4. Introduction

This document outlines the materials that constitute the Reference Release Definition for the OMA Service Environment (OSE) Version 1.0. This reference release serves to keep the collection of materials associated for ease of use and acquisition.

The OSE Version 1.0 consists of the following documents:

OMA Service Environment (OSE) Requirements Document [[OSE RD](#)] provides requirements on the OMA Service Environment.

OMA Service Environment Architecture Document [[OSE AD](#)] provides normative guidelines for OMA enabler specification writers and an informative OSE architecture.

It is the purpose of the OSE to provide guidance to OMA enabler specification developers that enabler specifications should reuse existing specifications where possible. This approach includes reuse of existing OMA enabler specifications whenever possible.

Furthermore the informative OSE architecture provides a framework that enables the exposure of OMA enablers, other functions, resources and applications to each other in a controlled manner.

5. Description of Differences from Previous Version

This is a new reference release. There are no previous versions.
