# 1. Scope

This document provides changes and corrections to the following document files:

- WAP-167-ServiceInd-20010731-a

It includes changes from the following change requests:

- CR-WAP-167-20010907-ERICSSON-1

# 2. Notation

In the subsections describing the changes new text is underlined. Removed text has ~~striketrough~~ marks. The presented text is copied from the specification. Text that is not presented is not affected at all. The change descriptions may also include editor's notes similar to the one below. The notes are not part of the actual changes and must not be included in the changed text.

**Editor's note:** Framed notes like these only clarify where and how the changes shall be applied.

### 3. Error in Figure

#### 3.1 Change Classification

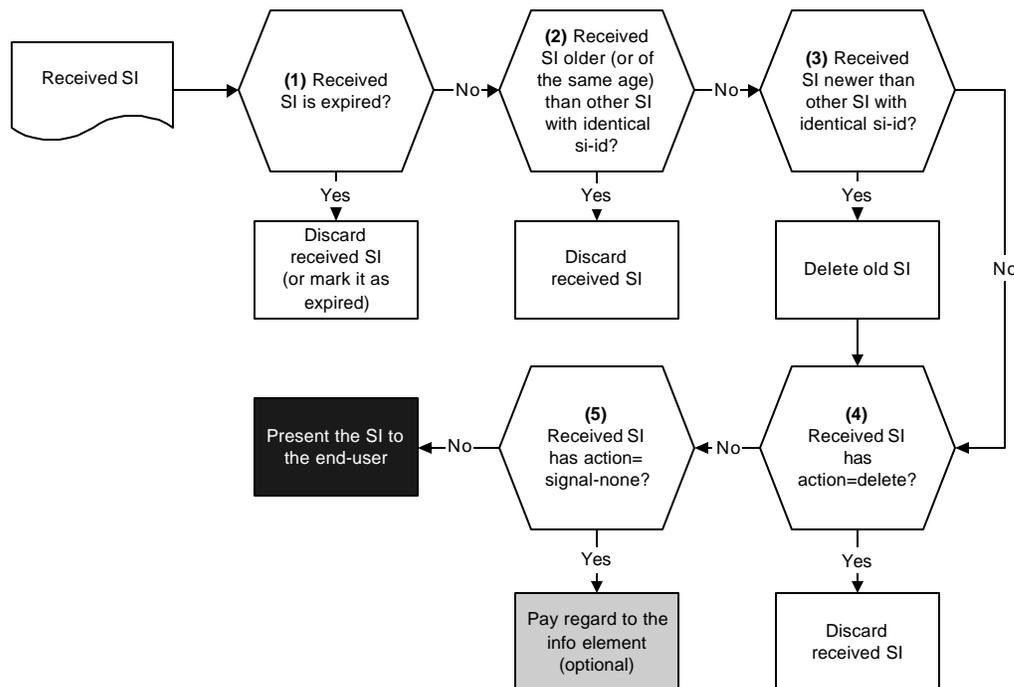

Class 2 – Bug Fixes

#### 3.2 Change Summary

This change amends figure 2 where box 2 and 3 are not in line with the (normative) text below the figure with respect to handling of a received SI with a `created` attribute value equal to another SI's `created` attribute value.

#### 3.3 Change Description

**Editor's note:** In section 6.2, replace figure 2 with the following one ("(or of the same age)" moved from box 3 to box 2):

**Editor's note:** In section 6.2, move description of how SIs with identical `created` attribute values should be handled from bullet 3 to bullet 2 to align the text with the figure (note that this does not imply any changed behaviour):

## 2. Handling of out of order delivery

The `created` attribute is used to determine the age of the SI in order to resolve race conditions between SIs that arrive in an order different from the one in which the push initiator sent them. If the value of the `created` attribute in a received SI is older than, or identical to, this attribute value in any other SI with identical `si-id`, the received SI MUST be silently discarded.

SIs are subject to this operation only if both criteria stated below are fulfilled:

- the `created` attribute has an explicitly assigned value
- the `si-id` attribute or the `href` attribute, or both, has an explicitly assigned value

## 3. Replacement

The `created` attribute is used to determine the age of an SI, which combined with the value of the `si-id` attribute provides the information needed for replacement. A received SI containing an `si-id` identical to the `si-id` of any older SI MUST replace the old SI. ~~If the received SI and another SI with identical `si-id` contain identical values for the `created` attribute, the received SI MUST be silently discarded.~~

SIs are subject to this operation only if both criteria stated below are fulfilled:

- the `created` attribute has an explicitly assigned value

the `si-id` attribute or the `href` attribute, or both, has an explicitly assigned value

## 4. Minor clerical correction

### 4.1 Change Classification

Class 3 – Clerical Corrections

### 4.2 Change Summary

Section 8.2.1.1 mentions "WML tokenisation" instead of "SI tokenisation".

### 4.3 Change Description

**Editor's note:** Apply the following changes in section 8.2.1.1

The ~~WML-SI~~ tokenisation process SHOULD validate that attribute values defined as %Datetime; follow the syntax defined in section 5.2.1.

## 5. SCR Table Corrections

### 5.1 Change Classification

Class 3 – Clerical Corrections

### 5.2 Change Summary

The following changes amends erroneous SCR entries and updates the reference to the "Specification of WAP Conformance Requirements" document.

### 5.3 Change Description

**Editor's note:** Apply the following changes in section 2.1

~~[CONF] — Specification of WAP Conformance Requirements, 15-September-2000, WAP Forum Ltd,  
URL: <http://www.wapforum.org/>~~

~~[CREQ] — "Specification of WAP Conformance Requirements". WAP Forum™. WAP-221-CREQ-20010425-a.  
URL:<http://www.wapforum.org/>~~

**Editor's note:** Apply the following changes in Appendix A.1.2

SI-CSE-C-001	UTF-8 Encoding.	5.1	O	WML- <del>C</del> -01
SI-CSE-C-002	UTF-16 Encoding.	5.1	O	WML- <del>C</del> -02
SI-CSE-C-003	UCS-4 Encoding.	5.1	O	WML- <del>C</del> -03
SI-CSE-C-004	Other character encoding.	5.1	O	WML- <del>C</del> -04

**Editor's note:** Apply the following changes in Appendix A.2.2

SI-VAL-S-003	SI validation.	<del>8.2.1.1</del>	O	<del>SI-DOC-S-001</del>
