 Dependencies

The SUPLCS architecture is directly dependent on the architectures defined for OMA DM. Any defined release for the OMA DM enabler may be used to implement or deploy the SUPL Configuration Services. This is possible as the core schema definition for the OMA Device Management Object is backwards compatible across releases.

The SUPLCS architecture is dependent on the architectures defined in:

| | |
|-----------------|---|
| [OMA-DM-V1_2_1] | “Device Management”, Version 1.2.1, Open Mobile Alliance™, OMA-ERP-DM-V1_2_1, URL: http://www.openmobilealliance.org/ |
| [OMA-DM-V1_3] | “Device Management”, Version 1.3, Open Mobile Alliance™, OMA-ERP-DM-V1_3, URL: http://www.openmobilealliance.org/ |
| [OMA-DM-V2_0] | “Device Management”, Version 2.0, Open Mobile Alliance™, OMA-ERP-DM-V2_0, URL: http://www.openmobilealliance.org/ |

6.2 Architectural Diagram

The architecture diagram in Figure 1: SUPL Configuration Services Component Architecture shows the high level components of the OMA DM architectural model. The SUPLCS Management Object is stored within the DM Data Repository. One or more SUPLCS Management Objects may be defined within the DM Data Repository depending on the mobile operator needs.

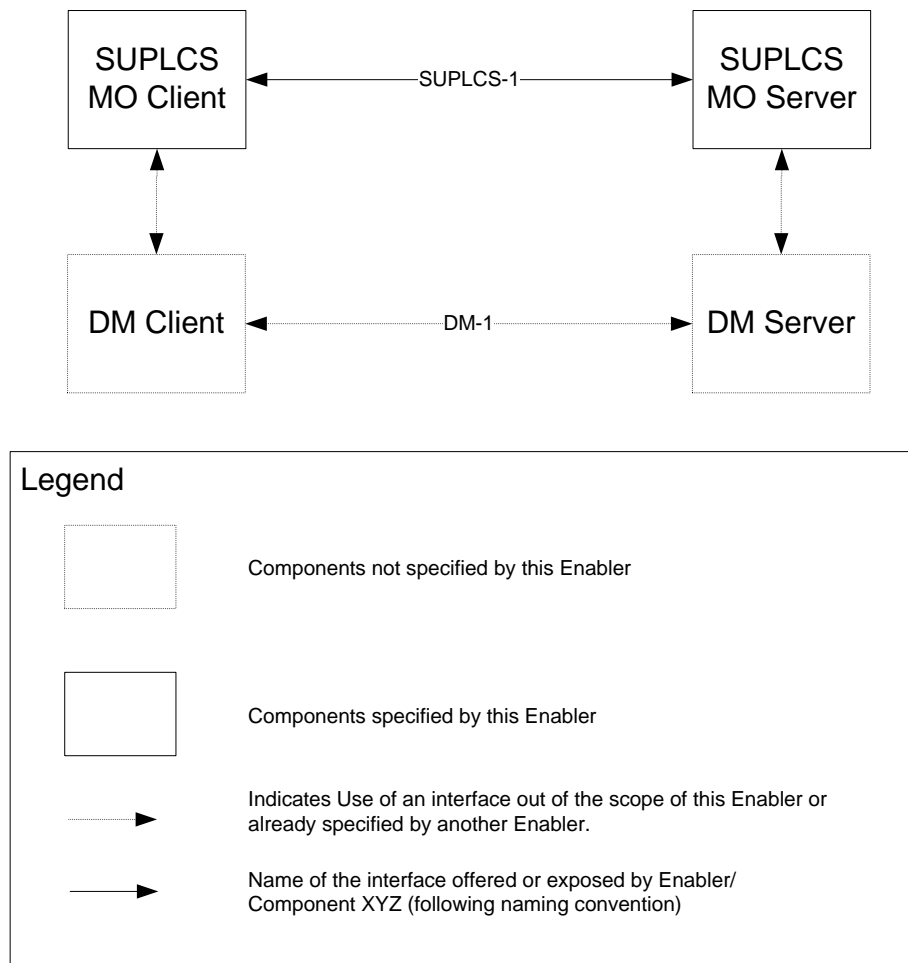

Figure 1: SUPL Configuration Services Component Architecture

6.3 Functional Components and Interfaces/reference points definition

See the references in [OMA DM] for a description of the OMA DM components and interfaces.

6.3.1 Components

6.3.1.1 SUPLCS MO Client

The SUPLCS MO Client is a logical entity, which is responsible for querying the SUPLCS Server for the Management Object. The results of the queries will drive the SUPL Location Platform to utilize for an individual location request. The SUPLCS MO Client leverages the DM Client to communicate with the SUPLCS MO Server.

6.3.1.2 SUPLCS MO Server

The SUPLCS MO Server is a logical entity, which is dedicated to respond to queries submitted by the SUPLCS MO Client. The SUPLCS MO Server leverages the functionalities provided by the DM Server to communicate with the SUPLCS MO Client.

6.3.1.3 DM Client

The OMA DM Client is defined in the [OMA DM] enabler and is the subject of those specifications.

6.3.1.4 DM Server

The OMA DM Server is defined in the [OMA DM] enabler and is the subject of those specifications.

6.3.2 Interfaces

6.3.2.1 SUPLCS-1 Interface

The SUPLCS-1 interface allows the SUPLCS MO Client to send queries to the SUPLCS MO Server for the SUPLCS MO elements using the underlying DM-1 interface.

6.3.2.2 DM-1 Interface

The DM-1 interface is defined in the [OMA DM] enabler and is the subject of those specifications. It provides a generic interface over which device management commands, status and MO data are exchanged between the SUPLCS MO Server and the SUPLCS MO Client.

7. OMA SUPL Configuration Services Management Object

The OMA SUPL Configuration Services management object (MO) is an object, which is used to manage OMA SUPL settings. The MO enables management of OMA SUPL related settings on behalf of the end user. E.g. it SHOULD be possible to set SUPL and Application configuration data without notifying the end user. The OMA SUPL Configuration Services MO is defined using the OMA DM Device Description Framework as described in [OMA DM].

The Management Object Identifier is: urn:oma:mo:oma-suplcs:1.0

7.1 Guide to the SUPLCS Management Object

The following table gives an overview of the SUPL CS Management object.

| Major Node | Description |
|-------------------|--|
| OperatorInfo | <p>The OperatorInfo node defines the H-SLP, the E-SLPs and the information on the data that has been provisioned by the operator in their instance of the SUPLCS Management Object. The MOElementCounts node has the number of elements provisioned in each list representing each use case. If the element count is zero, then the operator does not support that use case. The MOTimestamps node contains the time that each node was updated.</p> <p>Individual SUPLCS Clients may query this node to determine the values or they may bypass and perform direct queries to the rest of the MO.</p> |
| ApplicationList | <p>This node provides a list of applications that is indexed by the application name and digital signing certificate of the application making the location request. The client may query for the ApplicationID information as defined in SUPL 2.0 and above, and the H-SLP to route the request to. If there is no data returned, the configured operator's H-SLP should be utilized.</p> |
| DiscoveredSLPList | <p>The DiscoveredSLPList allows for configuration of D-SLPs that may be utilized by the handset. The handset may find a D-SLP utilizing the SUPLCS method and then based on interaction with the D-SLP enable additional capabilities. D-SLP settings within the SUPL protocol SHALL always override the DiscoveredSLPList configuration to prevent conflicts.</p> |

Table 1: Guide to the SUPLCS Management Object

The following diagram describes the SUPL CS Management Object tree visually.

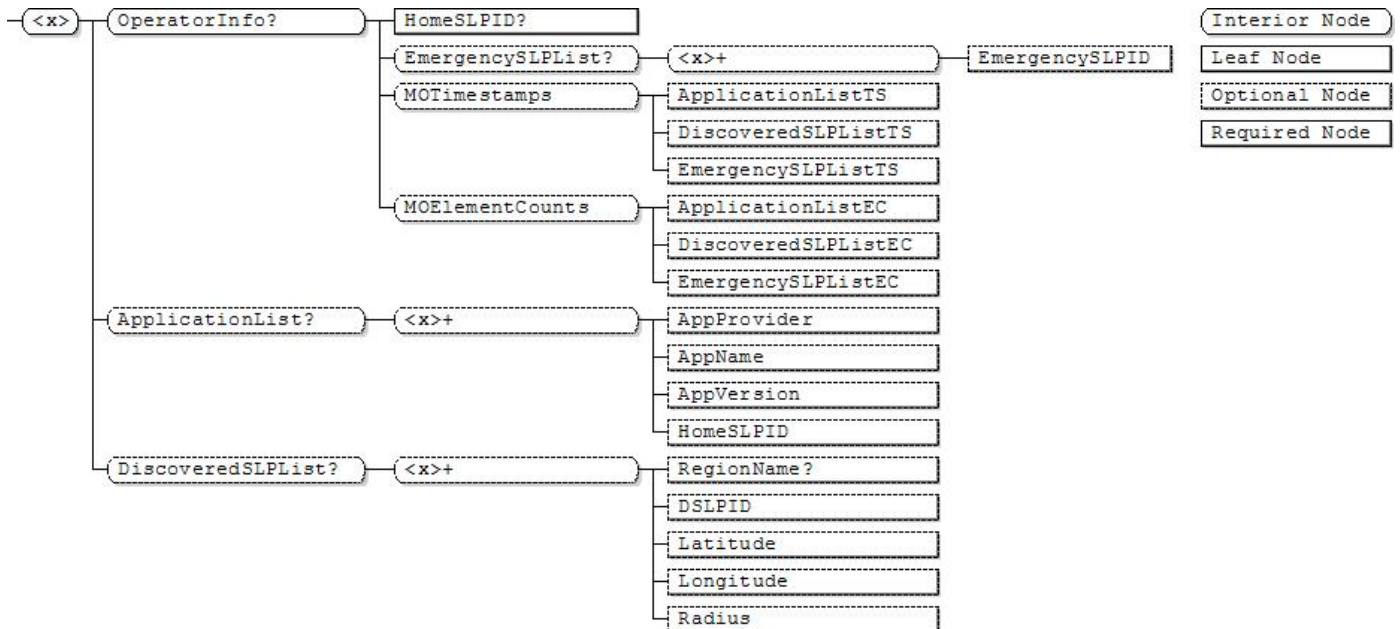

Figure 2: The OMA SUPL Configuration Services Management Object tree

7.2 Management Object Parameters

This section describes the parameters for OMA SUPL Configuration Services Management Object.

<x>

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Required | One | node | Get |

This node is the top level node representing content for the SUPL configuration for a single operator. Management Object Identifier for the SUPLCS MO MUST be: “urn:oma:mo:oma-suplcs:1.0”.

<x>/OperatorInfo

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Required | ZeroOrOne | node | Get |

This optional node specifies the SUPLCS capabilities the mobile operator has configured for their specific SUPLCS MO.

<x>/ OperatorInfo/HomeSLPID

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Required | ZeroOrOne | chr | Get |

The H-SLP ID for the operator. This element is not provisioned if alternative methods are used to configure the H-SLP for the operator. Provides the IP address or Fully Qualified Domain Name of the H-SLP.

<x>/OperatorInfo/EmergencySLPList

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | ZeroOrOne | node | Get |

The list of E-SLPs for the operator.

<x>/OperatorInfo/EmergencySLPList/<x>

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | OneOrMore | node | Get |

This interior node acts as a placeholder for one or more E-SLPs.

<x>/OperatorInfo/EmergencySLPList/<x>/EmergencySLPID

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

Provides the IP address or Fully Qualified Domain Name of the E-SLP.

<x>/OperatorInfo/MOTimestamps

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | node | Get |

This is a series of timestamps when the major nodes have been updated to minimize interaction with the SET.

<x>/OperatorInfo/MOTimestamps/ApplicationListTS

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The UTC timestamp the ApplicationList was last updated. The format of the string should be in YYYYMMDDhhmm format.

<x>/OperatorInfo/MOTimestamps/DiscoveredSLPListTS

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The UTC timestamp the DiscoveredSLPList was last updated. The format of the string should be in YYYYMMDDhhmm format.

<x>/OperatorInfo/MOTimestamps/EmergencySLPListTS

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | time | Get |

The UTC timestamp the EmergencySLPList was last updated. The format of the string should be in YYYYMMDDhhmm format.

<x>/OperatorInfo/MOElementCounts

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | node | Get |

This is a series of the number of elements provisioned for each major element.

<x>/OperatorInfo/MOElementCounts/ApplicationListEC

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | int | Get |

The count of the serving applications provisioned.

<x>/OperatorInfo/MOElementCounts/DiscoveredSLPListEC

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | int | Get |

The count of the D-SLPs provisioned.

<x>/OperatorInfo/MOElementCounts/EmergencySLPListEC

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | int | Get |

The count of the E-SLPs provisioned.

<x>/ApplicationList

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | ZeroOrOne | node | Get |

List of Applications configured for steering to a specific H-SLP.

<x>/ApplicationList/<x>

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | OneOrMore | node | Get |

The ApplicationList/<x> element is made up of the concatenation of the application name, “:” and the hashcode of the digital signature of the application. e.g. “com.myloccompany.navapp:186509321”

<x>/ApplicationList/<x>/AppProvider

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The application provider.

<x>/ApplicationList/<x>/AppName

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The application name.

<x>/ApplicationList/<x>/AppVersion

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The application version.

<x>/ApplicationList/<x>/HomeSLPID

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

Provides the IP address or Fully Qualified Domain Name of the H-SLP to be used for this application.

<x>/DiscoveredSLPList

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | ZeroOrOne | node | Get |

The list of D-SLPs associated with the operator's H-SLP.

<x>/DiscoveredSLPList/<x>

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | OneOrMore | node | Get |

An individual D-SLP.

<x>/DiscoveredSLPList/<x>/RegionName

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | ZeroOrOne | chr | Get |

The name of the region the D-SLP covers.

<x>/DiscoveredSLPList/<x>/DSLPIID

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

Provides the IP address or Fully Qualified Domain Name of the D-SLP.

<x>/DiscoveredSLPList/<x>/Latitude

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The latitude of the region in decimal degrees.

<x>/DiscoveredSLPList/<x>/Longitude

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The longitude of the region in decimal degrees.

<x>/DiscoveredSLPList/<x>/Radius

| Status | Occurrence | Format | Min. Access Types |
|----------|------------|--------|-------------------|
| Optional | One | chr | Get |

The radius of the circle from the latitude and longitude of the regional service in meters.
