3.1 Change Classification

Class 2 – Bug Fixes

3.2 Change Summary

The WTAI PDC addendum Outgoing Call Model is inconsistent with the WTA Spec and PDC capabilities.

- In PDC when a call is in “waiting for ringing” state it can move to the “Call Active” state upon detection of a “Call Connected” event without previously passing through “waiting for answer” (or receiving “Call Alerting” event).
- The WTA PDC call model extends the WTA call model. Therefore, the WTA Outgoing Call Model should be slightly modified so that the call can make the above-specified transition.
