

Enabler Release Definition for OMA Web Services Enabler (OWSER)

Approved Version 1.1 – 28 Mar 2006

Open Mobile Alliance
OMA-ERELED-OWSER-V1_1-20060328-A

Use of this document is subject to all of the terms and conditions of the Use Agreement located at <http://www.openmobilealliance.org/UseAgreement.html>.

Unless this document is clearly designated as an approved specification, this document is a work in process, is not an approved Open Mobile Alliance™ specification, and is subject to revision or removal without notice.

You may use this document or any part of the document for internal or educational purposes only, provided you do not modify, edit or take out of context the information in this document in any manner. Information contained in this document may be used, at your sole risk, for any purposes. You may not use this document in any other manner without the prior written permission of the Open Mobile Alliance. The Open Mobile Alliance authorizes you to copy this document, provided that you retain all copyright and other proprietary notices contained in the original materials on any copies of the materials and that you comply strictly with these terms. This copyright permission does not constitute an endorsement of the products or services. The Open Mobile Alliance assumes no responsibility for errors or omissions in this document.

Each Open Mobile Alliance member has agreed to use reasonable endeavors to inform the Open Mobile Alliance in a timely manner of Essential IPR as it becomes aware that the Essential IPR is related to the prepared or published specification. However, the members do not have an obligation to conduct IPR searches. The declared Essential IPR is publicly available to members and non-members of the Open Mobile Alliance and may be found on the “OMA IPR Declarations” list at <http://www.openmobilealliance.org/ipr.html>. The Open Mobile Alliance has not conducted an independent IPR review of this document and the information contained herein, and makes no representations or warranties regarding third party IPR, including without limitation patents, copyrights or trade secret rights. This document may contain inventions for which you must obtain licenses from third parties before making, using or selling the inventions. Defined terms above are set forth in the schedule to the Open Mobile Alliance Application Form.

NO REPRESENTATIONS OR WARRANTIES (WHETHER EXPRESS OR IMPLIED) ARE MADE BY THE OPEN MOBILE ALLIANCE OR ANY OPEN MOBILE ALLIANCE MEMBER OR ITS AFFILIATES REGARDING ANY OF THE IPR'S REPRESENTED ON THE “OMA IPR DECLARATIONS” LIST, INCLUDING, BUT NOT LIMITED TO THE ACCURACY, COMPLETENESS, VALIDITY OR RELEVANCE OF THE INFORMATION OR WHETHER OR NOT SUCH RIGHTS ARE ESSENTIAL OR NON-ESSENTIAL.

THE OPEN MOBILE ALLIANCE IS NOT LIABLE FOR AND HEREBY DISCLAIMS ANY DIRECT, INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OF DOCUMENTS AND THE INFORMATION CONTAINED IN THE DOCUMENTS.

© 2006 Open Mobile Alliance Ltd. All Rights Reserved.

Used with the permission of the Open Mobile Alliance Ltd. under the terms set forth above.

3. Terminology and Conventions

3.1 Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in this document are to be interpreted as described in [RFC2119].

All sections and appendixes, except “Scope” and “Introduction”, are normative, unless they are explicitly indicated to be informative.

The formal notation convention used in section 9 to formally express the structure and internal dependencies between specifications in the Enabler Release specification baseline is detailed in [IOPPROC].

3.2 Definitions

Enabler Release	Collection of specifications that combined together form an enabler for a service area, e.g. a download enabler, a browsing enabler, a messaging enabler, a location enabler, etc. The specifications that are forming an enabler should combined fulfil a number of related market requirements.
Minimum Functionality Description	Description of the guaranteed features and functionality that will be enabled by implementing the minimum mandatory part of the Enabler Release.

3.3 Abbreviations

ERDEF	Enabler Requirement Definition
ERELD	Enabler Release Definition
OMA	Open Mobile Alliance
HTTP	Hyper Text Transfer Protocol
OWSER	OMA Web Services Enabler
SOAP	Simple Object Access Protocol (no longer an acronym starting with SOAP version 1.2)
UDDI	Universal Description, Discovery and Integration
WSDL	Web Services Definition Language

4. Introduction

This document outlines the Enabler Release Definition for the OMA Web Services Enabler (OWSER). V 1.1

The OWSER V1.0 release included a Network Identity specification. Subsequent to the OWSER 1.0 release, a decision was made to provide Network Identity functions as a separate, independent enabler [OWSER NI]. The only changes between OWSER V1.0 and OWSER V1.1 are those needed to remove references to Network Identity from OWSER. None of the core functionality in OWSER Core Specification has been changed and all of functionality contained in the OWSER 1.0 Network Identity specification has been incorporated OWSER NI V1.0.

The OWSER Version 1.1 consists of the following specification:

- The OMA Web Services Enabler (OWSER): Core Specifications [[OWSER SPEC](#)] provides the basic Web Service infrastructure that is needed to offer and consume Web Services in an OMA environment.

The OMA Web Services Core Specifications is augmented by two informative documents that provide additional information to readers of the specifications:

- The OMA Web Services Enabler (OWSER): Overview [[OWSER Overview](#)] is informative and provides an overview of the OWSER and the Web Service architecture and technologies that will be used to publish, discover and use Web Services in a secure manner. It is intended to complement the normative text found in the companion OWSER specifications.
- The OMA Web Services Enabler (OWSER) Best Practices: WSDL Style Guide [[OWSER BP WSDL](#)] provides provides informative guidelines on the use of WSDL that may be used by OMA-defined Web Services.

It is the purpose of the OWSER to provide any OMA enabler that defines a Web Service with an infrastructure to which it MUST conform as described in [OWSER SPEC].

It is important to note that there are no implications that other OMA enablers are required to provide their functionality via Web Service interfaces. However, for those enablers that choose to do so, the corresponding OWSER specifications provide normative guidance. Without such normative guidance, designers of Web Services within OMA would almost certainly try to solve these problems on their own, each in their own way. Without such a common Web Services infrastructure, it would inevitably lead to brittle implementations, interoperability problems, and increased time to market.

5. Description of Differences from Previous Version

The OWSER V1.0 release included a Network Identity specification. Subsequent to the OWSER 1.0 release, a decision was made to provide Network Identity functions as a separate, independent enabler [OWSER NI]. The only changes between OWSER V1.0 and OWSER V1.1 are those needed to remove references to Network Identity from OWSER. None of the core functionality in OWSER Core Specification has been changed and all of functionality contained in the OWSER 1.0 Network Identity specification has been incorporated OWSER NI V1.0.

6. Enabler Release Specification Baseline

This section is normative.

7. Minimum Functionality Description for OMA Web Services Enabler (OWSER)

This section is informative.

7.1 Core Specifications

An OMA Service Enabler offering a Web Service interface to its capabilities must use the SOAP and HTTP protocols as described in [OWSER SPEC] for Web Services messaging.

Optional features include the use of WSDL for describing Web Services, choice of security implementations, and the use of UDDI for publication and discovery of Web Services. If used, implementations of these features must conform to that described in [OWSER SPEC].

Implementers should make themselves familiar with the WS-I Basic Profile [WS-I BP] as this is referenced in the specification as an external specification with which OMA Web Services should be conformant.

8. Conformance Requirements Notation Details

This section is informative

The tables in following chapters use the following notation:

- Item:** Entry in this column MUST be a valid ScrItem according to [IOPPROC].
- Feature/Application:** Entry in this column SHOULD be a short descriptive label to the **Item** in question.
- Status:** Entry in this column MUST accurately reflect the architectural status of the **Item** in question.
- M means the **Item** is mandatory for the class
 - O means the **Item** is optional for the class
 - NA means the **Item** is not applicable for the class
- Requirement:** Expression in the column MUST be a valid TerminalExpression according to [IOPPROC] and it MUST accurately reflect the architectural requirement of the **Item** in question.

9. ERDEF for OWSER - Client Requirements

This section is normative.

Item	Feature / Application	Status	Requirement
OMA-ERDEF-OWSER-000	OMA Web Services Enabler Release	M	OMA-ERDEF-OWSER-001
OMA-ERDEF-OWSER-001	Core specifications	M	OMA-ERDEF-WSR-001 AND OMA-ERDEF-WS-001 AND OMA-ERDEF-WSI-001

Table 1 ERDEF for OMA Web Services Enabler

Note that the entries in the requirements cells make references to Item entries in sections 8.1 and 8.2.

This table captures the fact that the entire *raison d'être* for OWSER is providing a core Web Services infrastructure for those enablers that may need it.

9.1 Core Specifications

An OMA enabler that defines a Web Service MUST use the infrastructure as described in [OWSER SPEC].

In the Requirements column in the tables below, the following terms are used:

- MAF: mandatory features for all roles
- MWSRF: mandatory features for the WSR role
- MWSF: mandatory features for the WS role
- MIF: mandatory features for the WS Intermediary role

9.1.1 Web Service Requester requirements

Item	Feature / Application	Status	Requirement
OMA-ERDEF-WSR-001	Web Services transport and messaging	M	CORE:MAF AND CORE:MWSRF

Table 2 ERDEF for OMA Web Services Core Specifications Requester Requirements

9.1.2 Web Service requirements

Item	Feature / Application	Status	Requirement
OMA-ERDEF-WS-001	Web Services transport and messaging	M	CORE:MAF AND CORE:MWSF

Table 3 ERDEF for OMA Web Services Core Specifications Web Service Requirements

9.1.3 Web Services Intermediary requirements

Item	Feature / Application	Status	Requirement
OMA-ERDEF-WSI-001	Web Services transport and messaging	M	CORE:MAF AND CORE:MIF
